About This Manual

Introduction to the Manuals

The following manuals are supplied with your Epson printer. As well as the manuals, check the various types of help information available from the printer itself or from the Epson software applications.

- **Important Safety Instructions (paper manual)**
  Provides you with instructions to ensure the safe use of this printer.

- **Start Here (paper manual)**
  Provides you with information on setting up the printer, installing the software, using the printer, and so on.

  This manual. Provides overall information and instructions on using the printer, on network settings when using the printer on a network, and on solving problems.

You can obtain the latest versions of the above manuals with the following methods.

- **Paper manual**

- **Digital manual**
  Start EPSON Software Updater on your computer. EPSON Software Updater checks for available updates of Epson software applications and the digital manuals, and allows you to download the latest ones.

Related Information

⇒ “Software Update Tools (EPSON Software Updater)” on page 174

Using the Manual to Search for Information

The PDF manual allows you to search for information you are looking for by keyword, or jump directly to specific sections using the bookmarks. You can also print only the pages you need. This section explains how to use a PDF manual that has been opened in Adobe Reader X on your computer.
Searching by keyword
Click Edit > Advanced Search. Enter the keyword (text) for information you want to find in the search window, and then click Search. Hits are displayed as a list. Click one of the displayed hits to jump to that page.

Jumping directly from bookmarks
Click a title to jump to that page. Click + or > to view the lower level titles in that section. To return to the previous page, perform the following operation on your keyboard.

- Windows: Hold down Alt, and then press ←.
- Mac OS: Hold down the command key, and then press ←.

Printing only the pages you need
You can extract and print only the pages you need. Click Print in the File menu, and then specify the pages you want to print in Pages in Pages to Print.

- To specify a series of pages, enter a hyphen between the start page and the end page.
  Example: 20-25
- To specify pages that are not in series, divide the pages with commas.
  Example: 5, 10, 15
Marks and Symbols

⚠️ Caution:
Instructions that must be followed carefully to avoid bodily injury.

⚠️ Important:
Instructions that must be observed to avoid damage to your equipment.

Note:
Provides complementary and reference information.

➡️ Related Information
Links to related sections.

Descriptions Used in this Manual

- Screenshots of the printer driver and the Epson Scan 2 (scanner driver) screens are from Windows 10 or macOS High Sierra. The content displayed on the screens varies depending on the model and situation.
- Illustrations of the printer used in this manual are examples only. Although there may be slight differences depending on the model, the method of operation is the same.
- Some of the menu items on the LCD screen vary depending on the model and settings.

**Mac OS**

In this manual, "Mac OS" is used to refer to macOS High Sierra, macOS Sierra, OS X El Capitan, OS X Yosemite, OS X Mavericks, OS X Mountain Lion, Mac OS X v10.7.x, and Mac OS X v10.6.8.
Important Instructions

Safety Instructions

Read and follow these instructions to ensure safe use of this printer. Make sure you keep this manual for future reference. Also, be sure to follow all warnings and instructions marked on the printer.

☒ Some of the symbols used on your printer are to ensure safety and proper use of the printer. Visit the following Web site to learn the meaning of the symbols.
  http://support.epson.net/symbols

☒ Use only the power cord supplied with the printer and do not use the cord with any other equipment. Use of other cords with this printer or the use of the supplied power cord with other equipment may result in fire or electric shock.

☒ Be sure your AC power cord meets the relevant local safety standard.

☒ Never disassemble, modify, or attempt to repair the power cord, plug, printer unit, scanner unit, or options by yourself, except as specifically explained in the printer’s manuals.

☒ Unplug the printer and refer servicing to qualified service personnel under the following conditions:
  - The power cord or plug is damaged; liquid has entered the printer; the printer has been dropped or the casing damaged; the printer does not operate normally or exhibits a distinct change in performance. Do not adjust controls that are not covered by the operating instructions.

☒ Place the printer near a wall outlet where the plug can be easily unplugged.

☒ Do not place or store the printer outdoors, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, high temperature or humidity.

☒ Take care not to spill liquid on the printer and not to handle the printer with wet hands.

☒ Keep the printer at least 22 cm away from cardiac pacemakers. Radio waves from this printer may adversely affect the operation of cardiac pacemakers.

☒ If the LCD screen is damaged, contact your dealer. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.

☒ Avoid using a telephone during an electrical storm. There may be a remote risk of electric shock from lightning.

☒ Do not use a telephone to report a gas leak in the vicinity of the leak.

Safety Instructions for Ink

☒ Be careful when you handle used ink cartridges, as there may be some ink around the ink supply port.
  - If ink gets on your skin, wash the area thoroughly with soap and water.
  - If ink gets into your eyes, flush them immediately with water. If discomfort or vision problems continue after a thorough flushing, see a doctor immediately.
  - If ink gets into your mouth, see a doctor right away.

☒ Do not disassemble the ink cartridge and the maintenance box; otherwise ink may get into your eyes or on your skin.
Important Instructions

- Do not shake ink cartridges too vigorously and do not drop them. Also, be careful not to squeeze them or tear their labels. Doing so may cause ink leakage.
- Keep ink cartridges and maintenance box out of the reach of children.

Printer Advisories and Warnings

Read and follow these instructions to avoid damaging the printer or your property. Make sure you keep this manual for future reference.

Advisories and Warnings for Setting Up/Using the Printer

- Do not block or cover the vents and openings in the printer.
- Use only the type of power source indicated on the printer’s label.
- Avoid using outlets on the same circuit as photocopiers or air control systems that regularly switch on and off.
- Avoid electrical outlets controlled by wall switches or automatic timers.
- Keep the entire computer system away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- The power-supply cords should be placed to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of the power-supply cords and do not allow the power-supply cords to be stepped on or run over. Be particularly careful to keep all the power-supply cords straight at the ends and the points where they enter and leave the transformer.
- If you use an extension cord with the printer, make sure that the total ampere rating of the devices plugged into the extension cord does not exceed the cord’s ampere rating. Also, make sure that the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet’s ampere rating.
- If you plan to use the printer in Germany, the building installation must be protected by a 10 or 16 amp circuit breaker to provide adequate short-circuit protection and over-current protection for the printer.
- When connecting the printer to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- Place the printer on a flat, stable surface that extends beyond the base of the printer in all directions. The printer will not operate properly if it is tilted at an angle.
- When storing or transporting the printer, avoid tilting it, placing it vertically, or turning it upside down; otherwise ink may leak.
- Allow space above the printer so that you can fully raise the document cover.
- Leave enough space in front of the printer for the paper to be fully ejected.
- Avoid places subject to rapid changes in temperature and humidity. Also, keep the printer away from direct sunlight, strong light, or heat sources.
- Do not insert objects through the slots in the printer.
- Do not put your hand inside the printer during printing.
- Do not touch the white flat cable inside the printer.
- Do not use aerosol products that contain flammable gases inside or around the printer. Doing so may cause fire.
- Do not move the print head by hand; otherwise, you may damage the printer.
Be careful not to trap your fingers when closing the scanner unit.
Do not press too hard on the scanner glass when placing the originals.
Always turn the printer off using the button. Do not unplug the printer or turn off the power at the outlet until the light stops flashing.
Before transporting the printer, make sure that the print head is in the home (far right) position and the ink cartridges are in place.
If you are not going to use the printer for a long period, be sure to unplug the power cord from the electrical outlet.

Advisories and Warnings for Using the Printer with a Wireless Connection

Radio waves from this printer may negatively affect the operation of medical electronic equipment, causing them to malfunction. When using this printer inside medical facilities or near medical equipment, follow directions from the authorized personnel representing the medical facilities, and follow all posted warnings and directions on the medical equipment.
Radio waves from this printer may negatively affect the operation of automatically controlled devices such as automatic doors or fire alarms, and could lead to accidents due to malfunction. When using this printer near automatically controlled devices, follow all posted warnings and directions on these devices.

Advisories and Warnings for Using the Touchscreen

The LCD screen may contain a few small bright or dark spots, and because of its features it may have an uneven brightness. These are normal and do not indicate that it is damaged in any way.
Only use a dry, soft cloth for cleaning. Do not use liquid or chemical cleaners.
The exterior cover of the touchscreen could break if it receives a heavy impact. Contact your dealer if the panel surface chips or cracks, and do not touch or attempt to remove the broken pieces.
Press the touchscreen gently with your finger. Do not press force or operate with your nails.
Do not use sharp objects such as ball point pens or sharp pencils to perform operations.
Condensation inside the touchscreen due to abrupt changes in temperature or humidity may cause performance to deteriorate.

Protecting Your Personal Information

When you give the printer to someone else or dispose of it, erase all the personal information stored in the printer’s memory by selecting Settings > Restore Default Settings > Clear All Data and Settings on the control panel.

Viewing Animations

You can view animations of operating instructions such as loading paper or removing jammed paper on the LCD screen.

- Press 7 button: Displays the help screen. Tap How To and then select the items that you want to view.
Tap **How To** at the bottom of the operation screen: Displays the context-sensitive animation.

- **Indicates the total number of steps and the current step number.**
  - In the example above, it shows step 3 from 4 steps.

- **Returns to the previous step.**

- **Indicates your progress through the current step. The animation repeats when the progress bar reaches the end.**

- **Moves to next step.**
Network Settings

Network Connection Types

You can use the following connection methods.

**Ethernet Connection**

Connect the printer to a hub with an Ethernet cable.

**Wi-Fi Connection**

Connect the printer and the computer or smart device to the access point. This is the typical connection method for home or office networks where computers are connected by Wi-Fi through the access point.

Related Information

“Making Advanced Network Settings” on page 29
Related Information

- “Connecting to a Computer” on page 23
- “Connecting to a Smart Device” on page 24
- “Making Wi-Fi Settings from the Printer” on page 24

Wi-Fi Direct (Simple AP) Connection

Use this connection method when you are not using Wi-Fi at home or at the office, or when you want to connect the printer and the computer or smart device directly. In this mode, the printer acts as an access point and you can connect up to four devices to the printer without having to use a standard access point. However, devices directly connected to the printer cannot communicate with each other through the printer.

Note:
Wi-Fi Direct (Simple AP) connection is a connection method designed to replace Ad Hoc mode.

The printer can be connected by Wi-Fi or Ethernet, and Wi-Fi Direct (Simple AP) connection simultaneously. However, if you start a network connection in Wi-Fi Direct (Simple AP) connection when the printer is connected by Wi-Fi, the Wi-Fi is temporarily disconnected.

Related Information

- “Making Wi-Fi Direct (Simple AP) Connection Settings” on page 28

Connecting to a Computer

We recommend using the installer to connect the printer to a computer. You can run the installer using one of the following methods.

- Setting up from the website
  Access the following website, and then enter the product name. Go to [Setup](http://epson.sn), and then start setting up.

- Setting up using the software disc (only for the models that come with a software disc and users with computers with disc drives.)
  Insert the software disc into the computer, and then follow the on-screen instructions.
Selecting the Connection Methods
Follow the on-screen instructions until the following screen is displayed, and then select the connection method of the printer to the computer.
Select the connection type and then click Next.

Connecting to a Smart Device
You can use the printer from a smart device when you connect the printer to the same Wi-Fi network (SSID) as the smart device. To use the printer from a smart device, set up from the following website. Access to the website from the smart device that you want to connect to the printer.
http://epson.sn > Setup

Note:
If you want to connect a computer and a smart device to the printer at the same time, we recommend connecting the computer first.

Making Wi-Fi Settings from the Printer
You can make network settings from the printer’s control panel in several ways. Choose the connection method that matches the environment and conditions that you are using.
If you know the information for the access point such as SSID and password, you can make settings manually. If the access point supports WPS, you can make settings by using push button setup.
After connecting the printer to the network, connect to the printer from the device that you want to use (computer, smart device, tablet, and so on.)

Make advanced network settings to use a static IP address.

**Related Information**

- “Making Wi-Fi Settings Manually” on page 25
- “Making Wi-Fi Settings by Push Button Setup (WPS)” on page 26
- “Making Wi-Fi Settings by PIN Code Setup (WPS)” on page 27
- “Making Wi-Fi Direct (Simple AP) Connection Settings” on page 28
- “Making Advanced Network Settings” on page 29

## Making Wi-Fi Settings Manually

You can manually set up the information necessary to connect to an access point from the printer’s control panel. To set up manually, you need the SSID and password for an access point.

**Note:**

*If you are using an access point with its default settings, the SSID and password are on the label. If you do not know the SSID and password, contact the person who set up the access point, or see the documentation provided with the access point.*

1. Tap 📱 on the home screen.
2. Select Wi-Fi (Recommended).
   
   If the printer has already been connected by Ethernet, select Router.
3. Tap Start Setup.
   
   If the network connection is already set up, the connection details are displayed. Tap Change Settings to change the settings.
   
   If the printer has already been connected by Ethernet, tap Change to Wi-Fi connection., and then select Yes after checking the message.
4. Select Wi-Fi Setup Wizard.
5. Select the SSID for the access point.

**Note:**

- If the SSID you want to connect to is not displayed on the printer’s control panel, tap Search Again to update the list. If it is still not displayed, tap Enter Manually, and then enter the SSID directly.
- If you do not know the SSID, check if it is written on the label of the access point. If you are using the access point with its default settings, use the SSID written on the label.
6. Tap **Enter Password**, and then enter the password.

   **Note:**
   - The password is case-sensitive.
   - If you do not know the password, check if it is written on the label of the access point. If you are using the access point with its default settings, use the password written on the label. The password may also be called a “Key”, a “Passphrase”, and so on.
   - If you do not know the password for the access point, see the documentation provided with the access point, or contact the person who set it up.

7. When you have finished, tap **OK**.

8. Check the settings, and then tap **Start Setup**.

9. Tap **OK** to finish.

   **Note:**
   If you fail to connect, load A4 size plain paper, and then select **Print Check Report** to print a connection report.

10. Close the **Network Connection Settings** screen.

**Related Information**

- “Entering Characters” on page 20
- “Checking the Network Connection Status” on page 30
- “When You Cannot Make Network Settings” on page 189

**Making Wi-Fi Settings by Push Button Setup (WPS)**

You can automatically set up a Wi-Fi network by pressing a button on the access point. If the following conditions are met, you can set up by using this method.

- The access point is compatible with WPS (Wi-Fi Protected Setup).
- The current Wi-Fi connection was established by pressing a button on the access point.

   **Note:**
   If you cannot find the button or you are setting up using the software, see the documentation provided with the access point.

1. Tap on the home screen.

2. Select **Wi-Fi (Recommended)**.
   
   If the printer has already been connected by Ethernet, select **Router**.

3. Tap **Start Setup**.
   
   If the network connection is already set up, the connection details are displayed. Tap **Change Settings** to change the settings.
   
   If the printer has already been connected by Ethernet, tap **Change to Wi-Fi connection.**, and then select **Yes** after checking the message.

4. Select **Push Button Setup (WPS)**.
5. Hold down the [WPS] button on the access point until the security light flashes.

If you do not know where the [WPS] button is, or there are no buttons on the access point, see the documentation provided with your access point for details.

6. Tap **Start Setup** on the printer.

7. Close the screen.

The screen automatically closes after a specific length of time.

**Note:**
*If connection fails, restart the access point, move it closer to the printer, and try again. If it still does not work, print a network connection report and check the solution.*

8. Close the **Network Connection Settings** screen.

**Related Information**

➤ “Checking the Network Connection Status” on page 30
➤ “When You Cannot Make Network Settings” on page 189

**Making Wi-Fi Settings by PIN Code Setup (WPS)**

You can automatically connect to an access point by using a PIN code. You can use this method to set up if an access point is capable of WPS (Wi-Fi Protected Setup). Use a computer to enter a PIN code into the access point.

1. Tap on the home screen.

2. Select **Wi-Fi (Recommended)**.

   If the printer has already been connected by Ethernet, select **Router**.

3. Tap **Start Setup**.

   If the network connection is already set up, the connection details are displayed. Tap **Change Settings** to change the settings.

   If the printer has already been connected by Ethernet, tap **Change to Wi-Fi connection.**, and then select **Yes** after checking the message.

4. Select **Others > PIN Code Setup (WPS)**.
5. Use your computer to enter the PIN code (an eight digit number) displayed on the printer's control panel into the access point within two minutes.

   Note:
   See the documentation provided with your access point for details on entering a PIN code.

6. Tap **Start Setup** on the printer’s control panel.

7. Close the screen.

   The screen automatically closes after a specific length of time.

   Note:
   If connection fails, restart the access point, move it closer to the printer, and try again. If it still does not work, print a connection report and check the solution.

8. Close the **Network Connection Settings** screen.

**Related Information**
- “Checking the Network Connection Status” on page 30

### Making Wi-Fi Direct (Simple AP) Connection Settings

This method allows you to connect the printer directly to devices without an access point. The printer acts as an access point.

**Important:**
When you connect from a computer or smart device to the printer using the Wi-Fi Direct (Simple AP) connection, the printer is connected to the same Wi-Fi network (SSID) as the computer or smart device and the communication is established between them. Since the computer or smart device is automatically connected to the other connectable Wi-Fi network if the printer is turned off, it is not connected to the previous Wi-Fi network again if the printer is turned on. Connect to the printer’s SSID for Wi-Fi Direct (Simple AP) connection from the computer or smart device again. If you do not want to connect every time you turn the printer on or off, we recommend using Wi-Fi network by connecting the printer to an access point.

1. Tap on the home screen.

2. Select **Wi-Fi Direct**.

3. Tap **Start Setup**.

   If you have made Wi-Fi Direct (Simple AP) settings, the detailed connection information is displayed. Go to step 5.

4. Tap **Start Setup**.

5. Check the SSID and password displayed on the printer’s control panel.

   On the computer’s network connection screen or the smart device’s Wi-Fi screen, select the SSID shown on the printer’s control panel to connect.
Network Settings

Note:
You can check the connection method on the Web site. To access the Web site, scan the QR code displayed on the printer's control panel using the smart device or enter the URL (http://epson.sn) on the computer, and then go to Setup.

6. Enter the password displayed on the printer's control panel on the computer or smart device.

7. After the connection is established, tap OK on the printer's control panel.

8. Close the Network Connection Settings screen.

Making Advanced Network Settings

You can change the network device name, TCP/IP setup, proxy server and so on. Check your network environment before making changes.

1. Select Settings on the home screen.

2. Select General Settings > Network Settings > Advanced.

3. Select the menu item for settings, and then select or specify the setting values.

Related Information

⇒ "Setting Items for Advanced Network Settings" on page 29

Setting Items for Advanced Network Settings

Select the menu item for settings, and then select or specify the setting values.

