GENERAL SAFETY PRECAUTIONS

• Never submerge this thermometer in any liquid since it is not water resistant.
• Do not store the thermometer in the storage case when it is damp. Wipe it off with a dry cloth first.
• Do not use the thermometer to measure anything other than human body temperatures.
• Do handle the thermometer with care and do not use the thermometer for anything else than the intended use on human beings.
• After each use, disinfect the thermometer especially in case the device is used by more than one person. Please refer to “CLEANING AND DISINFECTING”.
• Do not disassemble or repair the thermometer. Doing so may result in inaccurate readings.
• Do not leave the thermometer and its small parts where children can get to them. Children may swallow them. Should a child swallow the battery or battery cover, contact a doctor immediately.
• Do not attempt to incinerate the battery. It may burst.
• Do not attempt to disassemble or repair the thermometer. Doing so may result in inaccurate readings.
• Do not step on the unit or the storage case.

TROUBLESHOOTING

1. Nothing appears on the display, even after turning the thermometer on.

- Display is blank (ON/OFF button is pressed).
- The polarity is reversed.
- The battery has run out. Replace the battery.

2. Displayed values do not change but the buzzer is on.

- Normal buzzer function.
- Buzzer is only working when the temperature of the sensor tip is too high. The sensor tip must be cooled down.

3. Displayed values change when the unit is angled.

- Normal function.
- This thermometer features Auto-power OFF function and will automatically turn itself off after 5 minutes of inactivity.

4. Displayed values change when the surface is touched.

- Normal function.
- The sensor of this thermometer is located on the back of the display.
