Password Journal® INSTRUCTION MANUAL

CONTENTS
Password Journal® Case
1 Invisible Ink Pen

Please remove all components from the container and compare them to the contents list. If any items are missing or broken, dial 1-800-524-8697. Before using the U.S., please consult the listing of your local Mattel offices at the end of these instructions.

BATTERY INFORMATION
1 Batteries should be changed when sound distortions or locking mechanism malfunctions.

ADULT SUPERVISION RECOMMENDED WHEN CHANGING BATTERIES.

BATTERY SAFETY INFORMATION
Do not remove batteries and do not throw them in the trash bin. Battery leaks can cause a chemical burn injury or ruin your product. To avoid battery leakage:
- Non-rechargeable batteries are to be disposed of and not to be recharged.
- Do not mix alkaline, standard (carbon-zinc), or rechargeable nickel-cadmium batteries.
- Do not mix old and new batteries.
- Only batteries of the same or equivalent type as recommended are to be used.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the product.
- The supply terminals are not to be short-circuited.
- Dispose of batteries safely.

NOTE: Do not dispose of this product in a fire. The batteries inside may explode or leak.

RESETTING YOUR PASSWORD
If the Password Journal® does not accept your password after speaking it clearly, try lowering your voice and repeating it.

You may want to write down your password in case you forget it—just be sure not to write it in a safe place or where it won’t be seen anywhere!

You can reset your password at any time by pressing the reset button with the tip of a pen.

NOTE: If you do not want to set a password, switch the Security Button to OFF. The Access Button will then automatically open the journal.

RECORDING YOUR GREETING, Alert & Sign-Off
You can record your Password Journal® even more by recording your own Greeting and Sign-off. In this way, you can protect your secrets from intruders (e.g., ‘Caught you!’)

Press the Record Options Button to toggle through the options. When you hear the prompt you want: Greeting, Alert or Sign-off—press the Select Button to enter your choice.

Record the same way as when you set your password, following the prompts from the Password Journal®.

SECURITY SETTINGS
The Security Button allows you to adjust the settings depending on how much protection you want. Toggle through the settings until you get the prompt for the desired setting:
- LOW: In this setting, you will need to speak your password more clearly and precisely. In order to release the lock, this assumes that no one but you will be able to duplicate your password (a great way to keep out nosy intruders!). On this setting, be sure to say your password the EXACT same way each time.
- HIGH: In this setting, you will need to speak your password more clearly and precisely. In order to release the lock, this assumes that no one but you will be able to duplicate your password (a great way to keep out nosy intruders!). On this setting, be sure to say your password the EXACT same way each time. But beware! A snoop who has memorized your password may be able to use it to open your journal.

If your journal is in the OFF setting, it will open without a password, simply press the Access Button.

NOTE: The first time you use your Password Journal® it will be at Low security. You have to adjust the setting if you want it at High or Off.

THE GLOW LIGHT AND PEN
Use the special invisible ink pen to write your personal secrets, and then reveal them with the Glow Light. When the Glow Light shines on your personal secret (a darkness of about 1 ft (30 cm) in a dark room), your secret will be seen, so you can simply hide it away from you. If you need to make a note of your password without speaking it out loud, you can simply hold it away from you. For best results, remember to lock it in a quiet environment so that the mic does not pick up background noise.

You may want to set a password to hide your secret, but be sure not to write it in a safe place or where it won’t be seen anywhere!

You can reset your password at any time by pressing the reset button with the tip of a pen.

NOTE: If you do not want to set a password, switch the Security Button to OFF. The Access Button will then automatically open the journal.

THE SECRET STORAGE COMPARTMENT
The Secret Storage Compartment is located under your notebook. Use it to lock pictures, jewelry, whatever you want to keep safe!

RESETTING YOUR PASSWORD
From time to time, you may want to change your password (particularly if you think some else knows it!). Press the Reset Button with the tip of a pen to erase your current password. Then record a new one following the prompts. See “Recording Your Password.”

NOTE: If you erase your current password, you will not be able to access your journal without recording a new password. The secret not to save your new password in a safe place or where it won’t be seen anywhere!

If the Glow Light won’t turn itself off after 3 minutes, you can simply turn it off by pressing the Glow Light Button one more time.

If you want to use your notebook, and your voice is not heard in the password, be sure to match the voice in you notebook.

MORE TIPS
- Be sure to use your notebook in a quiet environment.
- Only you will be able to use your notebook.
- Your notebook is not waterproof.

TROUBLESHOOTING
- If you are having difficulty opening your journal with your password, consider adjusting your security setting. See “SECURITY SETTINGS.”
- Your notebook is made of natural bamboo, which makes it resistant to weather, and thus to scratching. It also uses natural color. It is easy to clean and does not require any maintenance.

NOTE: This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
- This device may cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user’s authority to operate the equipment.