- Device Name
  You can enter the following characters.
  - Character limits: 2 to 15 (you must enter at least 2 characters)
  - Usable characters: A to Z, a to z, 0 to 9, -. 
  - Characters you cannot use at the top: 0 to 9, -. 
  - Characters you cannot use at the bottom: -
Network Settings

- **TCP/IP**
  - **Auto**
    Select when you are using an access point at home or you are allowing the IP address to be acquired automatically by DHCP.
  - **Manual**
    Select when you do not want the printer’s IP address to be changed. Enter the addresses for IP Address, Subnet Mask, and Default Gateway, and make DNS Server settings according to your network environment.
    When you select **Auto** for the IP address assignment settings, you can select the DNS server settings from **Manual** or **Auto**. If you cannot obtain the DNS server address automatically, select **Manual**, and then enter the primary DNS server and secondary DNS server address directly.

- **Proxy Server**
  - **Do Not Use**
    Select when you are using the printer in a home network environment.
  - **Use**
    Select when you are using a proxy server in your network environment and you want to set it to the printer. Enter the proxy server address and port number.

- **IPv6 Address**
  - **Enable**
    Select this when using an IPv6 address.
  - **Disable**
    Select this when using an IPv4 address.

- **Link Speed & Duplex**
  Select an appropriate Ethernet speed and duplex setting. If you select a setting other than Auto, make sure the setting corresponds to the settings on the hub you are using.
  - **Auto**
  - **10BASE-T Half Duplex**
  - **10BASE-T Full Duplex**
  - **100BASE-TX Half Duplex**
  - **100BASE-TX Full Duplex**

---

**Checking the Network Connection Status**

You can check the network connection status in the following way.
Network Icon

You can check the network connection status and strength of the radio wave using the network icon on the printer’s home screen.

Related Information

⇒ “Icons displayed in the LCD Screen” on page 17

Checking Detailed Network Information from the Control Panel

When your printer is connected to the network, you can also view other network-related information by selecting the network menus you want to check.

1. Select Settings on the home screen.

3. To check the information, select the menus that you want to check.

- Wired LAN/Wi-Fi Status
  Displays the network information (device name, connection, signal strength, obtain IP address, and so on) for Ethernet or Wi-Fi connections.

- Wi-Fi Direct Status
  Displays whether Wi-Fi Direct is enabled or disabled for Wi-Fi Direct connections.

- Print Status Sheet
  Prints a network status sheet. The information for Ethernet, Wi-Fi, Wi-Fi Direct, and so on is printed on two or more pages.

Related Information

⇒ “Printing a Network Status Sheet” on page 38

Printing a Network Connection Report

You can print a network connection report to check the status between the printer and the access point.

1. Load papers.
2. Select **Settings** on the home screen.

3. Select **General Settings > Network Settings > Connection Check**.
   The connection check starts.

4. Select **Print Check Report**.

5. Print the network connection report.
   If an error has occurred, check the network connection report, and then follow the printed solutions.

6. Close the screen.

**Related Information**

⇒ “Messages and Solutions on the Network Connection Report” on page 32

**Messages and Solutions on the Network Connection Report**

Check the messages and error codes on the network connection report, and then follow the solutions.

![Network Connection Report](image)

- “E-13” on page 37
- “Message on the Network Environment” on page 38

E-1

Message:
Confirm that the network cable is connected and network devices such as hub, router, or access point are turned on.

Solutions:
- Make sure the Ethernet cable is securely connected to your printer and to your hub or other network device.
- Make sure your hub or other network device is turned on.
- If you want to connect the printer by Wi-Fi, make Wi-Fi settings for the printer again because it is disabled.

E-2, E-3, E-7

Message:
No wireless network names (SSID) found. Confirm that the router/access point is turned on and the wireless network (SSID) is set up correctly. Contact your network administrator for assistance.

No wireless network names (SSID) found. Confirm that the wireless network name (SSID) of the PC you wish to connect is set up correctly. Contact your network administrator for assistance.

Entered security key/password does not match the one set for your router/access point. Confirm security key/password. Contact your network administrator for assistance.

Solutions:
- Make sure your access point is turned on.
- Confirm that your computer or device is connected correctly to the access point.
- Turn off the access point. Wait for about 10 seconds, and then turn it on.
- Place the printer closer to your access point and remove any obstacles between them.
- If you have entered the SSID manually, check if it is correct. Check the SSID from the Network Status part on the network connection report.
If an access point has multiple SSIDs, select the SSID at 2.4 GHz. The printer does not support SSIDs at 5 GHz.

If you are using push button setup to establish a network connection, make sure your access point supports WPS. You cannot use push button setup if your access point does not support WPS.

Make sure your SSID uses only ASCII characters (alphanumeric characters and symbols). The printer cannot display an SSID that contains non-ASCII characters.

Make sure you know your SSID and password before connecting to the access point. If you are using an access point with its default settings, the SSID and password are located on a label on the access point. If you do not know your SSID and password, contact the person who set up the access point, or see the documentation provided with the access point.

If you are connecting to an SSID generated from a tethering smart device, check for the SSID and password in the documentation provided with the smart device.

If your Wi-Fi connection suddenly disconnects, check for the conditions below. If any of these conditions are applicable, reset your network settings by downloading and running the software from the following website.

http://epson.sn > Setup

- Another smart device was added to the network using push button setup.
- The Wi-Fi network was set up using any method other than push button setup.

**Related Information**

➤ “Connecting to a Computer” on page 23
➤ “Making Wi-Fi Settings from the Printer” on page 24

**E-5**

**Message:**

Security mode (e.g. WEP, WPA) does not match the current setting of the printer. Confirm security mode. Contact your network administrator for assistance.

**Solutions:**

Make sure the access point’s security type is set to one of the following. If it is not, change the security type on the access point, and then reset the printer’s network settings.

- WEP-64 bit (40 bit)
- WEP-128 bit (104 bit)
- WPA PSK (TKIP/AES)*
- WPA2 PSK (TKIP/AES)*
- WPA (TKIP/AES)
- WPA2 (TKIP/AES)

* WPA PSK is also known as WPA Personal. WPA2 PSK is also known as WPA2 Personal.
Message:
MAC address of your printer may be filtered. Check whether your router/access point has restrictions such as MAC address filtering. See the documentation of the router/access point or contact your network administrator for assistance.

Solutions:
- Check if MAC address filtering is disabled. If it is enabled, register the printer’s MAC address so that it is not filtered. See the documentation provided with the access point for details. You can check the printer’s MAC address from the Network Status part on the network connection report.
- If your access point is using shared authentication with WEP security, make sure the authentication key and index are correct.
- If the number of connectable devices on the access point is less than the number of network devices that you want to connect, make settings on the access point to increase the number of connectable devices. See the documentation provided with the access point to make settings.

Related Information
- “Setting Items for Advanced Network Settings” on page 29
- “Printing a Network Status Sheet” on page 38

Message:
Incorrect IP address is assigned to the printer. Confirm IP address setup of the network device (hub, router, or access point). Contact your network administrator for assistance.

Solutions:
- Enable DHCP on the access point if the printer’s Obtain IP Address setting is set to Auto.
- If the printer’s Obtain IP Address setting is set to Manual, the IP address you manually set is invalid due to out of range (for example: 0.0.0.0). Set a valid IP address from the printer’s control panel or by using Web Config.

Related Information
- “Setting Items for Advanced Network Settings” on page 29

Message:
Confirm the connection and network setup of the PC or other device. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.

Solutions:
Check the following.
Network Settings

☐ Devices are turned on.
☐ You can access the Internet and other computers or network devices on the same network from the devices you want to connect to the printer.

If still does not connect your printer and network devices after confirming the above, turn off the access point. Wait for about 10 seconds, and then turn it on. Then reset your network settings by downloading and running the installer from the following website.

http://epson.sn > Setup

Related Information
⇒ “Connecting to a Computer” on page 23

E-10

Message:
Confirm IP address, subnet mask, and default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.

Solutions:
Check the following.
☐ Other devices on the network are turned on.
☐ Network addresses (IP address, subnet mask, and default gateway) are correct if you have set the printer’s Obtain IP Address to Manual.

Reset the network address if they are incorrect. You can check the IP address, subnet mask, and default gateway from the Network Status part on the network connection report.

If DHCP is enabled, change the printer’s Obtain IP Address setting to Auto. If you want to set the IP address manually, check the printer’s IP address from the Network Status part on the network connection report, and then select Manual on the network settings screen. Set the subnet mask to [255.255.255.0].

If still does not connect your printer and network devices, turn off the access point. Wait for about 10 seconds, and then turn it on.

Related Information
⇒ “Setting Items for Advanced Network Settings” on page 29

E-11

Message:
Setup is incomplete. Confirm default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.

Solutions:
Check the following.
☐ The default gateway address is correct if you set the printer’s TCP/IP Setup setting to Manual.
The device that is set as the default gateway is turned on.

Set the correct default gateway address. You can check the default gateway address from the **Network Status** part on the network connection report.

**Related Information**

- "Setting Items for Advanced Network Settings" on page 29

**E-12**

**Message:**

Confirm the following - Entered security key/password is correct - Index of the security key/password is set to the first number - IP address, subnet mask, or default gateway setup is correct Contact your network administrator for assistance.

**Solutions:**

- Check the following.
  - Other devices on the network are turned on.
  - The network addresses (IP address, subnet mask, and default gateway) are correct if you are entering them manually.
  - The network addresses for other devices (subnet mask and default gateway) are the same.
  - The IP address does not conflict with other devices.

If still does not connect your printer and network devices after confirming the above, try the following.

- Turn off the access point. Wait for about 10 seconds, and then turn it on.
- Make network settings again using the installer. You can run it from the following website.
  
  http://epson.sn > Setup

- You can register several passwords on an access point that uses WEP security type. If several passwords are registered, check if the first registered password is set on the printer.

**Related Information**

- "Setting Items for Advanced Network Settings" on page 29
- "Connecting to a Computer" on page 23

**E-13**

**Message:**

Confirm the following - Entered security key/password is correct - Index of the security key/password is set to the first number - Connection and network setup of the PC or other device is correct Contact your network administrator for assistance.

**Solutions:**

- Check the following.
Network devices such as an access point, hub, and router are turned on.

The TCP/IP Setup for network devices has not been set up manually. (If the printer's TCP/IP Setup is set automatically while the TCP/IP Setup for other network devices is performed manually, the printer's network may differ from the network for other devices.)

If it still does not work after checking the above, try the following.

- Turn off the access point. Wait for about 10 seconds, and then turn it on.
- Make network settings on the computer that is on the same network as the printer using the installer. You can run it from the following website.
  
  http://epson.sn > Setup

- You can register several passwords on an access point that uses the WEP security type. If several passwords are registered, check if the first registered password is set on the printer.

</tr>
</tbody>
</table>

Printing a Network Status Sheet

You can check the detailed network information by printing it.

1. Load papers.
2. Select Settings on the home screen.
4. Select Print Status Sheet.
5. Check the message, and then print the network status sheet.
6. Close the screen.
   The screen automatically closes after a specific length of time.

### Replacing or Adding New Access Points

If the SSID changes due to the replacement of an access point, or an access point is added and a new network environment is established, re-set the Wi-Fi settings.

**Related Information**

- "Changing the Connection Method to a Computer" on page 39

### Changing the Connection Method to a Computer

Using the installer and re-set up in a different connection method.

- Setting up from the website
  
  Access the following website, and then enter the product name. Go to **Setup**, and then start setting up.
  
  [http://epson.sn](http://epson.sn)

- Setting up using the software disc (only for the models that come with a software disc and users with computers with disc drives.)
  
  Insert the software disc into the computer, and then follow the on-screen instructions.

**Selecting Change the Connection Methods**

Follow the on-screen instructions until the following screen is displayed.
Changing the Network Connection to Ethernet from the Control Panel

Follow the steps below to change the network connection to Ethernet from Wi-Fi using the control panel.

1. Select **Settings** on the home screen.
2. Select **General Settings > Network Settings > Wired LAN Setup**.
3. Tap **Start Setup**.
4. Check the message, and then close the screen.
   The screen automatically closes after a specific length of time.
5. Connect the printer to a router using an Ethernet cable.

Disabling Wi-Fi from the Control Panel

When Wi-Fi is disabled, the Wi-Fi connection is disconnected.

1. Tap on the home screen.
2. Select Wi-Fi (Recommended).
   The network status is displayed.

3. Tap Change Settings.

4. Select Others > Disable Wi-Fi.

5. Check the message, and then start setup.

6. When a completion message is displayed, close the screen.
   The screen automatically closes after a specific length of time.

7. Close the network connection settings screen.

---

**Disconnecting Wi-Fi Direct (Simple AP) Connection from the Control Panel**

*Note:*
When Wi-Fi Direct (Simple AP) connection disabled, all computers and smart devices connected to the printer in Wi-Fi Direct (Simple AP) connection are disconnected. If you want to disconnect a specific device, disconnect from the device instead of the printer.

1. Tap on the home screen.

2. Select Wi-Fi Direct.
   The Wi-Fi Direct information is displayed.

3. Tap Change Settings.

4. Select Disable Wi-Fi Direct.

5. Tap the Disable the settings.

6. When a completion message is displayed, close the screen.
   The screen automatically closes after a specific length of time.

7. Close the Network Connection Settings screen.

---

**Restoring the Network Settings from the Control Panel**

You can restore all network settings to their defaults.

1. Select Settings on the home screen.

2. Select Restore Default Settings > Network Settings.
3. Check the message, and then select Yes.

4. When a completion message is displayed, close the screen.
   The screen automatically closes after a specific length of time.
Preparing the Printer

Loading Papers

Available Paper and Capacities

Epson recommends using genuine Epson paper to ensure high-quality printouts.

*1 You can load up to 30 sheets for paper with one side already printed.

*2 Load one sheet of paper at a time if the paper does not feed correctly or if the printout has uneven colors or smears.

Note:

- The availability of paper varies by location. For the latest information on paper available in your area, contact Epson support.

- When printing on genuine Epson paper at a user defined size, only Standard or Normal print quality settings are available. Although some printer drivers allow you to select a better print quality, the printouts are printed using Standard or Normal.

*1 Only printing from computer or smart device is available.

*2 You can load up to 30 sheets for paper with one side already printed.

### Paper Handling Precautions

- Read the instruction sheets supplied with the paper.
- Fan and align the edges of the paper before loading. Do not fan or curl photo paper. Doing so may damage the printable side.

- If the paper is curled, flatten it or curl it slightly in the opposite direction before loading. Printing on curled paper may cause paper jams and smears on the printout.
Preparing the Printer

- Do not use paper that is wavy, torn, cut, folded, damp, too thick, too thin, or paper that has stickers stuck to it. Using these types of paper causes paper jams and smears on the printout.
- Make sure you are using long-grain paper. If you are not sure what type of paper you are using, check the paper packaging or contact the manufacturer to confirm the paper specifications.

Related Information

- “Printer Specifications” on page 212

Loading Paper in the Paper Cassette

1. Open the front cover until it clicks.

2. Check that the printer is not operating, and then slide out the paper cassette.

**Important:**

The paper cassette cannot be removed.
3. Slide the edge guides to their maximum position.

4. With the printable side facing down, load paper until it touches the back of the paper cassette.

**Important:**

*Do not load more than the maximum number of sheets specified for the paper.*

8.5 x 13 in.

Load paper using the line.
7. On the control panel, set the size and type of the paper you loaded in the paper cassette. If your paper size is not displayed, select **User-Defined**.

   **Note:**
   You can also display the paper size and paper type settings screen by selecting **Settings > General Settings > Printer Settings > Paper Source Settings > Paper Setting**.

8. Slide out the output tray.

Loading Envelopes and Precautions

Load envelopes with the flap facing up, and then slide the edge guides to the edges of the envelopes.

- Fan and align the edges of the envelopes before loading. When the stacked envelopes are puffed up with air, press them down to flatten them before loading.
- Do not use envelopes that are curled or folded. Using these envelopes causes paper jams and smears on the printout.
- Do not use envelopes with adhesive surfaces on the flaps or window envelopes.
- Avoid using envelopes that are too thin, as they may curl during printing.

### Placing Originals

Place originals on the scanner glass or the ADF.

You can scan multiple originals at the same time with the ADF.

#### Available Originals for the ADF

<table>
<thead>
<tr>
<th>Available Paper Sizes</th>
<th>A4, Letter, 8.5x13 in., Legal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper Type</td>
<td>Plain paper</td>
</tr>
<tr>
<td>Paper Thickness (Weight of Paper)</td>
<td>64 to 95 g/m²</td>
</tr>
<tr>
<td>Loading Capacity</td>
<td>A4, Letter: 30 sheets or 3.3 mm</td>
</tr>
<tr>
<td></td>
<td>8.5x13 in., Legal: 10 sheets</td>
</tr>
</tbody>
</table>

Even when the original meets the specifications for media that can be placed in the ADF, it may not feed from the ADF or the scan quality may decline depending on the paper properties or quality.

**Important:**

Do not feed photographs or valuable original artwork into the ADF. Misfeeding may wrinkle or damage the original. Scan these documents on the scanner glass instead.

To prevent paper jams, avoid placing the following originals in the ADF. For these types, use the scanner glass.

- Originals that are torn, folded, wrinkled, deteriorated, or curled
- Originals with binder holes
- Originals held together with tape, staples, paper clips etc.
- Originals that have stickers or labels stuck to them
- Originals that are cut irregularly or not right angled
- Originals that are bound
- OHPs, thermal transfer paper, or carbon backs
Preparing the Printer

Placing Originals on the ADF

1. Align the edges of the originals.

2. Open the ADF document support and extend the ADF output tray extension.

3. Pinch and slide out the ADF edge guide.

4. Place the originals face-up in the ADF, and then slide the ADF edge guide to the edge of the originals.
Important:

- Do not load originals above the line indicated by the triangle symbol on the ADF.
- Do not add originals while scanning.

Related Information

➤ “Available Originals for the ADF” on page 49

Placing Originals on the ADF for 2-up Copying

Place the originals in the direction shown in the illustration, and then select the orientation setting.

- Portrait originals: Select Portrait on the control panel as described below.
  
  Copy > Advanced Settings > Original Orientation > Portrait

  Place the originals on the ADF in the direction of the arrow.

- Landscape originals: Select Landscape on the control panel as described below.
  
  Copy > Advanced Settings > Original Orientation > Landscape

  Place the originals on the ADF in the direction of the arrow.

Placing Originals on the Scanner Glass

Caution:

Be careful not to trap your hand or fingers when opening or closing the document cover. Otherwise you may be injured.
1. Open the document cover.

