

FAQs

Can the Bose Bass Module 700 be wired?

Yes. If for some reason a wired connection is preferred, the Bose Bass Module 700 and the Bose Soundbar 700 can be hardwired together using a standard 3.5-mm audio cable. Contact your local Bose customer service centre or purchase this standard cable at any electronics store.

What placement guidelines should be considered to ensure optimal audio performance of the Bose Bass Module 700?

For best sound quality, the Bose Bass Module 700 should be placed on the floor against the same wall as the television and soundbar, with an electrical socket nearby for the power cable. The bass module should not be placed on a shelf or table. For more bass, the bass module should be placed closer to walls and corners. For less bass, the bass module should be pulled away from walls and corners.

Can the Bose Bass Module 700 be added to other one-piece Bose speakers, such as the Bose Home Speaker 500 or SoundTouch 10 wireless speaker?

No. The Bose Bass Module 700 can only be added to the Bose Soundbar 500, Bose Soundbar 700 and the SoundTouch 300 soundbar.