![Image of a printer with the document cover open]

2. Remove any dust or stains on the scanner glass.

3. Place the original face-down and slide it to the corner mark.

![Image of a scanner glass with original placed]

**Note:**
- A range of 1.5 mm from the bottom edge and right edge of the scanner glass is not scanned.
- When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.

4. Close the cover gently.

**Important:**
Do not apply too much force to the scanner glass or the document cover. Otherwise, they may be damaged.

5. Remove the originals after scanning.

**Note:**
If you leave the originals on the scanner glass for a long time, they may stick to the surface of the glass.
Placing an ID Card for Copying

Place an ID card 5 mm away from the corner mark of the scanner glass.

Managing Contacts

Registering a contacts list allows you to easily enter destinations. You can register up to 100 entries, and you can use the contacts list when you enter a fax number.

Registering or Editing Contacts

1. Select Fax on the home screen.
2. Select Contacts.
3. Do one of the following.
   - To register a new contact, select Add Entry, and then select Add Contact.
   - To edit a contact, select \(\Rightarrow\) on the target contact, and then select Edit.
   - To delete a contact, select \(\Rightarrow\) on the target contact, and then select Delete, and then select Yes. You do not have to perform following procedures.
4. Make the necessary settings.
   
   **Note:**
   When entering a fax number, enter an external access code at the beginning of the fax number if your phone system is PBX and you need the access code to get an outside line. If the access code has been set in the Line Type setting, enter a hash (#) instead of the actual access code. To add a pause (pause for three seconds) during dialing, enter a hyphen (-).
5. Tap OK.

Related Information

⇒ “Entering Characters” on page 20

Registering or Editing Grouped Contacts

Adding contacts to a group allows you to send a fax to multiple destinations at the same time.
1. Select Fax on the home screen.

2. Select Contacts.

3. Do one of the following.
   - To register a new grouped contacts, select Add Entry and then select Add Group.
   - To edit a grouped contacts, select → on the target grouped contacts, and then select Edit.
   - To delete a grouped contacts, select → on the target grouped contacts and then select Delete, and then select Yes. You do not have to perform following procedures.

4. Enter or edit the Group Name and the Index Word, and then select Contact(s) Added to the Group (Required).

5. Select the contacts that you want to register in the group, and then tap Close.
   
   Note:
   - You can register up to 99 contacts.
   - To deselect a contact, tap it again.

6. Tap OK.

Related Information
⇒ “Entering Characters” on page 20

Register Contacts on a Computer

Using Web Config, you can create a contact list on your computer and import it to the printer.

2. Select Advanced Settings from the list at the top right of the window.

3. Select Contacts.

4. Select the number that you want to register, and then click Edit.

5. Enter Name, Index Word, Fax Number, and Fax Speed.

6. Click Apply.

Menu Options for Settings

Select Settings on the home screen of the printer to make various settings.
Menu Options for General Settings

Select the menus on the control panel as described below.

Settings > General Settings

Basic Settings

Select the menus on the control panel as described below.

Settings > General Settings > Basic Settings

LCD Brightness:
Adjust the brightness of the LCD screen.

Sound:
Adjust the volume and select the type of the sound.

Sleep Timer:
Adjust the time period to enter a sleep mode (energy saving mode) when the printer has not performed any operations. The LCD screen turns black when the setting time passes.

Power Off Timer:
Your product may have this feature or the Power Off Settings feature depending on the location of purchase.
Select this setting to turn the printer off automatically when it is not used for a specified period of time. You can adjust the time before power management is applied. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

Power Off Settings:
Your product may have this feature or the Power Off Timer feature depending on the location of purchase.

- Power Off If Inactive
  Select this setting to turn the printer off automatically if it is not used for a specified period of time. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

- Power Off If Disconnected
  Select this setting to turn the printer off after 30 minutes when all network ports including the LINE port are disconnected. This feature may not be available depending on your region.

Date/Time Settings:

- Date/Time
  Enter the current date and time.

- Daylight Saving Time
  Select the summer time setting that applies to your area.

- Time Difference
  Enter the time difference between your local time and UTC (Coordinated Universal Time).
Preventing the Printer

Country/Region:
Select the country or region in which you are using your printer. If you change the country or region, your fax settings return to their defaults and you must select them again.

Language:
Select the language used on the LCD screen.

Operation Time Out:
Select **On** to return to the initial screen when no operations have been performed for the specified time.

Keyboard:
Change the layout of the keyboard on the LCD screen.

Related Information
- “Saving Power - Control Panel” on page 63
- “Entering Characters” on page 20

Printer Settings
Select the menus on the control panel as described below.

Settings > General Settings > Printer Settings

Paper Source Settings:

Paper Setting:
Select the paper size and paper type you loaded in the paper source. You can make Favorite Paper Settings in paper size and paper type.

A4/Letter Auto Switching:
Select **On** to feed paper from the paper source set as A4 size when there is no paper source set as Letter, or feed from the paper source set as Letter size when there is no paper source set as A4.

Error Notice:
Select **On** to display an error message when the selected paper size or type does not match the loaded paper.

Paper Setup Auto Display:
Select **On** to display the Paper Setting screen when loading paper in the paper source. If you disable this feature, you cannot print from an iPhone or iPad using AirPrint.

Universal Print Settings:
These print settings are applied when you print by an external device without using the printer driver.

Top Offset:
Adjust the top margin of the paper.
Preparing the Printer

Left Offset:
Adjust the left margin of the paper.

Top Offset in Back:
Adjust the top margin for the back of the page when performing 2-sided printing.

Left Offset in Back:
Adjust the left margin for the back margin of the page when performing 2-sided printing.

Check Paper Width:
Select On to check the paper width before printing. This prevents printing beyond the edges of the paper when the paper size setting are incorrect, but may reduce the printing speed.

Skip Blank Page:
Skips blank pages in the print data automatically.

Auto Error Solver:
Select an action to perform when a 2-sided printing error or a memory full error occurs.

☑ On
Displays a warning and prints in single-sided mode when a 2-sided printing error occurs, or prints only what the printer could process when a memory full error occurs.

☑ Off
Displays an error message and cancels printing.

Quiet Mode:
Select On to reduce noise during printing, however, this may lower the print speed. Depending on the paper type and print quality settings you selected, there may be no difference in the printer's noise level.

Ink Drying Time:
Select the ink drying time you want to use when performing 2-sided printing. The printer prints the other side after printing one side. If your printout is smeared, increase the time setting.

PC Connection via USB:
Select Enable to allow a computer to access the printer when connected by USB. When Disable is selected, printing and scanning that is not sent over a network connection is restricted.

Network Settings
Select the menus on the control panel as described below.

Settings > General Settings > Network Settings

Wi-Fi Setup:
Set up or change wireless network settings. Choose the connection method from the following and then follow the instructions on the LCD panel.

☑ Wi-Fi (Recommended)
Preparing the Printer

- Wi-Fi Direct

**Wired LAN Setup:**
Set up or change a network connection that uses a LAN cable and router. When this is being used, Wi-Fi connections are disabled.

**Network Status:**
Displays or prints the current network settings.
- Wired LAN/Wi-Fi Status
- Wi-Fi Direct Status
- Print Status Sheet

**Connection Check:**
Checks the current network connection and prints a report. If there are any problems with the connection, see the report to solve the problem.

**Advanced:**
Make the following detailed settings.
- Device Name
- TCP/IP
- Proxy Server
- IPv6 Address
- Link Speed & Duplex

Menu Options for Supply Status
Select the menu on the control panel as described below.

Settings > Supply Status

Displays the approximate level of the ink and service life of the maintenance box.
When the ! mark is displayed, ink is running low or the maintenance box is nearly full. When the X mark is displayed, you need to replace the item as ink is expended or the maintenance box is full.
You can replace ink cartridges or print supply status information from this screen.

Menu Options for Maintenance
Select the menus on the control panel as described below.

Settings > Maintenance

Print Head Nozzle Check:
Select this feature to check if the print head nozzles are clogged. The printer prints a nozzle check pattern.

Print Head Cleaning:
Select this feature to clean clogged nozzles in the print head.
Preparing the Printer

Print Head Alignment:
Use this feature to adjust the print head to improve print quality.

- Ruled Line Alignment
  Select this feature to align vertical lines.

- Vertical Alignment
  Select this feature if your printouts look blurry or text and lines are misaligned.

- Horizontal Alignment
  Select this feature if horizontal banding appears at regular intervals in your printouts.

Ink Cartridge Replacement:
Use this feature to replace the ink cartridges before the ink is expended.

Paper Guide Cleaning:
Select this feature if there are ink stains on the internal rollers. The printer feeds paper to clean the internal rollers.

Menu Options for Print Status Sheet
Select the menus on the control panel as described below.

Settings > Print Status Sheet

- Configuration Status Sheet:
  Print information sheets showing the current printer status and settings.

- Supply Status Sheet:
  Print information sheets showing the status of consumables.

- Usage History Sheet:
  Print information sheets showing the usage history of the printer.

Menu Options for Print Counter
Select the menus on the control panel as described below.

Settings > Print Counter
Displays the total number of prints, B&W prints, and color prints from the time you purchased the printer.
Menu Options for User Settings

Select the menus on the control panel as described below.

Settings > User Settings

You can change the default settings of the following menus.

- Copy
- Scan to Computer
- Scan to Cloud
- Fax

Menu Options for Restore Default Settings

Select the menus on the control panel as described below.

Settings > Restore Default Settings

Resets the following menus to their defaults.

- Network Settings
- Copy Settings
- Scan Settings
- Fax Settings
- Clear All Data and Settings

Menu Options for Firmware Update

Select the menus on the control panel as described below.

Settings > Firmware Update

Update:

Check if the latest version of the firmware has been uploaded to the network server. If an update is available, you can select whether or not to start updating.

Notification:

Select On to receive a notification if a firmware update is available.

Saving Power

The printer enters sleep mode or turns off automatically if no operations are performed for a set period. You can adjust the time before power management is applied. Any increase will affect the product’s energy efficiency. Please consider the environment before making any change.
Depending on the location of purchase, the printer may have a feature that turns it off automatically if it is not connected to the network for 30 minutes.

**Saving Power - Control Panel**

1. Select **Settings** on the home screen.

2. Select **General Settings > Basic Settings**.

3. Do one of the following.
   - Select **Sleep Timer** or **Power Off Settings > Power Off If Inactive** or **Power Off If Disconnected**, and then make settings.
   - Select **Sleep Timer** or **Power Off Timer**, and then make settings.

**Note:**

*Your product may have the Power Off Settings or Power Off Timer feature depending on the location of purchase.*
Printing

Printing from the Printer Driver on Windows

Accessing the Printer Driver

When accessing the printer driver from the computer's control panel, the settings are applied to all of the applications.

Accessing the printer driver from the control panel

- **Windows 10/Windows Server 2016**
  Right-click the start button or press and hold it, and then select Control Panel > View devices and printers in Hardware and Sound. Right-click on your printer, or press and hold it and then select Printing preferences.

  Select Desktop > Settings > Control Panel > View devices and printers in Hardware and Sound. Right-click on your printer, or press and hold it and then select Printing preferences.

- **Windows 7/Windows Server 2008 R2**
  Click the start button, and select Control Panel > View devices and printers in Hardware and Sound. Right-click on your printer and select Printing preferences.

- **Windows Vista/Windows Server 2008**
  Click the start button, and select Control Panel > Printers in Hardware and Sound. Right-click on your printer and select Select printing preferences.

- **Windows XP/Windows Server 2003 R2/Windows Server 2003**
  Click the start button, and select Control Panel > Printers and Other Hardware > Printers and Faxes. Right-click on your printer and select Printing preferences.

Accessing the printer driver from the printer icon on the task bar

The printer icon on the desktop task bar is a shortcut icon allowing you to quickly access the printer driver.

If you click the printer icon and select Printer Settings, you can access the same printer settings window as the one displayed from the control panel. If you double-click this icon, you can check the status of the printer.

**Note:**
If the printer icon is not displayed on the task bar, access the printer driver window, click Monitoring Preferences on the Maintenance tab, and then select Register the shortcut icon to the taskbar.

Printing Basics

**Note:**
Operations may differ depending on the application. See the application's help for details.

1. Open the file you want to print.
   - Load paper in the printer if it has not already been loaded.
2. Select **Print** or **Page Setup** from the **File** menu.

3. Select your printer.

4. Select **Preferences** or **Properties** to access the printer driver window.

5. Change the settings as necessary.

   See the menu options for the printer driver for details.

   **Note:**
   - You can also see the online help for explanations of the setting items. Right-clicking an item displays **Help**.
   - When you select **Print Preview**, you can see a preview of your document before printing.

6. Click **OK** to close the printer driver window.

7. Click **Print**.

   **Note:**
   When you select **Print Preview**, a preview window is displayed. To change the settings, click **Cancel**, and then repeat the procedure from step 2.

**Related Information**
- “Available Paper and Capacities” on page 43
- “Loading Paper in the Paper Cassette” on page 45
- “List of Paper Type” on page 48
- “Main Tab” on page 80
Printing on 2-Sides

You can print on both sides of the paper. You can also print a booklet that can be created by re-ordering the pages and folding the printout.

Note:
- This feature is not available for borderless printing.
- You can use automatic and manual 2-sided printing. During manual 2-sided printing, flip the paper over to print on the other side when the printer has finished printing the first side.
- If you do not use paper that is suitable for 2-sided printing, the print quality may decline and paper jams may occur.
- Depending on the paper and the data, ink may bleed through to the other side of the paper.

Related Information
- “Available Paper and Capacities” on page 43

Print Settings

Manual 2-sided printing is available when EPSON Status Monitor 3 is enabled. However, it may not be available when the printer is accessed over a network or is used as a shared printer.

Note:
To enable EPSON Status Monitor 3, click Extended Settings on the Maintenance tab, and then select Enable EPSON Status Monitor 3.

1. On the printer driver's Main tab, select an option from 2-Sided Printing.
2. Click Settings, make the appropriate settings, and then click OK.
   Make settings for Print Density if necessary. This setting is not available when you select manual 2-sided printing.
   
   Note:
   - To print a folded booklet, select Booklet.
   - When setting Print Density, you can adjust print density according to the document type.
   - Printing may be slow depending on the combination of options selected for Select Document Type in the Print Density Adjustment window and for Quality on the Main tab.
3. Click Print.
   For manual 2-sided printing, when the first side has finished printing, a pop-up window is displayed on the computer. Follow the on-screen instructions.

**Printing Several Pages on One Sheet**

You can print two or four pages of data on a single sheet of paper.

**Print Settings**

On the printer driver’s Main tab, select 2-Up or 4-Up as the Multi-Page setting.

**Note:**
*This feature is not available for borderless printing.*

**Related Information**
- “Printing Basics” on page 64
- “Main Tab” on page 80
Printing and Stacking in Page Order (Reverse Order Printing)

You can print from the last page so that the documents are stacked in page order.

Print Settings

On the printer driver's Main tab, select Reverse Order.

Related Information

➤ “Printing Basics” on page 64
➤ “Main Tab” on page 80

Printing a Reduced or Enlarged Document

You can reduce or enlarge the size of a document by a specific percentage or to fit the paper size you loaded in the printer.

Print Settings

On the printer driver’s More Options tab, select the document size from the Document Size setting. Select the paper size you want to print on from the Output Paper setting. Select Reduce/Enlarge Document, and then select Fit to Page or Zoom to. When you select Zoom to, enter a percentage.

Select Center to print the images in the center of the page.
Printing One Image on Multiple Sheets for Enlargement (Creating a Poster)

This feature allows you to print one image on multiple sheets of paper. You can create a larger poster by taping them together.

Note: This feature is not available for borderless printing.

Print Settings

On the printer driver’s Main tab, select 2x1 Poster, 2x2 Poster, 3x3 Poster, or 4x4 Poster as the Multi-Page setting. If you click Settings, you can select the panels that you do not want to print. You can also select the cutting guide options.

Note: This feature is not available for borderless printing.

⇒ “More Options Tab” on page 81
Making Posters Using Overlapping Alignment Marks

Here is an example of how to make a poster when 2x2 Poster is selected, and Overlapping Alignment Marks is selected in Print Cutting Guides.

1. Prepare Sheet 1 and Sheet 2. Cut off the margins of Sheet 1 along the vertical blue line through the center of the top and bottom cross marks.
2. Place the edge of Sheet 1 on top of Sheet 2 and align the cross marks, then temporarily tape the two sheets together from the back.

3. Cut the taped sheets in two along the vertical red line through the alignment markers (this time, the line to the left of the cross marks).
4. Tape the sheets together from the back.

5. Repeat steps 1 to 4 to tape Sheet 3 and Sheet 4 together.

6. Cut off the margins of Sheet 1 and Sheet 2 along the horizontal blue line through the center of the left and right side cross marks.
7. Place the edge of Sheet 1 and Sheet 2 on top of Sheet 3 and Sheet 4 and align the cross marks, and then temporarily tape them together from the back.
8. Cut the taped sheets in two along the horizontal red line through the alignment markers (this time, the line above the cross marks).

9. Tape the sheets together from the back.
10. Cut off the remaining margins along the outer guide.

**Printing with a Header and Footer**

You can print information such as a user name and printing date in headers or footers.

**Print Settings**

On the printer driver’s More Options tab, click Watermark Features, and then select Header/Footer. Click Settings, and then select the items you want to print.
Printing a Watermark

You can print a watermark such as "Confidential" or an anti-copy pattern on your printouts. If you print with an anti-copy pattern, the hidden letters appear when photocopied in order to distinguish the original from the copies.

The anti-copy pattern is available in the following conditions:

- Paper: Plain paper, Copy paper
- Borderless: Not selected
- Quality: Standard
- Automatic 2-sided printing: Not selected
- Color Correction: Automatic

*Note:
You can also add your own watermark or anti-copy pattern.

Print Settings

On the printer driver's More Options tab, click Watermark Features, and then select Anti-Copy Pattern or Watermark. Click Settings to change details such as the size, density, or position of the pattern or the mark.

Related Information

- “Printing Basics” on page 64

Printing Multiple Files Together

Job Arranger Lite allows you to combine several files created by different applications and print them as a single print job. You can specify the print settings for combined files, such as multi-page layout, and 2-sided printing.

Print Settings

On the printer driver’s Main tab, select Job Arranger Lite. When you start printing, the Job Arranger Lite window is displayed. With the Job Arranger Lite window opened, open the file that you want to combine with the current file, and then repeat the above steps.

When you select a print job added to Print Project in the Job Arranger Lite window, you can edit the page layout. Click Print from the File menu to start printing.

Note:
If you close the Job Arranger Lite window before adding all the print data to the Print Project, the print job you are currently working on is canceled. Click Save from the File menu to save the current job. The extension of the saved files is “ecl”.

To open a Print Project, click Job Arranger Lite on the printer driver’s Maintenance tab to open the Job Arranger Lite window. Next, select Open from the File menu to select the file.

Printing Using the Color Universal Print Feature

You can enhance the visibility of texts and images in printouts.

Color Universal Print is only available when the following settings are selected.

- Paper Type: Plain paper
- Quality: Standard or a higher quality
- Print Color: Color
- Applications: Microsoft® Office 2007 or later
Print Settings

On the printer driver’s More Options tab, click Image Options in the Color Correction setting. Select an option from the Color Universal Print setting. Click Enhancement Options to make further settings.

Note:
- Certain characters may be altered by patterns, such as “±” appearing as “±”.
- Application-specific patterns and underlines may alter content printed using these settings.
- Print quality may decrease in photos and other images when using Color Universal Print settings.
- Printing is slower when using Color Universal Print settings.

Related Information
- “Printing Basics” on page 64
- “More Options Tab” on page 81

Adjusting the Print Color

You can adjust the colors used in the print job.

Note:
These adjustments are not applied to the original data.

Print Settings

On the printer driver’s More Options tab, select Custom as the Color Correction setting. Click Advanced to open the Color Correction window, and then select the method of color correction.

Note:
- Automatic is selected as default on the More Options tab. With this setting, the colors are automatically adjusted to match the paper type and print quality settings.
- PhotoEnhance on the Color Correction window adjusts the color by analyzing the location of the subject. Therefore, if you have changed the location of the subject by reducing, enlarging, cropping, or rotating the image, the color may change unexpectedly. Selecting the borderless setting also changes the location of the subject resulting in changes in color. If the image is out of focus, the tone may be unnatural. If the color is changed or becomes unnatural, print in a mode other than PhotoEnhance.

Related Information
- “Printing Basics” on page 64
- “More Options Tab” on page 81
Printing to Emphasize Thin Lines

You can thicken thin lines that are too thin to print.

Print Settings

On the printer driver’s More Options tab, click Image Options in the Color Correction setting. Select Emphasize Thin Lines.

Related Information

➤ “Printing Basics” on page 64
➤ “More Options Tab” on page 81

Printing Clear Bar Codes

You can print a bar code clearly and make it easy to scan. Only enable this feature if the bar code you printed cannot be scanned.

You can use this feature under the following conditions.

- Paper: Plain paper, Copy paper, or Envelope
- Quality: Standard, Standard-Vivid

  The print quality may be changed when printing. The print speed may become slower and print density may become higher.

Note:
Deblurring may not always be possible depending on the circumstances.

Print Settings

On the printer driver’s Maintenance tab, click Extended Settings, and then select Barcode mode.
Canceling Printing

You can cancel a print job from the computer. However, you cannot cancel a print job from the computer once it has been completely sent to the printer. In this case, cancel the print job by using the printer's control panel.

Canceling

On your computer, right-click on your printer in Devices and Printers, Printer, or in Printers and Faxes. Click See what's printing, right-click on the job you want to cancel, and then select Cancel.

Menu Options for the Printer Driver

Open the print window in an application, select the printer, and then access the printer driver window.

*Note:*
Menus vary depending on the option you selected.

### Printing from the Printer Driver on Mac OS

#### Printing Basics

**Note:**
*Operations differ depending on the application. See the application’s help for details.*

1. Open the file you want to print.
   Load paper in the printer if it has not already been loaded.

2. Select **Print** from the **File** menu or another command to access the print dialog.
   If necessary, click **Show Details** to expand the print window.

3. Select your printer.
4. Select **Print Settings** from the pop-up menu.

![Print Settings](image)

**Note:**
On OS X Mountain Lion or later, if the **Print Settings** menu is not displayed, the Epson printer driver has not been installed correctly.

Select **System Preferences** from the **menu > Printers & Scanners** (or **Print & Scan, Print & Fax**), remove the printer, and then add the printer again. See the following to add a printer.

[http://epson.sn](http://epson.sn)

5. Change the settings as necessary.
   
   See the menu options for the printer driver for details.

6. Click **Print**.

**Related Information**

- “Available Paper and Capacities” on page 43
- “Loading Paper in the Paper Cassette” on page 45
- “List of Paper Type” on page 48
- “Menu Options for Print Settings” on page 88
Printing on 2-Sides

You can print on both sides of the paper.

Note:
- This feature is not available for borderless printing.
- If you do not use paper that is suitable for 2-sided printing, the print quality may decline and paper jams may occur.
- Depending on the paper and the data, ink may bleed through to the other side of the paper.

Related Information
⇒ “Available Paper and Capacities” on page 43

Print Settings

Select Two-sided Printing Settings from the pop-up menu. Select the method of 2-sided printing, and then make the Document Type settings.

Note:
- Printing speed may be reduced depending on the document type.
- When printing photos with dense data, select Text & Graphics or Text & Photos in the Document Type setting. If the printouts are smeared or ink bleeds through to the other side of the paper, adjust the Print Density and Increased Ink Drying Time in Adjustments.

Related Information
⇒ “Printing Basics” on page 82
⇒ “Menu Options for Two-sided Printing Settings” on page 89
Printing Several Pages on One Sheet

You can print two or four pages of data on a single sheet of paper.

Print Settings

Select Layout from the pop-up menu. Set the number of pages in Pages per Sheet, the Layout Direction (page order), and Border.

Related Information
- “Printing Basics” on page 82
- “Menu Options for Layout” on page 88

Printing and Stacking in Page Order (Reverse Order Printing)

You can print from the last page so that the documents are stacked in page order.

Print Settings

Select Paper Handling from the pop-up menu. Select Reverse as the Page Order setting.

Related Information
- “Printing Basics” on page 82
Printing a Reduced or Enlarged Document

You can reduce or enlarge the size of a document by a specific percentage or to fit the paper size you loaded in the printer.

Print Settings

When printing to fit to the paper size, select Paper Handling from the pop-up menu, and then select Scale to fit paper size. Select the paper size you loaded in the printer in Destination Paper Size. When reducing the size of the document, select Scale down only.

When printing at a specific percentage, do one of the following.

- Select Print from the File menu of the application. Select Printer, enter a percentage in Scale, and then click Print.
- Select Page Setup from the File menu of the application. Select your printer in Format For, enter a percentage in Scale, and then click OK.

Note:
Select the paper size you set in the application as the Paper Size setting.

Related Information

- “Printing Basics” on page 82
- “Menu Options for Paper Handling” on page 88
**Adjusting the Print Color**

You can adjust the colors used in the print job.

**Note:**
*These adjustments are not applied to the original data.*

**Print Settings**

Select **Color Matching** from the pop-up menu, and then select **EPSON Color Controls**. Select **Color Options** from the pop-up menu, and then select one of the available options. Click the arrow next to **Advanced Settings**, and then make more detailed settings.

**Related Information**

- “Printing Basics” on page 82
- “Menu Options for Color Matching” on page 88
- “Menu Options for Color Options” on page 89

**Canceling Printing**

You can cancel a print job from the computer. However, you cannot cancel a print job from the computer once it has been completely sent to the printer. In this case, cancel the print job by using the printer’s control panel.

**Canceling**

Click the printer icon in the **Dock**. Select the job you want to cancel, and then do one of the following.

- **OS X Mountain Lion or later**
  
  Click \(\times\) next to the progress meter.

- **Mac OS X v10.6.8 to v10.7.x**

  Click **Delete**.

**Menu Options for the Printer Driver**

Open the print window in an application, select the printer, and then access the printer driver window.

**Note:**
*Menus vary depending on the option you selected.*

Menu Options for Two-sided Printing Settings

| Two-sided Printing | Prints on both sides of the paper. |

Making Operation Settings for the Mac OS Printer Driver

Accessing the Operation Settings Window of the Mac OS Printer Driver

Select System Preferences from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer. Click Options & Supplies > Options (or Driver).

Operation Settings of the Mac OS Printer Driver

- Skip Blank Page: Avoids printing blank pages.
- Quiet Mode: Prints quietly. However, the print speed may be slower.
- Permit temporary black printing: Prints only with black ink temporarily.
- High Speed Printing: Prints when the print head moves in both directions. The print speed is faster, but the quality may decline.
- Output documents for filing: Feed the paper so that it is easy to file when printing landscape data or 2-sided printing. Envelope printing is not supported.
- Remove white borders: Removes unnecessary margins during borderless printing.
- Warning Notifications: Allows the printer driver to display warning notifications.
- Establish bidirectional communication: Usually, this should be set to On. Select Off when acquiring the printer information is impossible because the printer is shared with Windows computers on a network or for any other reason.
Printing from Smart Devices

Using Epson iPrint

Epson iPrint is an application that allows you to print photos, documents, and web pages from a smart device such as a smartphone or tablet. You can use local print, printing from a smart device that is connected to the same wireless network as your printer, or remote print, printing from a remote location over the Internet. To use remote print, register your printer in the Epson Connect service.

Related Information

⇒ “Printing Using a Network Service” on page 179

Installing Epson iPrint

You can install Epson iPrint on your smart device from the following URL or QR code.

http://ipr.to/c

Printing Using Epson iPrint

Start Epson iPrint from your smart device and select the item you want to use from the home screen.
The following screens are subject to change without notice. The contents may vary depending on the product.

1. Home screen displayed when the application is started.
2. Displays information on how to setup the printer and a FAQ.
3. Displays the screen where you can select the printer and make printer settings. Once you have selected the printer, you do not need to select it again from the next time.
4. Select what you want to print such as photos and documents.
5. Displays the screen to make print settings such as paper size and paper type.
6. Displays the paper size. When this is displayed as a button, press it to display the paper settings currently set on the printer.
7. Displays photos and documents you selected.
8. Starts printing.

Note:
To print from the document menu using iPhone, iPad, and iPod touch running iOS, start Epson iPrint after transferring the document you want to print using the file sharing function in iTunes.

Printing by Touching Smart Devices to the NFC Tag

You can connect the printer and your smart device automatically and print by touching the NFC antenna of a smart device running Android 4.0 or later and that supports NFC (Near Field Communication) to the printer’s NFC tag.

The location of the NFC antenna varies depending on the smart device. See the documentation provided with your smart device for more details.
**Important:**

- Make sure that the Wi-Fi Direct (Simple AP) connection setting is enabled.
- Enable the NFC function on your smart device.
- Make sure that Epson iPrint is installed on your smart device. If not, touch the NFC antenna of the smart device to the printer’s NFC tag and install it.

**Note:**

- If the printer does not communicate with the smart device even after touching it to the tag, try adjusting the position of the smart device and touch it to the tag again.
- If there are obstacles such as metal between the printer’s NFC tag and the NFC antenna of the smart device, the printer may not be able to communicate with the smart device.
- This feature uses a Wi-Fi Direct (Simple AP) connection to connect to the printer. You can connect up to four devices to the printer at the same time.
- If you have changed the password for the Wi-Fi Direct (Simple AP) connection, you cannot use this feature. Restore the initial password to use this feature.

1. Load paper in the printer.
2. Touch the NFC antenna of your smart device to the printer’s NFC tag.

Epson iPrint starts.

3. On the Epson iPrint home screen, touch the NFC antenna of your smart device to the printer’s NFC tag again.
   The printer and the smart device are connected.
4. Select the image you want to print, and then select **Next** at the top right of the screen.
5. Touch the NFC antenna of your smart device to the printer’s NFC tag again.
   Printing starts.

**Using Epson Print Enabler**

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover an Epson printer that is connected to the same wireless network.

1. Load paper in the printer.
2. Set up your printer for wireless printing.
3. On your Android device, install the Epson Print Enabler plug-in from Google Play.

4. Connect your Android device to the same wireless network as your printer.

5. Go to Settings on your Android device, select Printing, and then enable Epson Print Enabler.

6. From an Android application such as Chrome, tap the menu icon and print whatever is on the screen.

   Note:
   If you do not see your printer, tap All Printers and select your printer.

➔ “Connecting to a Smart Device” on page 24

Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, and iPod touch with the latest version of iOS, and Mac with the latest version of OS X or macOS.

Note:
If you disabled paper configuration messages on your product control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

1. Load paper in your product.

2. Set up your product for wireless printing. See the link below.
   http://epson.sn

3. Connect your Apple device to the same wireless network that your product is using.

4. Print from your device to your product.

   Note:
   For details, see the AirPrint page on the Apple website.

Canceling the Ongoing Job

Tap \( \text{Cancel} \) on the printer’s control panel to cancel the print job in progress.
Copying Basics

This section explains the steps for basic copying.

1. Place the originals.
   If you want to copy multiple originals, place all of the originals on the ADF.

2. Select Copy on the home screen.

3. Check the settings on the Copy tab.
   Select the setting item to change it as necessary.
   
   Note:
   - If you select Advanced Settings tab, you can make settings such as Multi-Page or Quality.
   - If the combination of settings you require is not available, is displayed. Select the icon to check the details, and then change the settings.

4. Enter the number of copies.

5. Tap

Related Information

- “Basic Menu Options for Copying” on page 96
- “Advanced Menu Options for Copying” on page 96
- “Basic Screen Configuration” on page 17

Copying on 2-Sides

You can copy multiple originals on both sides of the paper.

1. Select Copy on the home screen.

2. Select Copy tab > , and then select 1→2-Sided.
   You can also specify the orientation of the original and the binding position of the copy result.

3. Tap

Related Information
- “Copying Basics” on page 95
Copying

Copying Multiple Originals onto One Sheet

You can copy two originals onto a single sheet of paper.

1. Select Copy on the home screen.

2. Select Advanced Settings tab > Multi-Page, and select 2-up.
   You can also specify the layout order and orientation of the original.

3. Select Copy tab, and then tap ◎.

Related Information
⇒ “Copying Basics” on page 95

Basic Menu Options for Copying

Note:
The items may not be available depending on other settings you made.

B&W:  
Copies the original in black and white (monochrome).

Color:  
Copies the original in color.

(2-Sided) :
Select 2-sided layout.
✓ 1→1-Sided  
Copies one side of an original onto a single side of paper.
✓ 1→2-Sided  
Copies two single-sided originals onto both sides of a single sheet of paper. Select the orientation of your original and the binding position of the paper.

(Density) :
Increase the level of density when the copying results are faint. Decrease the level of density when ink smears.

Advanced Menu Options for Copying

Note:
The items may not be available depending on other settings you made.
Copying

Paper Setting:
Select paper size and paper type.

Reduce/Enlarge:
Configures the magnification ratio of the enlargement or reduction. If you want to reduce or enlarge the original by a specific percentage, select the value, and then enter a percentage within a range of 25 to 400%.

- Actual Size
  Copies at 100% magnification.

- A4→A5 and others
  Automatically enlarges or reduces the original to fit to a specific paper size.

- Auto Fit Page
  Detects the scan area and automatically enlarges or reduces the original to fit to the paper size you selected. When there are white margins around the original, the white margins from the corner mark of the scanner glass are detected as the scan area, but the margins at the opposite side may be cropped.

Original Size:
Select the size of your original. When copying non-standard size originals, select the size closest to your original.

Multi-Page:
- Single Page
  Copies a single-sided original onto a single sheet.

- 2-up
  Copies two single-sided originals onto a single sheet in 2-up layout. Select the layout order and the orientation of your original.

Quality:
Select the print quality. **Best** provides higher quality printing, but the printing speed may be slower.

Original Orientation:
Select the orientation of your original.
Copying

Remove Shadow:
Removes shadows that appear around copies when copying thick paper or that appear in the center of copies when copying a booklet.

Remove Punch Holes:
Removes the binding holes when copying.

ID Card Copy:
Scans both sides of an ID card and copies onto one side of A4 size paper.

Borderless Copy:
Copies without margins around the edges. The image is enlarged a little to remove margins from the edges of the paper. Select how much to enlarge in the Expansion setting.

Clear All Settings:
Resets the copy settings to their defaults.
Scanning

Scanning Using the Control Panel

You can send scanned images from the printer’s control panel to the following destinations.

Computer
You can save the scanned image to a computer connected to the printer. Before scanning, install Epson Scan 2 and Epson Event Manager on your computer.

Cloud
You can send scanned images to cloud services. Before scanning, make settings on the Epson Connect.

Computer (WSD)
You can save the scanned image to a computer connected to the printer, using WSD feature. If you are using the Windows 7/Windows Vista, you need to make WSD settings on your computer before scanning.

Related Information
- “Scanning to a Computer (Event Manager)” on page 99
- “Scanning to the Cloud” on page 103
- “Scanning to a Computer (WSD)” on page 105

Scanning to a Computer (Event Manager)

Note:
Before scanning, install Epson Scan 2 and Epson Event Manager on your computer.

1. Place the originals.

2. Select Scan on the home screen.

3. Select Computer.

4. Select + to select the computer to which you want to save the scanned images.

Note:
- When the printer is connected to a network, you can select the computer to which you want to save the scanned image. You can display up to 20 computers on the printer’s control panel. If you set Network Scan Name (Alphanumeric) on Epson Event Manager, it is displayed on the control panel.

5. Select ✉️ to select how to save the scanned image to a computer.

- Save as JPEG: Saves the scanned image in JPEG format.
- Save as PDF: Saves the scanned image in PDF format.
- Attach to e-mail: Starts the email client on your computer, and then automatically attaches it to an email.
Follow custom setting: Saves the scanned image using the settings on the Epson Event Manager. You can change the scan settings such as the scanning size, folder to save to, or save format.

6. Tap ◇.

Related Information
- “Placing Originals” on page 49

Making Custom Settings in Epson Event Manager

You can set the scan settings for Follow custom setting in Epson Event Manager. See the Epson Event Manager help for details.

1. Start Epson Event Manager.

2. Make sure that your scanner is selected as the Scanner on the Button Settings tab on the main screen.
3. Click **Make Job Settings**.
4. Make scan settings on the **Job Settings** screen.

- **Edit Job Settings**: Select **Custom Action**.
- **Setting**: Scan using the best settings for the selected type of original. Click **Detailed Settings for Scanning** to set the items such as the resolution or the color for saving the scanned image.
- **Target Folder**: Select the save folder for the scanned image.
- **Filename (Prefix + Start Number)**: Change the settings for the file name you want to save.
- **File Format**: Select the save format.
- **Launch Action**: Select the action when scanning.
- **Test Settings**: Starts test scanning using current settings.

5. Click **OK** to return to the main screen.
6. Make sure that the **Custom Action** is selected on the **Custom Action** list.

7. Click **Close** to close Epson Event Manager.

### Scanning to the Cloud

You can send scanned images to cloud services. Before using this feature, make settings using Epson Connect. See the following Epson Connect portal website for details.

https://www.epsonconnect.com/

http://www.epsonconnect.eu (Europe only)

1. Make sure that you have made settings using Epson Connect.

2. Place the originals.

3. Select **Scan** on the home screen.

4. Select **Cloud**.

5. Select **+** on the top of the screen, and then select a destination.

6. Set items on **Scan** tab, such as the save format.

7. Select **Advanced Settings** tab, and then check settings, and change them if necessary.

8. Select **Scan** tab, and then tap ✖️.
Related Information

“Placing Originals” on page 49

Basic Menu Options for Scanning to the Cloud

Note:
The items may not be available depending on other settings you made.

B&W/Color:
Select whether to scan in color or in monochrome.

JPEG/PDF:
Select the format in which to save the scanned image.

Advanced Menu Options for Scanning to the Cloud

Note:
The items may not be available depending on other settings you made.

Scan Area:

- Scan Size:
  Select the scan size. To crop the white space around the text or image when scanning, select Auto Cropping. To scan at the maximum area of the scanner glass, select Max Area.

- Original Orientation:
  Select the orientation of the original.

Original Type:
Select the type of your original.

Density:
Select the contrast of the scanned image.

Remove Shadow:
Remove the shadows of the original that appear in the scanned image.

- Surround:
  Remove the shadows at the edge of the original.

- Center:
  Remove the shadows of the binding margin of the booklet.

Remove Punch Holes:
Remove the punch holes that appear in the scanned image. You can specify the area to erase the punch holes by entering a value in the box on the right.

- Erasing Position:
  Select the position to remove the punch holes.
Scanning

Original Orientation:
Select the orientation of the original.

Clear All Settings
Resets the scan settings to their defaults.

Scanning to a Computer (WSD)

Note:
- This feature is only available for computers running Windows 10/Windows 8.1/Windows 8/Windows 7/Windows Vista.
- If you are using Windows 7/Windows Vista, you need to setup your computer in advance using this feature.

1. Place the originals.
2. Select Scan on the home screen.
4. Select a computer.
5. Tap ✗.

Setting Up a WSD Port

This section explains how to set up a WSD port for Windows 7/Windows Vista.

Note:
For Windows 10/Windows 8.1/Windows 8, the WSD port is set up automatically.

The following is necessary to set up a WSD port.
- The printer and the computer are connected to the network.
- The printer driver is installed on the computer.
1. Turn the printer on.
2. Click start, and then click Network on the computer.
3. Right-click the printer, and then click Install.
   Click Continue when the User Account Control screen is displayed.
Click **Uninstall** and start again if the **Uninstall** screen is displayed.

![Uninstall screen](image)

**Note:**
The printer name you set on the network and model name (EPSON XXXXXX (XX-XXXX)) are displayed on the network screen. You can check the printer’s name set on the network from the printer’s control panel or by printing a network status sheet.

4. Click **Your device is ready to use**.

![Device ready to use](image)

5. Check the message, and then click **Close**.

![Close button](image)

6. Open the **Devices and Printers** screen.
   - **Windows 7**
     - Click start > Control Panel > Hardware and Sound (or Hardware) > Devices and Printers.
7. Check that an icon with the printer’s name on the network is displayed.
   Select the printer name when using with WSD.

---

## Scanning from a Computer

### Scanning Using Epson Scan 2

You can scan by using the scanner driver "Epson Scan 2". See the Epson Scan 2 help for an explanation of each setting item.

**Related Information**

- “Placing Originals” on page 49
- “Application for Scanning Documents and Images (Epson Scan 2)” on page 169

### Scanning Documents (Document Mode)

Using **Document Mode** in Epson Scan 2, you can scan originals using detailed settings that are suitable for text documents.

1. Place the originals.
   
   **Note:**
   If you want to scan multiple originals, place them into the ADF.

2. Start Epson Scan 2.

3. Select **Document Mode** from the **Mode** list.
4. Make the following settings on the **Main Settings** tab.

![Epson Scan 2 interface](image)

- Document Source: Select the source where the original is placed.
- Document Size: Select the size of the original you placed.
- (Original orientation) buttons: Select the set orientation of the original you placed. Depending on the size of the original, this item may be set automatically and cannot be changed.
- Image Type: Select the color for saving the scanned image.
- Resolution: Select the resolution.

5. Make other scan settings if necessary.

- You can preview the scanned image by clicking the **Preview** button. The preview window opens, and the previewed image is displayed.
  - When you performed preview using ADF, original is ejected from the ADF. Place the ejected original again.
On the Advanced Settings tab, you can make detailed image adjustment settings that are suitable for text documents, such as the following.

- Remove Background: Remove the background of the originals.
- Text Enhancement: You can make blurred letters in the original clear and sharp.
- Auto Area Segmentation: You can make letters clear and images smooth when performing black and white scanning for a document that contains images.
- Color Enhance: You can enhance the color specified for the scanned image, and then save it in grayscale or black and white.
- Brightness: You can adjust the brightness for the scanned image.
- Contrast: You can adjust the contrast for the scanned image.
- Gamma: You can adjust the gamma (brightness of the intermediate range) for the scanned image.
- Threshold: You can adjust the border for monochrome binary (black and white).
- Unsharp Mask: You can enhance and sharpen the outlines of the image.
- Descreening: You can remove moiré patterns (web-like shadows) that appear when scanning printed papers such as a magazine.
- Edge Fill: You can remove the shadow created around the scanned image.
- Dual Image Output (Windows Only): You can scan once and save two images with different output settings at the same time.

Note:
The items may not be available depending on other settings you made.
6. Set the file saving settings.

- **Image Format**: Select the save format from the list.
  You can make detailed settings for each save format except BITMAP and PNG. Select **Options** from the list after selecting the save format.

- **File Name**: Confirm the save file name displayed.
  You can change settings for the file name by selecting **Settings** from the list.

- **Folder**: Select the save folder for the scanned image from the list.
  You can select another folder or create a new folder by selecting **Select** from the list.

7. Click **Scan**.

**Scanning Photos or Pictures (Photo Mode)**

Using **Photo Mode** in Epson Scan 2, you can scan originals with wide variety of image adjustment features that are suitable for photos or pictures.

1. Place the originals.

   By placing multiple originals on the scanner glass, you can scan them all at the same time. Make sure there is a gap of at least 20 mm between the originals.

   **Note:**
   You cannot use ADF when scanning from **Photo Mode**.
2. Start Epson Scan 2.

3. Select **Photo Mode** from the **Mode** list.

4. Make the following settings on the **Main Settings** tab.

   - **Image Type**: Select the color for saving the scanned image.
   - **Resolution**: Select the resolution.

**Note:**
*The Document Source setting is fixed as Scanner Glass, and the Document Type setting is fixed as Reflective. (Reflective means originals which are not transparent, for example ordinary papers or photos.)* You cannot change these settings.
5. **Click Preview.**

The preview window opens, and the previewed images are displayed as thumbnails.

![Preview Window](image)

**Note:**

To preview the entire scanned area, clear the **Thumbnail** check box at the top of the preview widow.

6. Confirm the preview, and make image adjustment settings on the **Advanced Settings** tab if necessary.

![Advanced Settings](image)
You can adjust the scanned image using detailed settings that are suitable for photos or pictures, such as the following.

- **Brightness:** You can adjust the brightness for the scanned image.
- **Contrast:** You can adjust the contrast for the scanned image.
- **Saturation:** You can adjust the saturation (color vividness) for the scanned image.
- **Unsharp Mask:** You can enhance and sharpen the outlines of the scanned image.
- **Color Restoration:** You can correct images that have faded to return them to their original colors.
- **Backlight Correction:** You can lighten scanned images that are dark due to backlight.
- **Descreening:** You can remove moiré patterns (web-like shadows) that appear when scanning printed papers such as a magazine.
- **Dust Removal:** You can remove dust on the scanned image.

**Note:**

- The items may not be available depending on other settings you made.
- Depending on the original, the scanned image may not be adjusted correctly.
- When multiple thumbnails are created, you can adjust the image quality for each thumbnail. Depending on the adjustment items, you can adjust the quality of scanned images all together by selecting multiple thumbnails.

7. Set the file saving settings.

- **Image Format:** Select the save format from the list.
  You can make detailed settings for each save format except BITMAP and PNG. Select **Options** from the list after selecting the save format.
- **File Name:** Confirm the save file name displayed.
  You can change settings for the file name by selecting **Settings** from the list.
Folder: Select the save folder for the scanned image from the list.
You can select another folder or create a new folder by selecting Select from the list.

8. Click Scan.

Scanning from Smart Devices

Epson iPrint is an application that allows you to scan photos and documents from a smart device, such as a smartphone or tablet, that is connected to the same wireless network as your printer. You can save the scanned data on a smart device or to Cloud services, send it by email, or print it.

Installing Epson iPrint

You can install Epson iPrint on your smart device from the following URL or QR code.

http://ipr.to/c

Scanning by Touching Smart Devices to the NFC Tag

Even if your smart device does not make any settings to use the printer, you can automatically connect it and scan by touching the NFC antenna of a smart device to the printer’s NFC Tag.

Make sure that you prepare the followings to use this feature.

- Enable the NFC function on your smart device.
- Epson iPrint is installed on your smart device. If not, touch the NFC tag antenna of the smart device to the printer’s NFC Tag to install it.

Note:

- Android 4.0 or later supports NFC (Near Field Communication)
- The location of the NFC antenna varies depending on the smart device. See the documentation provided with your smart device for more details.
- The printer may not be able to communicate with the smart device when there are obstacles such as metal between the printer’s NFC Tag and the NFC antenna of the smart device.

1. Place the originals in the printer.
2. Touch the NFC antenna of your smart device to the printer's NFC Tag.

Epson iPrint starts.

3. Select the scan menu in Epson iPrint.

4. Touch the NFC antenna of your smart device to the printer's NFC Tag again. Scanning starts.

**Scanning Using Epson iPrint**

Start Epson iPrint from your smart device and select the item you want to use from the home screen. The following screens are subject to change without notice.

<table>

Faxing

Setting Up a Fax

Connecting to a Phone Line

Compatible Telephone Lines

You can use the printer over standard analogue telephone lines (PSTN = Public Switched Telephone Network) and PBX (Private Branch Exchange) telephone systems.

You may not be able to use the printer with the following phone lines or systems.

- VoIP phone line such as DSL or fiber-optic digital service
- Digital phone line (ISDN)
- Some PBX telephone systems
- When adapters such as terminal adapters, VoIP adapters, splitters, or DSL router are connected between the telephone wall jack and the printer

Connecting the Printer to a Phone Line

Connect the printer to a telephone wall jack using an RJ-11 (6P2C) phone cable. When connecting a telephone to the printer, use a second RJ-11 (6P2C) phone cable.

Depending on the area, a phone cable may be included with the printer. If it is included, use that cable.

You may need to connect the phone cable to an adapter provided for your country or region.

Note:
Remove the cap from the EXT. port of the printer only when connecting your telephone to the printer. Do not remove the cap if you are not connecting your telephone.

In areas where lightning strikes occur frequently, we recommend that you use a surge protector.
Connecting to a Standard Phone Line (PSTN) or PBX

Connect a phone cable from the telephone wall jack or PBX port to the LINE port on the back of the printer.

Related Information

⇒ “Making Settings for a PBX Phone System” on page 122

Connecting to DSL or ISDN

Connect a phone cable from the DSL modem or the ISDN terminal adapter to the LINE port on the back of the printer. See the documentation provided with the modem or the adapter for more details.

Note:

If your DSL modem is not equipped with a built-in DSL filter, connect a separate DSL filter.

Connecting Your Phone Device to the Printer

When using the printer and your telephone on a single phone line, connect the telephone to the printer.

Note:

- If your phone device has a fax function, disable the fax function before connecting. See the manuals that came with the phone device for details.
- If you connect an answering machine, make sure the printer’s Rings to Answer setting is set higher than the number of rings your answering machine is set to answer a call.
1. Remove the cap from the EXT. port on the back of the printer.

2. Connect the phone device and the EXT. port with a phone cable.

Note: When sharing a single phone line, make sure you connect the phone device to the EXT. port of the printer. If you split the line to connect the phone device and the printer separately, the phone and the printer do not work correctly.

3. Select Fax on the home screen.
4. Pick up the handset.

The connection is established when \(\text{(Send)}\) is enabled as the following screen.

![Fax Setting Wizard screen](image)

**Related Information**

- “Settings for the Answering Machine” on page 129

---

**Making Basic Fax Settings**

First make basic fax settings such as **Receive Mode** using the **Fax Setting Wizard**, and then configure the other settings as necessary.

The **Fax Setting Wizard** is automatically displayed when the printer is turned on for the first time. Once you have made the settings, you do not need to make them again unless the connection environment is changed.

**Making Basic Fax Settings Using the Fax Setting Wizard**

Make basic settings by following the on-screen instructions.

1. Connect the printer to the phone line.
   
   **Note:**
   
   *Because an automatic fax connection check runs at the end of the wizard, make sure you connect the printer to the phone line before starting the wizard.*

2. Select **Settings** on the home screen.

3. Select **General Settings > Fax Settings > Fax Setting Wizard**.

4. On the **Fax Setting Wizard** screen, tap **Proceed**.
   
   The wizard begins.

5. On the fax header entry screen, enter the sender name such as your company name, and then tap **OK**.
   
   **Note:**
   
   *Your sender name and your fax number appear as the header for outgoing faxes.*

6. On the phone number entry screen, enter your fax number, and then tap **OK**.
7. On the **Distinctive Ring Detection (DRD) Setting** screen, make the following settings.
   - If you have subscribed to a distinctive ring service from your telephone company: Select **Settings**, and then select the ring pattern to be used for incoming faxes.
     - If you select **All**, go to step 8.
     - If you select any other setting, **Receive Mode** is automatically set to **Auto**. Go to step 10.
   - If you do not need to set this option: Tap **Skip**, and then go to step 10.

   **Note:**
   - **Distinctive ring services**, offered by many telephone companies (the service name differs by company), allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in **DRD**.
   - Depending on the region, **On** and **Off** are displayed as the **DRD** options. Select **On** to use the distinctive ring feature.

8. On the **Receive Mode Setting** screen, select whether you are using your phone device connected to the printer.
   - When connected: Select **Yes**, and then go to the next step.
   - When not connected: Select **No**, and then go to step 10. **Receive Mode** is set to **Auto**.

9. On the **Receive Mode Setting** screen, select whether you want to receive faxes automatically.
   - To receive automatically: Select **Yes. Receive Mode** is set to **Auto**.
   - To receive manually: Select **No. Receive Mode** is set to **Manual**.

10. On the **Proceed** screen, check the settings you made, and then tap **Proceed**.

    To correct or change settings, tap 🔄.

11. Select **Start Checking** to run the fax connection check, and when the screen prompts you to print the check result, select **Print**.

    A report of the check result that shows the connection status is printed.

    **Note:**
    - If there are any errors reported, follow the instructions on the report to solve them.
    - If the **Select Line Type** screen is displayed, select the line type.
      - When you are connecting the printer to a PBX phone system or terminal adapter, select **PBX**.
      - When you are connecting the printer to a standard phone line, select **PSTN**, and then select **Do Not Detect** on the **Confirmation** screen displayed. However, setting this to **Do Not Detect** may cause the printer to skip the first digit of a fax number when dialing and send the fax to the wrong number.

**Related Information**
- “Connecting the Printer to a Phone Line” on page 117
- “Setting Receive Mode” on page 128
- “Making Settings for a PBX Phone System” on page 122
- “Menu Options for Fax Settings” on page 143

**Making Basic Fax Settings Individually**

You can make fax settings without using the fax setting wizard by selecting each setting menu individually. The settings configured using the wizard can also be changed. For more details, see the list of menus in fax settings.
Making Settings for a PBX Phone System

Make the following settings when using the printer in offices that use extensions and require external access codes, such as 0 and 9, to get an outside line.

1. Select **Settings** on the home screen.
2. Select **General Settings > Fax Settings > Basic Settings**.
3. Select **Line Type**, and then select **PBX**.
4. When sending a fax to an outside fax number using # (hash) instead of the actual external access code, select the **Access Code** box to make this to **Use**.
   
   The #, entered instead of the actual access code, is replaced with the stored access code when dialing. Using # helps avoid connection problems when connecting to an outside line.

   **Note:**
   You cannot send faxes to recipients in **Contacts** that have external access codes such as 0 and 9.
   
   If you have registered recipients in **Contacts** using an external access code such as 0 and 9, set the **Access Code** to **Do Not Use**. Otherwise, you must change the code to # in **Contacts**.

5. Tap the **Access Code** input box, enter the external access code used for your phone system, and then tap **OK**.
6. Select **OK** to apply the settings.
   
   The access code is stored in the printer.

Making Information Settings to be Printed on Received Faxes

You can set to print reception information in the footer of the received fax, even if the sender has not set the header information. The reception information includes the received date and time, sender's ID, and page number (such as "P1"). When **Split Page Settings** is enabled, the split page number is also included.

1. Select **Settings** on the home screen.
2. Select **General Settings > Fax Settings > Receive Settings**.
3. Select **Print Settings**, and then tap the **Add Reception Information** to set this to **On**.

Related Information

⇒ "Print Settings" on page 144

Making Settings to Print Received Faxes on 2-Sides

You can print multiple pages of received documents on both sides of the paper.

1. Select **Settings** on the home screen.
2. Select General Settings > Fax Settings > Receive Settings.

3. Select Print Settings, and then select 2-Sided.

4. Tap the 2-Sided field to set this to On.

5. In Binding Margin, select Short Side or Long Side.

6. Select OK.

**Related Information**

⇒ “Print Settings” on page 144

---

**Making Settings to Print Received Faxes by Splitting Pages**

Make split page settings when the size of the received document is larger than the size of the paper loaded in the printer.

1. Select Settings on the home screen.

2. Select General Settings > Fax Settings > Receive Settings.

3. Select Print Settings > Split Page Settings > Delete Print Data After Split.

4. Select the options for deleting print data after splitting.
   - If you select Off, select OK and go to step 6.
   - If you select Delete Top or Delete Bottom, go to next step.

5. In Threshold, set the threshold, and then select OK.

6. Select Overlap When Split.

7. Tap the Overlap When Split field to set this to On.

8. In Overlapping Width, set the width, and then select OK.

**Related Information**

⇒ “Print Settings” on page 144

---

**Sending Faxes Using the Printer**

**Basic Fax Sending Operations**

Send faxes in color or monochrome (B&W).

*Note:*

*When sending a fax in monochrome, you can preview the scanned image on the LCD screen before sending.*
Sending Fax Using the Control Panel

You can send faxes by entering fax numbers for recipients by using the control panel. The printer automatically dials the recipients and sends the fax.

1. Place the originals.

   Note:
   You can send up to 100 pages in one transmission; however depending on the remaining amount of memory, you may not be able to send faxes even with less than 100 pages.

2. Select Fax on the home screen.

3. Specify the recipient.

   You can send the same monochrome fax to up to 100 recipients including up to 99 groups in Contacts. However, a color fax can only be sent to one recipient at a time.

   ❏ To enter manually: Select Keypad, enter a fax number on the screen displayed, and then tap OK.
     - To add a pause (pause for three seconds during dialing), enter a hyphen(-).
     - If you have set an external access code in Line Type, enter "#" (hash) instead of the actual external access code at the beginning of the fax number.

   ❏ To select from the contacts list: Select Contacts and add a check mark to a contact. If the recipients you want to send has not registered in Contacts yet, you can register the recipient first by selecting Add Entry.

   ❏ To select from the sent fax history: Select Recent, and then select a recipient.

   Note:
   ❏ When Direct Dialing Restrictions in Security Settings is set to On, you can only select fax recipients from the contacts list or the sent fax history. You cannot manually enter a fax number.

   To delete recipients you entered, display the list of recipients by tapping on the field of a fax number or the number of recipients on the LCD screen, select the recipient from the list, and then select Remove.

4. Select the Fax Settings tab, and then make settings such as the resolution and the sending method as necessary.

5. Select the Recipient tab, and then send the fax.

   ❏ To send without checking the scanned document image: Tap ◊.

   ❏ To scan, check the scanned document image, and then send (when sending a fax in monochrome only): Select Preview on the Recipient tab.

     To send the fax as is, select Start Sending. Otherwise, cancel the preview by selecting Cancel, and then go to step 3.

- < > ^ ✓ : Moves the screen in the direction of the arrows.
- : Reduces or enlarges.
- < > : Moves to the previous or the next page.
Faxing

Note:
- You cannot send the fax in color after previewing.
- When Direct Send is enabled, you cannot preview.
- When the preview screen is left untouched for 20 seconds, the fax is sent automatically.
- The image quality of a sent fax may be different from what you previewed depending on the capability of the recipient machine.

6. When sending is complete, remove the originals.

Note:
- If the fax number is busy or a problem occurs, the printer automatically redials twice after one minute.
- To cancel sending, tap \( \odot \).
- It takes longer to send a fax in color because the printer performs scanning and sending simultaneously. While the printer is sending a fax in color, you cannot use the other features.

Related Information
- “Placing Originals” on page 49
- “Menu Options for Faxing” on page 141
- “Managing Contacts” on page 53

Sending Faxes Dialing from the External Phone Device

You can send a fax by dialing using the connected telephone when you want to talk over the phone before sending a fax, or when the recipient's fax machine does not switch to the fax automatically.

1. Place the originals.
   - You can send up to 100 pages in one transmission.

2. Pick up the handset of the connected telephone, and then dial the recipient's fax number using the phone.
   
   Note:
   When the recipient answers the phone, you can talk with the recipient.

3. Select Fax on the home screen.

4. Select the Fax Settings tab, and then make settings such as the resolution and the sending method as necessary.

5. When you hear a fax tone, tap \( \odot \), and then hang up the handset.
   
   Note:
   When a number is dialed using the connected telephone, it takes longer to send a fax because the printer performs scanning and sending simultaneously. While sending the fax, you cannot use the other features.

6. When sending is complete, remove the originals.

Related Information
- “Placing Originals” on page 49
- “Fax Settings” on page 141
Various Ways of Sending Faxes

Sending Many Pages of a Monochrome Document (Direct Send)

When sending a fax in monochrome, the scanned document is temporarily stored in the printer’s memory. Therefore, sending a lot of pages may cause the printer to run out of memory and stop sending the fax. You can avoid this by enabling the Direct Send feature, however, it takes longer to send the fax because the printer performs scanning and sending simultaneously. You can use this feature when there is only one recipient.

Select Fax on the home screen, select the Fax Settings tab, and then tap Direct Send to set this to On.

Related Information

⇒ “Placing Originals” on page 49
⇒ “Fax Settings” on page 141

Sending Faxes at a Specified Time (Send Fax Later)

You can set to send a fax at a specified time. Only monochrome faxes can be sent when the time to send is specified.

1. Select Fax on the home screen.
2. Specify the recipient.
3. Select the Fax Settings tab, and then select Send Fax Later.
4. Tap the Send Fax Later field to set this to On.
5. Select the Time field, enter the time you want to send the fax, and then select OK.
6. Select OK to apply the settings.

Note: You cannot send another fax until the fax has been sent at the specified time. If you want to send another one, you need to cancel the scheduled fax by selecting Fax on the home screen, and then deleting it.

Related Information

⇒ “Placing Originals” on page 49
⇒ “Sending Fax Using the Control Panel” on page 124
⇒ “Fax Settings” on page 141

Sending a Fax with a Selected Header

You can send a fax with sender information that is suitable for the recipient. You need to register multiple headers of sender information in advance in the printer by following the steps below.
Registering Multiple Headers for Sending Faxes

You can register up to 21 fax headers as sender information.

1. Select **Settings** on the home screen.
2. Select **General Settings > Fax Settings > Basic Settings**.
3. Select **Header**, tap the **Your Phone Number** field, enter your phone number, and then tap **OK**.
4. Select one of the boxes under the **Fax Header** list, enter the fax header information, and then tap **OK**.

Related Information

➤ “Basic Settings” on page 146

Sending a Fax with a Selected Header

When you send a fax, you can select header information for the recipient. To use this feature, you must register multiple headers in advance.

1. Select **Fax** on the home screen.
2. Select **Fax Settings > Add Sender Information**.
3. Select where you want to add your sender information.
   - **Off**: Sends a fax with no header information.
   - **Outside of Image**: Sends a fax with header information in the top white margin of the fax. This keeps the header from overlapping with the scanned image, however, the fax received by the recipient may be printed across two sheets depending on the size of the originals.
   - **Inside of Image**: Sends a fax with header information approximately 7 mm lower than the top of the scanned image. The header may overlap with the image, however, the fax received by the recipient will not be split into two documents.
4. Select the **Fax Header** field, and then select the header you want to use.
5. Select one of the **Additional Information** options as necessary.
6. Select **OK** to apply the settings.

Related Information

➤ “Fax Settings” on page 141

Sending Different Size Documents Using ADF (ADF Continuous Scan)

If you place different sized originals in the ADF, all of the originals are sent at the largest size among them. You can send them in their original sizes by sorting and placing them by size, or placing them one by one.

Before placing originals, make the following setting.

Select **Fax** on the home screen, select the **Fax Settings** tab, and then tap **ADF Continuous Scan** to set this to **On**. The printer stores the scanned documents, and sends as one document.
Receiving Faxes on the Printer

Setting Receive Mode

You can make a Receive Mode using Fax Setting Wizard. When making fax setting at the first time, we recommend you to use the Fax Setting Wizard. If you want to change only the Receive Mode, follow the instruction below.

1. Select Settings on the home screen.
2. Select General Settings > Fax Settings > Basic Settings > Receive Mode.
3. Select the Receive Mode depending on your use.

**Important:**
If a phone is not connected, you must select Auto.

- Using the phone line only for faxes:
  Select **Auto**.
  Automatically switches to receive faxes when the number of rings you set in **Rings to Answer** are complete.

  **Note:**
  We recommend setting **Rings to Answer** to as low a number as possible.

- Using one phone line for phone calls and faxes (mainly for faxing):
  Select **Auto**.
  Automatically switches to receive faxes when the number of rings you set in **Rings to Answer** are reached.

  **Note:**
  You can make a voice call if you hang up the phone within the number of rings set in **Rings to Answer**.

- Using one phone line for phone calls and faxes (mainly for phonecalls):
  Select **Manual**.
  You can answer a phone call with an external phone device. When faxing, you can start receiving faxes using the printer’s control panel.

  **Note:**
  When making Remote Receive settings, you can start fax receiving faxes using only operations on the connected phone.

Related Information

- “Making Basic Fax Settings Using the Fax Setting Wizard” on page 120
- “Receiving Faxes Manually” on page 129
- “Receiving Faxes Using a Connected Telephone (Remote Receive)” on page 129
Settings for the Answering Machine

You need settings to use an answering machine.

- Set the Receive Mode of the printer to Auto.
- Set the Rings to Answer setting of the printer to a higher number than the number of rings for the answering machine. Otherwise, the answering machine cannot receive voice calls to record voice messages. See the manuals that came with the answering machine for its settings.

The Rings to Answer setting may not be displayed depending on the region.

Related Information

“Basic Settings” on page 146

Various Ways of Receiving Faxes

Receiving Faxes Manually

When you connect a telephone and set the Receive Mode setting of the printer to Manual, follow the steps below to receive faxes.

1. When the telephone rings, pick up the handset.
2. When you hear a fax tone, select Fax on the home screen of the printer.
   
   Note:
   If you enable the Remote Receive feature, you can start receiving a fax just by using the connected telephone.
3. Tap Send/Receive.
4. Select Receive.
5. Tap , and then hang up the handset.

Related Information

“Receiving Faxes Using a Connected Telephone (Remote Receive)” on page 129
“Saving Received Faxes in the Inbox” on page 131

Receiving Faxes Using a Connected Telephone (Remote Receive)

To receive a fax manually, you need to operate the printer after you pick up the handset of the telephone. By using the Remote Receive feature, you can start receiving a fax just by operating the phone.

The Remote Receive feature is available for telephones that support tone dialing.

Related Information

“Receiving Faxes Manually” on page 129
Setting Up Remote Receive

1. Select Settings on the home screen.
2. Select General Settings > Fax Settings > Basic Settings > Remote Receive.
3. Tap Remote Receive field to set this to On.
4. Select Start Code, enter a two digit code (you can enter 0 to 9, *, and #), and then tap OK.
5. Select OK to apply the settings.

Related Information
⇒ “Basic Settings” on page 146

Using Remote Receive

1. When the telephone rings, pick up the handset.
2. When you hear a fax tone, enter the start code using the telephone.
3. After confirming that the printer has started receiving the fax, hang up the handset.

Receiving Faxes by Polling (Polling Receive)

You can receive a fax stored on another fax machine by dialing the fax number. Use this feature to receive a document from a fax information service. However, if the fax information service has an audio guidance feature that you need to follow to receive a document, you cannot use this feature.

Note:
To receive a document from a fax information service that uses audio guidance, just dial the fax number using the connected telephone, and operate the phone and the printer following the audio guidance.

1. Select Fax on the home screen.
2. Tap  
3. Tap Polling Receive to set this to On, and then tap Close.
4. Enter the fax number.

Note:
When Security Settings > Direct Dialing Restrictions is set to On, you can only select fax recipients from the contact list or the sent fax history. You cannot manually enter a fax number.

5. Tap  

Related Information
⇒ “Sending Faxes Dialing from the External Phone Device” on page 125
Making Settings for Blocking Junk Faxes

You can block junk faxes.

1. Select **Settings** on the home screen.

2. Select **General Settings > Fax Settings > Basic Settings > Rejection Fax**.

3. Select **Rejection Fax** and then enable the following options.
   - Rejection Number List: Rejects faxes that are in the Rejection Number List.
   - Fax Header Blank: Rejects faxes that have blank header information.
   - Unregistered Contacts: Rejects faxes that have not been registered in the contact list.

4. If you are using the **Rejection Number List**, tap 📋, select **Edit Blocked Number list**, and then edit the list.

⇒ “Basic Settings” on page 146

Saving of Received Faxes

The printer provides the following features to save received faxes.

- Saving in the printer’s inbox
- Saving on a computer

Note:

- **The above features can be used at the same time.** If you use them all at the same time, received documents are saved to the inbox and on a computer.
- **When there are received documents that have not been read or saved yet, the number of the unprocessed jobs is displayed on the 📋 on the home screen.**

Related Information

⇒ “Saving Received Faxes in the Inbox” on page 131
⇒ “Receiving Faxes on a Computer” on page 137

Saving Received Faxes in the Inbox

You can set to save received faxes in the printer’s inbox. Up to 100 documents can be saved. If you use this feature, received documents are not automatically printed. You can view them on the printer’s LCD screen and print only when needed.

Note:

*Saving 100 documents may not be possible depending on the usage conditions such as the file size of saved documents, and using of multiple fax saving features at a time.*

Related Information

⇒ “Setting to Save Received Faxes in the Inbox” on page 132
Setting to Save Received Faxes in the Inbox

1. Select Settings on the home screen.

2. Select General Settings > Fax Settings > Receive Settings > Fax Output Settings.

3. If a confirmation message is displayed, confirm it, and then tap OK.

4. Select Save to Inbox.

5. Tap Save to Inbox to set this to On

6. Select Options when memory is full, select the option to use when the inbox is full.
   - Receive and print faxes: The printer prints all received documents that cannot be saved in the Inbox.
   - Reject incoming faxes: The printer does not answer incoming fax calls.

7. You can set a password for the inbox. Select Inbox Password Settings, and then set the password.
   
   Note:
   You cannot set a password when Receive and print faxes is selected.

Checking the Received Faxes on the LCD Screen

1. Tap on the on the home screen.
   
   Note:
   When there are received faxes that have not been read, the number of unread documents is displayed on the on the home screen.

2. Tap Open Inbox (XX Unread).

3. If the inbox has been password protected, enter the inbox password.

4. Select the fax you want to view from the list.
   The contents of the fax are displayed.
   - Moves the screen in the direction of the arrows.
   - : Reduces or enlarges.
Faxing

- Rotates the image to the right by 90 degrees.
- Moves to the previous or the next page.
- To hide the operation icons, tap anywhere on the preview screen except for the icons. Tap again to display the icons.

5. Select whether to print or delete the document you have viewed, and then follow the on-screen instructions.

**Important:**
If the printer runs out of memory, receiving and sending faxes is disabled. Delete documents that you have already read or printed.

---

Sending a Fax from a Computer

You can send faxes from the computer by using the FAX Utility and PC-FAX driver.

**Note:**
To install the FAX Utility, use the EPSON Software Updater. See Related Information below for details. For Windows users, you can install using the software disc supplied with the printer.

Related Information

⇒ “Software Update Tools (EPSON Software Updater)” on page 174
⇒ “Installing the Latest Applications” on page 175

Sending Documents Created Using an Application (Windows)

By selecting a printer fax from the **Print** menu of an application like Microsoft Word or Excel, you can directly transmit data such as documents, drawings, and tables you have created, with a cover sheet.

**Note:**
The following explanation uses Microsoft Word as an example. The actual operation may differ depending on the application you use. For details, see the application’s help.

1. Using an application, create a document to transmit by fax.

2. Click **Print** from the **File** menu.
   The application’s **Print** window appears.

3. Select **XXXXX (FAX)** (where XXXXX is your printer name) in **Printer**, and then check the settings for fax sending.
   - Specify 1 in **Number of copies**. Fax may not be transmitted correctly if you specify 2 or more.
   - You cannot use functions such as **Print to File** that change the output port.
   - You may transmit up to 100 pages including cover sheet in one fax transmission.
4. Click **Printer Properties** or **Properties** if you want to specify **Paper Size**, **Orientation**, **Color**, **Image Quality**, or **Character Density**. For details, see the PC-FAX driver help.

5. Click **Print**.

   **Note:**
   When Using FAX Utility for the first time, a window for registering your information is displayed. Enter the necessary information, and then click **OK**. FAX Utility uses **Nickname** to manage fax jobs internally. Other information is automatically added to the cover sheet.

   **Recipient Settings** screen of FAX Utility is displayed.

6. Specify a recipient and click **Next**.

   ❑ Selecting a recipient (name, fax number and so on) from **PC-FAX Phone Book**:
     If the recipient is saved in the phone book, do the steps below.
     1. Click the **PC-FAX Phone Book** tab.
     2. Select the recipient from the list and click **Add**.

   ❑ Selecting a recipient (name, fax number and so on) from the contacts on the printer:
     If the recipient is saved in the contacts on the printer, do the steps below.
     1. Click the **Contacts on Printer** tab.
     Note:
        If your printer has a security function that allows administrators to restrict users from changing the printer’s fax settings, you may need to enter an administrator password to continue.
     2. Select contacts from the list and click **Add** to proceed to **Add to Recipient** window.
     3. Select the contacts from the list displayed, and then click **Edit**.
     4. Add the personal data such as **Company/Corp.** and **Title** as necessary, and then click **OK** to return to the **Add to Recipient** window.
     5. As necessary, select the checkbox of **Register in the PC-FAX Phone Book** to save the contacts to **PC-FAX Phone Book**.
     6. Click **OK**.

   ❑ Specifying a recipient (name, fax number and so on) directly:
     Do the steps below.
     1. Click the **Manual Dial** tab.
     2. Enter the necessary information.
     3. Click **Add**.
     Furthermore, by clicking **Save to Phone Book**, you can save the recipient in the list under the **PC-FAX Phone Book** tab.

   **Note:**
   ❑ If your printer’s **Line Type** is set to **PBX** and the access code has been set to use # (hash) instead of entering the exact prefix code, enter # (hash). For details, see **Line Type** in Basic Settings from related information link below.
   ❑ If you have selected **Enter fax number twice** in the **Option settings** on the FAX Utility main screen, you need to enter the same number again when you click **Add** or **Next**.

The recipient is added to the **Recipient List** displayed in the upper part of the window.
7. Specify the content of the cover sheet.

1. To attach a cover sheet, select one of the samples from Cover Sheet. Enter the Subject and Message. Note that there is no function to create an original cover sheet or to add an original cover sheet to the list.

If you do not want to attach a cover sheet, select No cover sheet from Cover Sheet.

2. Click Cover Sheet Formatting if you want to change the order of the items on the cover sheet. You can select the cover sheet size in Paper Size. You can also select a cover sheet at a different size to the document being transmitted.

3. Click Font if you want to change the font or font size used for the text on the cover sheet.

4. Click Sender Settings if you want to change the sender information.

5. Click Detailed Preview if you want to check the cover sheet with the subject and the message you entered.

6. Click Next.

8. Check the transmission content and click Send.

Make sure the name and fax number of the recipient are correct before transmitting. Click Preview to preview the cover sheet and document to transmit.

Once transmission starts, a window displaying the transmission status appears.

Note:

- To stop transmitting, select the data, and click Cancel. You can also cancel using the printer's control panel.

- If an error occurs during transmission, the Communication Error window appears. Check the error information and retransmit.

- The Fax Status Monitor screen (the screen mentioned above where you can check the transmission status) is not displayed if Display Fax Status Monitor During Transmission is not selected in the Optional Settings screen of the FAX Utility main screen.

Related Information

⇒ “Basic Settings” on page 146

Sending Documents Created Using an Application (Mac OS)

By selecting a fax-capable printer from the Print menu of a commercially available application, you can send data such as documents, drawings, and tables, you have created.

Note:

The following explanation uses Text Edit, a standard Mac OS application as an example.

1. Create the document you want to send by fax in an application.

2. Click Print from the File menu.

The application's Print window is displayed.

3. Select your printer (fax name) in Name, click ▼ to display the detailed settings, check the print settings, and then click OK.

4. Make settings for each item.

- Specify 1 in Number of copies. Even if you specify 2 or more, only 1 copy is sent.
You can send up to 100 pages in one fax transmission.

Note: The page size of documents you can send is the same as the paper size you can fax from the printer.

5. Select Fax Settings from the popup menu, and then make settings for each item.

   See the PC-FAX driver's help for explanations on each setting item.

   Click at the bottom left of the window to open the PC-FAX driver's help.

6. Select the Recipient Settings menu, and then specify the recipient.

   Specifying a recipient (name, fax number, and so on) directly:

   Click the Add item, enter the necessary information, and then click . The recipient is added to the Recipient List displayed in the upper part of the window.

   If you have selected "Enter fax number twice" in the PC-FAX driver settings, you need to enter the same number again when you click .

   If your fax connection line requires a prefix code, enter External Access Prefix.

   Note: If your printer's Line Type is set to PBX and the access code has been set to use # (hash) instead of entering the exact prefix code, enter # (hash). For details, see Line Type in Basic Settings from Related Information link below.

   Selecting a recipient (name, fax number, and so on) from the phone book:

   If the recipient is saved in the phone book, click . Select the recipient from the list, and then click Add > OK.

   If your fax connection line requires a prefix code, enter External Access Prefix.

   Note: If your printer's Line Type is set to PBX and the access code has been set to use # (hash) instead of entering the exact prefix code, enter # (hash). For details, see Line Type in Basic Settings from Related Information link below.

7. Check the recipient settings, and then click Fax.

   Sending starts.

   Make sure the name and fax number of the recipient are correct before transmitting.

   Note:

   If you click the printer icon in Dock, the transmission status check screen is displayed. To stop sending, click the data, and then click Delete.

   If an error occurs during transmission, the Sending failed message is displayed. Check the transmission records on the Fax Transmission Record screen.

   Mixed paper size documents may not be sent correctly.

Receiving Faxes on a Computer

You can receive faxes and save them as PDF files to the computer connected to the printer. The FAX Utility comes with features including how to specify a folder to save the faxes. Install the FAX Utility before using this feature.

**Note:**
You can use one of the following methods to install the FAX Utility.
- Using the EPSON Software Updater (application for updating software)
- Using the disc supplied with your printer. (Windows users Only)

**Important:**
- When receiving faxes from the computer, select Auto in the printer’s fax receiving setting.
- The computer set to receive faxes should always be on. Received documents are saved in the printer’s memory temporarily before the documents are saved on the computer. If you turn off the computer, the printer’s memory might become full as it cannot send the documents to the computer.
- The number of documents that have been temporarily saved to the printer’s memory are displayed on the home screen.
- To read the received faxes, you need to install a PDF viewer such as Adobe Reader in the computer.

**Related Information**
- “Software Update Tools (EPSON Software Updater)” on page 174

Setting to Save a Received Fax on a Computer

You can make received fax settings by using the FAX Utility. Install the FAX Utility on the computer in advance. For details, see Basic Operations in the FAX Utility help (displayed on the main window).

**Note:**
You can receive faxes and print faxes at the same time.

**Related Information**
- “Application for Configuring Fax Operations and Sending Faxes (FAX Utility)” on page 171

Receiving Faxes on a Computer and Printing from the Printer

As well as making settings to save received faxes on a computer, follow the steps below on the printer.

1. Select Settings > General Settings > Fax Settings > Receive Settings.
2. Select Fax Output Settings > Save to Computer > Yes and Print.

**Related Information**
- “Setting to Save a Received Fax on a Computer” on page 137
- “Receive Settings” on page 144
Canceling Received Faxes on the Computer

To cancel saving faxes on the computer, change the settings on the printer.

*Note:* You can also change the settings using the FAX Utility. However, if there are any faxes that have not been saved to the computer, you cannot change the settings.

1. Select `Settings > General Settings > Fax Settings > Receive Settings`.
2. Select `Fax Output Settings > Save to Computer > No`.

**Related Information**

- "Application for Configuring Fax Operations and Sending Faxes (FAX Utility)" on page 171
- "Receive Settings" on page 144

Checking for New Faxes (Windows)

By setting up a computer to save faxes received by the printer, you can check the processing status of received faxes, and whether or not there are any new faxes using the fax icon on the Windows task bar. By setting up the computer to display a notification when new faxes are received, a notification screen pops up near the Windows system tray, and you can check the new faxes.

*Note:*
- Received fax data saved to the computer is removed from the printer’s memory.
- You need Adobe Reader to view the received faxes because they are saved as PDF files.

Using the Fax Icon on the Task Bar (Windows)

You can check for new faxes and the operation status by using the fax icon displayed on the Windows taskbar.

1. Check the icon.
   - : Standing by.
   - : Checking for new faxes.
   - : Importing new faxes is complete.
2. Right-click the icon, and then click **Open the received fax folder**.

The received fax folder is displayed. Check the date and the sender in the file name, and then open the PDF file.

While the fax icon indicates that it is standing by, you can check for new faxes instantly by selecting **Check new faxes**.

*Note:*
- Received faxes are automatically renamed using the following naming format.
  - `YYYYMMDDHHMMSS_xxxxxxxxxx_nnnnn` (Year/Month/Day/Hour/Minute/Second_sender’s number)
Using the Notification Window (Windows)

When you set to notify you the new faxes exist, a notification window is displayed near the task bar for each the fax.

1. Check the notification screen displayed on your computer screen.
   
   **Note:**
   The notification screen disappears if no operation is performed for a given length of time. You can change the notification settings such as the display time.

2. Click anywhere in the notification screen, except for the button.
   
   The folder you specified to save new faxes opens. Check the date and the sender in the file name, and then open the PDF file.
   
   **Note:**
   Received faxes are automatically renamed using the following naming format.
   
   YYYYMMDDHHMMSS_xxxxxxxxxx_nnnnn (Year/Month/Day/Hour/Minute/Second_sender's number)

Checking for New Faxes (Mac OS)

You can check for new faxes using one of the following methods. This is available only on computers set to "Save" (save faxes on this computer).

- Open the received fax folder (specified in Received Fax Output Settings.)
- Open the Fax Receive Monitor and click Check new faxes.
- Notification that new faxes have been received

   Select the Notify me of new faxes via a dock icon in the Fax Receive Monitor > Preferences in the FAX Utility, the fax receive monitor icon on the Dock jumps to notify you that new faxes have arrived.

Open the Received Fax Folder from Received Fax Monitor (Mac OS)

You can open the save folder from the computer specified to receive faxes when selecting "Save" (save faxes on this computer).

1. Click the received fax monitor icon on the Dock to open Fax Receive Monitor.

2. Select the printer and click Open folder, or double click the printer name.

3. Check the date and the sender in the file name, and then open the PDF file.
   
   **Note:**
   Received faxes are automatically renamed using the following naming format.
   
   YYYYMMDDHHMMSS_xxxxxxxxxx_nnnnn (Year/Month/Day/Hour/Minute/Second_sender’s number)

   Information sent from the sender is displayed as the sender's number. This number may not be displayed depending on the sender.
Using Other Faxing Features

Printing Fax Report and List

Printing Fax Report Manually

1. Select Fax on the home screen.
2. Tap (More).
4. Select the report you want to print, and then follow the on-screen instructions.

Note: You can change the report format. From the home screen, select Settings > General Settings > Fax Settings > Report Settings, and then change the Attach Fax image to report or Report Format settings.

Related Information
→ “More” on page 142
→ “Report Settings” on page 145

Setting Up to Print Fax Reports Automatically

You can make settings to print the following fax reports automatically.

Transmission Report
From the home screen, select Fax > Fax Settings > Transmission Report, and then select Print or Print on Error.

Fax Log
From the home screen, select Settings > General Settings > Fax Settings > Report Settings > Fax Log Auto Print, and then select On(Every 30) or On(Time).

Related Information
→ “Menu Options for User Settings” on page 147
→ “Report Settings” on page 145

Setting Security for Faxing

You can make security settings to prevent sending a fax to the wrong recipient, or prevent received documents from being leaked or lost. You can also delete backed-up fax data.

1. Select Settings on the home screen.
2. Select General Settings > Fax Settings > Security Settings.

3. Select the menu, and then make the settings.

Related Information

“Security Settings” on page 147

---

**Menu Options for Faxing**

**Recipient**

Select the menus on the control panel as described below.

**Fax > Recipient**

- **Keypad:**
  Manually enter a fax number.

- **Contacts:**
  Select a recipient from the contacts list. You can also add or edit a contact.

- **Recent:**
  Select a recipient from the sent fax history. You can also add the recipient to the contacts list.

**Fax Settings**

Select the menus on the control panel as described below.

**Fax > Fax Settings**

- **Scan Settings:**
  - **Original Size (Glass):**
    Select the size and orientation of the original you placed on the scanner glass.
  
  - **Color Mode**
    Select whether to scan in color or in monochrome.

  - **Resolution**
    Select the resolution of the outgoing fax.

  - **Density**
    Sets the density of the outgoing fax.

  - **Remove Background**
    Detects the paper color (background color) of the original document, and removes or lightens the color. Depending on the darkness and vividness of the color, it may not be removed or lightened.
ADF Continuous Scan

When sending a fax from the ADF, you cannot add originals in the ADF after starting scanning. If you place different sized originals in the ADF, all of the originals are sent at the largest size among them. Enable this option so that the printer asks if you want to scan another page after an original in the ADF has finished scanning. Then you can sort and scan your originals by size and send them as a single fax.

Fax Send Settings:

- Direct Send
  Sends monochrome faxes to a single recipient as soon as the connection is made, without saving the scanned image to memory. If you do not enable this option, the printer starts the transmission after saving the scanned image to memory and may cause a memory full error when sending many pages. By using this option, you can avoid the error, but it takes longer to send the fax. You cannot use this option when sending a fax to multiple recipients.

- Send Fax Later
  Sends a fax at a time you specified. Only a monochrome fax is available when using this option.

- Add Sender Information
  - Add Sender Information:
    Select the position where you want to include the header information (sender name and fax number) in the outgoing fax, or not to include the information.
    - Off: Sends a fax with no header information.
    - Outside of Image: Sends a fax with header information in the top white margin of the fax. This keeps the header from overlapping with the scanned image, however, the fax received by the recipient may be printed across two sheets depending on the size of the originals.
    - Inside of Image: Sends a fax with header information approximately 7 mm lower than the top of the scanned image. The header may overlap with the image, however, the fax received by the recipient will not be split into two documents.

- Fax Header:
  Select the header for the recipient. To use this feature, you should register multiple headers in advance.

- Additional Information:
  Select the information you want to add. You can select one from Your Phone Number and Destination List.

- Transmission Report
  Prints a transmission report automatically after you send a fax. Select Print on Error to print a report only when an error occurs. If Settings > General Settings > Fax Settings > Report Settings > Attach Fax image to report is set, an image of the document is printed with the report.

- Clear All Settings
  Restores all settings in Fax Settings to their defaults.

More

Select the menus on the control panel as described below.

Fax > (More)
Transmission History:
You can check the history of sent or received fax jobs.

Fax Report:
- Last Transmission
  Prints a report for the previous fax that was sent or received through polling.
- Fax Log
  Prints a transmissions report. You can set to print this report automatically using the following menu.
  Settings > General Settings > Fax Settings > Report Settings > Fax Log Auto Print
- Fax Settings List
  Prints the current fax settings.
- Protocol Trace
  Prints a detailed report for the previous fax that was sent or received.

Polling Receive:
Connects to the fax number you entered and receives a fax stored on the fax machine. You can use this option for receiving a fax from a fax information service.

Inbox:
Opens the inbox where the received faxes are stored.

Reprint Faxes:
Prints the received faxes again.

Fax Settings:
Opens Fax Settings. You can also access this screen by selecting Settings on the home screen, and then selecting General Settings > Fax Settings. For more details, see the page that describes the Fax Settings feature.

Related Information
⇒ “Menu Options for Fax Settings” on page 143

---

Menu Options for Fax Settings

Select the menus on the control panel as described below.
Settings > General Settings > Fax Settings

Check Fax Connection

Select the menus on the control panel as described below.
Settings > General Settings > Fax Settings > Check Fax Connection
Checks if the printer is connected to the phone line and ready for fax transmission, and prints the check result on A4 size plain paper.

**Fax Setting Wizard**

Select the menus on the control panel as described below.

*Settings > General Settings > Fax Settings > Fax Setting Wizard*

Select to make basic fax settings by following the on-screen instructions. For details, see the page that describes basic fax settings.

**Receive Settings**

Select the menus on the control panel as described below.

*Settings > General Settings > Fax Settings > Receive Settings*

**Fax Output Settings**

You can set to save received documents in the inbox or on a computer. Select the menus on the control panel as described below.

- **Save to Inbox:** Saves received faxes in the printer’s inbox.
- **Save to Computer:** Converts received documents into PDF format and saves them on a computer connected to the printer.

**Print Settings**

Select the menus on the control panel as described below.

- **Auto Reduction:** Reduces large received documents to fit on the paper in the paper source. Reducing may not always be possible depending on the received data. If this is turned off, large documents are printed at their original size on multiple sheets, or a blank second page may be ejected.

- **Split Page Settings:** Make split page settings when the size of the received document is larger than the size of the paper loaded in the printer.

- **Auto Rotation:** Rotates faxes received as landscape-orientated, A5 size documents so that they are printed on the correct paper size. This setting is applied when the paper size setting is set to A5. Check the following menu.

  *Settings > General Settings > Printer Settings > Paper Source Settings > Paper Setting*
Faxing

Add Reception Information:
Prints reception information in the header of the received fax, even if the sender does not set the header information. The reception information includes the received date and time, sender’s ID, reception ID (such as "#001"), and page number (such as "P1"). When Split Page Settings is enabled, the split page number is also included.

2-Sided:
You can print multiple pages of received documents on both sides of the paper.

Print Start Timing:
Select options to start printing the received documents.
- All Pages Received: After receiving all of the pages, printing starts from the first page.
- First Page Received: Starts printing when the first page is received, and then prints in order as the pages are received. If the printer cannot start printing, such as when it is printing other jobs, the printer starts printing received pages as a batch when it is available.

Collation Stack:
Prints received documents from the last page (print in descending order) so that the printed documents are stacked in the correct page order. When the printer is running low on memory, this feature may not be available.

Print Suspend Time:
Saves documents received during the specified time period in the printer’s memory without printing them. At the time specified to restart printing, the documents are automatically printed. This feature can be used for noise prevention at night or to prevent confidential documents from being disclosed while you are away. Before using this feature, make sure there is enough free memory.

Quiet Mode:
Reduces the noise the printer makes when printing faxes, however, print speed may be reduced.

Report Settings
Select the menu on the control panel as described below.

Settings > General Settings > Fax Settings > Report Settings

Fax Log Auto Print:
Prints the fax log automatically. Select On(Every 30) to print a log every time 30 fax jobs are completed. Select On(Time) to print the log at a specified time. However, if the number of fax jobs exceeds 30, the log is printed before the specified time.

Attach Fax image to report:
Prints a Transmission Report with an image of the first page of the sent document. Select On(Large Image) to print the upper part of the page without reducing. Select On(Small Image) to print the entire page reducing it to fit onto the report.

Report Format:
Select a format for fax reports. Select Detail to print with error codes.
Basic Settings

Select the menus on the control panel as described below.

**Settings > General Settings > Fax Settings > Basic Settings**

**Fax Speed:**
Select the fax transmission speed. We recommend selecting **Slow** *(9,600bps)* when a communication error occurs frequently, when sending/receiving a fax to/from abroad, or when you are using an IP (VoIP) phone service.

**ECM:**
Automatically corrects errors in the fax transmission (Error Correction Mode), mostly caused by telephone line noise. If this is disabled, you cannot send or receive documents in color.

**Dial Tone Detection:**
Detects a dial tone before starting to dial. If the printer is connected to a PBX (Private Branch Exchange) or digital phone line, the printer may fail to start dialing. In this situation, change the **Line Type** setting to **PBX**. If this does not work, disable this feature. However, disabling this feature may drop the first digit of a fax number and send the fax to the wrong number.

**Line Type:**
Select the line type to which you have connected the printer. When using the printer in an environment that uses extensions and requires an external access code, such as 0 and 9, to get an outside line, select **PBX** and register the access code. Once you have registered the access code, enter # (hash) instead of the access code when sending a fax to an outside fax number. For an environment that uses a DSL modem or terminal adapter, setting to **PBX** is also recommended.

**Header:**
Enter your sender name and fax number. These appear as a header on outgoing faxes. You can enter up to 40 characters for your name, and up to 20 digits for your fax number.

**Receive Mode:**
Select the receive mode.

**DRD:**
If you have subscribed to a distinctive ring service from your telephone company, select the ring pattern to be used for incoming faxes. The distinctive ring service, offered by many telephone companies (the service name differs by company), allows you to have several phone numbers on one phone line. Each number is assigned different ring pattern. You can use one number for voice calls and another for fax calls. Depending on the region, this option may be **On** or **Off**.

**Rings to Answer:**
Select the number of rings that must occur before the printer automatically receives a fax.

**Remote Receive:**
When you answer an incoming fax call on a phone connected to the printer, you can start receiving the fax by entering the code using the phone.
Faxing

Rejection Fax:
Select options to reject junk faxes.

Security Settings
Select the menus on the control panel as described below.
Settings > General Settings > Fax Settings > Security Settings

Direct Dialing Restrictions:
- Off
  Enables the manual entry of recipient's fax numbers.
- On
  Disables the manual entry of recipient's fax numbers allowing the operator to select recipients only from the contacts list or sent history.
- Enter Twice
  Requires the operator to enter the fax number again when the number was manually entered.

Confirm Address List:
Displays a recipient confirmation screen before starting the transmission.

Backup Data Auto Clear:
To prepare for an unexpected power off due to an electricity failure or an incorrect operation, the printer temporarily stores backup copies of sent and received documents in its memory. Enable this option to automatically erase the backups when sending or receiving a document completes successfully and the backups become unnecessary.

Clear Backup Data:
Erases all backup copies temporarily stored in the printer's memory. Run this before you give the printer to someone else or dispose of it.

Menu Options for User Settings
Select the menus on the control panel as described below.
Settings > User Settings > Fax

The settings made in this menu become your default settings for sending faxes. For explanations on the setting items, see the Fax Settings in the Fax menu.

Related Information
➤ "Fax Settings" on page 141
Menu Options for Inbox

(Inbox):
Tapping this opens the Inbox where the received faxes are stored. When there are received faxes that have not been read, the number of unread documents is displayed on the icon.
Replacing Ink Cartridges and Other Consumables

Checking the Status of the Remaining Ink and the Maintenance Box

You can check the approximate ink levels and the approximate service life of the maintenance box from the control panel or the computer.

Checking the Status of the Remaining Ink and the Maintenance Box - Control Panel

Select 🕒 on the home screen.

Checking the Status of the Remaining Ink and the Maintenance Box - Windows

1. Access the printer driver window.
2. Click EPSON Status Monitor 3 on the Maintenance tab.

   Note: If EPSON Status Monitor 3 is disabled, click Extended Settings on the Maintenance tab, and then select Enable EPSON Status Monitor 3.

Related Information

⇒ “Accessing the Printer Driver” on page 64

Checking the Status of the Remaining Ink and the Maintenance Box - Mac OS

1. Select System Preferences from the ⌘ menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer.
2. Click Options & Supplies > Utility > Open Printer Utility.
3. Click EPSON Status Monitor.
Ink Cartridge Codes

Epson recommends the use of genuine Epson ink cartridges. Epson cannot guarantee the quality or reliability of non-genuine ink. The use of non-genuine ink may cause damage that is not covered by Epson's warranties, and under certain circumstances, may cause erratic printer behavior. Information about non-genuine ink levels may not be displayed.

The following are the codes for genuine Epson ink cartridges.

Note:
- Not all cartridges are available in all regions.
- Ink cartridge codes may vary by location. For the correct codes in your area, contact Epson support.

For Europe

Ink Cartridge Handling Precautions

Read the following instructions before replacing ink cartridges.

Handling precautions

- Store ink cartridges at normal room temperature and keep them away from direct sunlight.
- Epson recommends using the ink cartridge before the date printed on the package.
- For best results, use up ink cartridge within six months of opening the package.
- For best results, store ink cartridge packages with their bottom down.
- After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
- Do not open the ink cartridge package until you are ready to install it in the printer. The cartridge is vacuum packed to maintain its reliability. If you leave a cartridge unpacked for a long time before using it, normal printing may not be possible.
- Be careful not to break the hooks on the side of the ink cartridge when you remove it from the package.
- You must remove the yellow tape from the cartridge before installing it; otherwise, print quality may decline or you may not be able to print. Do not remove or tear the label on the cartridge; this can cause leakage.

Do not remove the transparent seal from the bottom of the cartridge; otherwise, the cartridge may become unusable.
Do not touch the sections shown in the illustration. Doing so may prevent normal operation and printing.

Install all ink cartridges; otherwise you cannot print.

Do not replace ink cartridges with the power off. Do not move the print head by hand; otherwise, you may damage the printer.

Do not turn off the printer during ink charging. If the ink charging is incomplete, you may not be able to print.

Do not leave the printer with the ink cartridges removed or do not turn off the printer during cartridge replacement. Otherwise, ink remaining in the print head nozzles will dry out and you may not be able to print.

If you need to remove an ink cartridge temporarily, make sure you protect the ink supply area from dirt and dust. Store the ink cartridge in the same environment as the printer, with the ink supply port facing down or sideways. Do not store ink cartridges with the ink supply port facing up. Because the ink supply port is equipped with a valve designed to contain the release of excess ink, there is no need to supply your own covers or plugs.

Removed ink cartridges may have ink around the ink supply port, so be careful not to get any ink on the surrounding area when removing the cartridges.

This printer uses ink cartridges equipped with a green chip that monitors information such as the amount of remaining ink for each cartridge. This means that even if the cartridge is removed from the printer before it is expended, you can still use the cartridge after reinserting it back into the printer. However, when reinserting a cartridge, some ink may be consumed to guarantee printer performance.

For maximum ink efficiency, only remove an ink cartridge when you are ready to replace it. Ink cartridges with low ink status may not be used when reinserted.

To ensure you receive premium print quality and to help protect your print head, a variable ink safety reserve remains in the cartridge when your printer indicates to replace the cartridge. The yields quoted for you do not include this reserve.

Although the ink cartridges may contain recycled materials, this does not affect printer function or performance.

Specifications and appearance of the ink cartridge are subject to change without prior notice for improvement.

Do not disassemble or remodel the ink cartridge, otherwise you may not be able to print normally.

You cannot use the cartridges that came with the printer for the replacement.

Quoted yields may vary depending on the images that you are printing, the paper type that you are using, the frequency of your prints and environmental conditions such as temperature.

**Ink consumption**

To maintain optimum print head performance, some ink is consumed from all cartridges during maintenance operations such as print head cleaning. Ink may also be consumed when you turn on the printer.
Replacing Ink Cartridges and Other Consumables

- When printing in monochrome or grayscale, color inks instead of black ink may be used depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

- The ink in the ink cartridges supplied with your printer is partly used during initial setup. In order to produce high quality printouts, the print head in your printer will be fully charged with ink. This one-off process consumes a quantity of ink and therefore these cartridges may print fewer pages compared to subsequent ink cartridges.

### Replacing Ink Cartridges

When a message is displayed prompting you to replace the ink cartridges, select How To and then view the animations displayed on the control panel to learn how to replace the ink cartridges.

If you need to replace the ink cartridges before they are expended, select Maintenance > Ink Cartridge Replacement on the home screen, and then follow the on-screen instructions. Select How To for details.

---

**Caution:**

Be careful not to trap your hand or fingers when opening or closing the scanner unit. Otherwise you may be injured.

**Note:**

You can continue printing even after the printer indicates that ink is low. However, prepare new ink cartridges as soon as possible.

### Related Information

- “Ink Cartridge Codes” on page 150
- “Ink Cartridge Handling Precautions” on page 151

### Maintenance Box Code

Epson recommends the use of a genuine Epson maintenance box.

Maintenance box code: T04D1

---

**Important:**

Once a maintenance box has been installed in a printer it cannot be used with other printers.

### Maintenance Box Handling Precautions

Read the following instructions before replacing the maintenance box.

- Do not touch the green chip on the side of the maintenance box. Doing so may prevent normal operation and printing.

- Do not drop the maintenance box or subject it to strong shocks.

- Do not replace the maintenance box during printing; otherwise, ink may leak.

- Do not remove the maintenance box and its cover except when replacing the maintenance box; otherwise ink may leak.
Replacing a Maintenance Box

In some print cycles a very small amount of surplus ink may be collected in the maintenance box. To prevent ink leakage from the maintenance box, the printer is designed to stop printing when the absorbing capacity of the maintenance box has reached its limit. Whether and how often this is required will vary according to the number of pages you print, the type of material that you print and the number of cleaning cycles that the printer performs.

When a message is displayed prompting you to replace the maintenance box, refer to the animations displayed on the control panel. The need for replacement of the box does not mean that your printer has ceased to operate in accordance with its specifications. The Epson warranty does not cover the cost of this replacement. It is a user-serviceable part.

Note:
When it is full, you cannot print until the maintenance box is replaced to avoid ink leakage. However, non-printing features are available.

Related Information
- “Maintenance Box Code” on page 153
- “Maintenance Box Handling Precautions” on page 153

Temporarily Printing with Black Ink

When color ink is expended and black ink still remains, you can use the following settings to continue printing for a short time using only black ink.

- Type of paper: plain papers, Envelope
- Color: B&W or Grayscale
- Borderless: Not selected
- EPSON Status Monitor 3: Enabled (When printing from the printer driver on Windows.)

Because this feature is only available for approximately five days, replace the expended ink cartridge as soon as possible.

Note:
- If EPSON Status Monitor 3 is disabled, access the printer driver, click Extended Settings on the Maintenance tab, and then select Enable EPSON Status Monitor 3.
- The available period varies depending on the usage conditions.
Temporarily Printing with Black Ink - Control Panel

1. When a message is displayed prompting you to replace the ink cartridges, select Proceed.
   A message is displayed telling you that you can temporarily print with black ink.

2. Check the message, and then select Proceed.

3. If you want to print in monochrome, select No, remind me later.
   The ongoing job is canceled.

4. Now you can copy originals or print received faxes on plain paper in monochrome. Select the feature you want to use on the home screen.
   
   Note:
   Borderless copying is not available.

Temporarily Printing with Black Ink - Windows

1. When the following window is displayed, cancel printing.
Replacing Ink Cartridges and Other Consumables

Note:
If you cannot cancel printing from the computer, cancel using the printer's control panel.

2. Access the printer driver window.
3. Clear Borderless on the Main tab.
4. Select plain papers or Envelope as the Paper Type setting on the Main tab.
5. Select Grayscale.
6. Set the other items on the Main and More Options tabs as necessary, and then click OK.
7. Click Print.
8. Click Print in Black in the window displayed.

Related Information
⇒ “Canceling” on page 80
⇒ “Loading Paper in the Paper Cassette” on page 45
⇒ “Printing Basics” on page 64

Temporarily Printing with Black Ink - Mac OS

Note:
To use this feature through a network, connect with Bonjour.

1. Click the printer icon in the Dock.
2. Cancel the job.
   Note:
   If you cannot cancel printing from the computer, cancel using the printer's control panel.
3. Select System Preferences from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer. Click Options & Supplies > Options (or Driver).
4. Select On as the Permit temporary black printing setting.
5. Access the print dialog.
6. Select Print Settings from the pop-up menu.
7. Select any paper size except for a borderless size as the Paper Size setting.
8. Select plain papers or Envelope as the Media Type setting.
10. Set the other items as necessary.
11. Click Print.
Conserving Black Ink when the Black Ink Is Low (for Windows Only)

When black ink is running low and there is enough color ink remaining, you can use a mixture of color inks to create black. You can continue printing while preparing a replacement black ink cartridge.

This feature is only available when you select the following settings in the printer driver.

- **Paper Type:** plain papers
- **Quality:** Standard
- **EPSON Status Monitor 3:** Enabled

**Note:**
- If EPSON Status Monitor 3 is disabled, access the printer driver, click **Extended Settings** on the **Maintenance** tab, and then select **Enable EPSON Status Monitor 3**.
- Composite black looks slightly different from pure black. In addition, the print speed is reduced.
- To maintain the quality of the print head, black ink is also consumed.

Maintaining the Printer

Checking and Cleaning the Print Head

If the nozzles are clogged, the printouts become faint, there is visible banding, or unexpected colors appear. When print quality has declined, use the nozzle check feature and check if the nozzles are clogged. If the nozzles are clogged, clean the print head.

**Important:**
- Do not open the scanner unit or turn off the printer during head cleaning. If the head cleaning is incomplete, you may not be able to print.
- Because print head cleaning uses some ink, clean the print head only if quality declines.
- When ink is low, you may not be able to clean the print head. Replace the ink cartridge first.
- If print quality has not improved after repeating nozzle check and head cleaning about four times, wait for at least six hours without printing, and then run the nozzle check again and repeat the head cleaning if necessary. We recommend to turn off the printer. If print quality has still not improved, contact Epson support.
- To prevent the print head from drying out, do not unplug the printer while the power is on.

Checking and Cleaning the Print Head - Control Panel

1. Load A4-size plain paper in the printer.

2. Select **Maintenance** on the home screen.

3. Select **Print Head Nozzle Check**.

4. Follow the on-screen instructions to print the nozzle check pattern.

5. Examine the printed pattern. If there are broken lines or missing segments as shown in the "NG" pattern, the print head nozzles may be clogged. Go to the next step. If you cannot see any broken lines or missing segments as in the following "OK" pattern, the nozzles are not clogged. Select ✅ to close the nozzle check feature.

   ![OK pattern](image)
   ![NG pattern](image)

6. Select ✗, and then follow the on-screen instructions to clean the print head.

7. When cleaning is finished, print the nozzle check pattern again. Repeat cleaning and printing the pattern until all lines are printed completely.
Checking and Cleaning the Print Head - Windows

1. Load A4-size plain paper in the printer.
2. Access the printer driver window.
3. Click Nozzle Check on the Maintenance tab.
4. Follow the on-screen instructions.

Checking and Cleaning the Print Head - Mac OS

1. Load A4-size plain paper in the printer.
2. Select System Preferences from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer.
3. Click Options & Supplies > Utility > Open Printer Utility.
4. Click Nozzle Check.
5. Follow the on-screen instructions.

Aligning the Print Head

If you notice a misalignment of vertical lines or blurred images, align the print head.

Aligning the Print Head - Control Panel

1. Load A4-size plain paper in the printer.
2. Select Maintenance on the home screen.
3. Select Print Head Alignment.
4. Select one of the alignment menus, and then follow the on-screen instructions to print an alignment pattern.
   - Ruled Line Alignment: Select this if vertical lines look misaligned.
   - Vertical Alignment: Select this if your printouts look blurry or vertical ruled lines appear misaligned.
   - Horizontal Alignment: Select this if you see horizontal banding at regular intervals.

5. Follow the on-screen instructions to align the print head.
   - Ruled Line Alignment: Find and select the number for the pattern that has the least misaligned vertical line.
   - Vertical Alignment: Find and select the number for the most solid pattern in each group.
   - Horizontal Alignment: Find and select the number for the least separated and overlapping pattern.

Cleaning the Paper Path

When the printouts are smeared or paper does not feed correctly, clean the roller inside.

⚠️ Important:

Do not use tissue paper to clean the inside of the printer. The print head nozzles may be clogged with lint.

Cleaning the Paper Path for Ink Smears

When the printouts are smeared or scuffed, clean the roller inside.

⚠️ Important:

Do not use tissue paper to clean the inside of the printer. The print head nozzles may be clogged with lint.

1. Load A4-size plain paper in the printer.
2. Select Maintenance on the home screen.
4. Follow the on-screen instructions to clean the paper path.
   
   Note:
   Repeat this procedure until the paper is not smeared with ink.

Related Information

⇒ “Loading Paper in the Paper Cassette” on page 45

Cleaning the Paper Path for Paper Feeding Problems

When paper is not fed from paper cassette correctly, clean the roller inside.

1. Turn off the printer by pressing the button.
2. Unplug the power cord, and then disconnect the power cord.
3. Pull out paper cassette.

4. Stand the printer with the control panel's button at the top.

![Image of printer being stood on end]

⚠️ Caution:
Be careful not to trap your hand or fingers when standing the printer. Otherwise you may be injured.

5. Dampen a cloth with water, wring it out thoroughly, and then wipe the roller while rotating it with the cloth.

![Image of roller being wiped with a cloth]
6. Return the printer to its normal position, and then insert the paper cassette.

**Important:**

Do not leave the printer standing for a long time.

7. Connect the power cord.

---

**Cleaning the ADF**

When the copied or scanned images from the ADF are smeared or the originals do not feed in the ADF correctly, clean the ADF.

**Important:**

Never use alcohol or thinner to clean the printer. These chemicals can damage the printer.

1. Open the ADF cover.

2. Use a soft, moist cloth to clean the roller and the interior of the ADF.

**Important:**

- Using a dry cloth may damage the surface of the roller.
- Use the ADF after the roller has dried.
3. Open the document cover.

4. Clean the part that is shown in the illustration.

**Important:**
- If the glass surface is stained with grease or some other hard-to-remove material, use a small amount of glass cleaner and a soft cloth to remove it. Wipe off all remaining liquid.
- Do not press the glass surface too hard.
- Be careful not to scratch or damage the surface of the glass. A damaged glass surface can decrease the scan quality.

---

**Cleaning the Scanner Glass**

When the copies or scanned images are smeared, clean the scanner glass.

**Caution:**
Be careful not to trap your hand or fingers when opening or closing the document cover. Otherwise you may be injured.
Important:
Never use alcohol or thinner to clean the printer. These chemicals can damage the printer.

1. Open the document cover.

2. Use a soft, dry, clean cloth to clean the surface of the scanner glass.

   Important:
   ❏ If the glass surface is stained with grease or some other hard-to-remove material, use a small amount of glass cleaner and a soft cloth to remove it. Wipe off all remaining liquid.
   ❏ Do not press the glass surface too hard.
   ❏ Be careful not to scratch or damage the surface of the glass. A damaged glass surface can decrease the scan quality.

Cleaning the Translucent Film

When the printout is not improved after aligning the print head or cleaning the paper path, the translucent film inside the printer may be smeared.

Items required:

❏ Cotton swabs (several)
❏ Water with a few drops of detergent (2 to 3 drops of detergent in 1/4 cup of tap water)
❏ Light for checking smears

Important:

Do not use cleaning liquid other than water with a few drops of detergent.

1. Turn off the printer by pressing the button.
2. Open the scanner unit.

![Scanner Unit Image]

3. Check if the translucent film is smeared. Smears are easier to see if you use a light.
   If there are smears (such as finger marks or grease) on the translucent film (A), go to the next step.

![Translucent Film Image]

A: Translucent film  
B: Rail

**Important:**

Be careful not to touch the rail (B). Otherwise, you may not be able to print. Do not wipe off the grease on the rail, because this is necessary for operations.
4. Moisten a cotton swab with the water with a few drops of detergent so that it is not dripping water, and then wipe the smeared part.

![Image of a cotton swab moistened with water and detergent](image-url)

**Important:**

Wipe off the smear gently. If you press the cotton swab too hard to the film, the springs of the film may be dislocated and the printer may be damaged.

5. Use a new dry cotton swab to wipe the film.

**Important:**

Do not leave any fibers on the film.

**Note:**

To prevent the smear from spreading, frequently replace the cotton swab with a new one.

6. Repeat steps 4 and 5 until the film is not smeared.

7. Visually check that the film is not smeared.
Network Service and Software Information

This section introduces the network services and software products available for your printer from the Epson website or the supplied software disc.

Application for Configuring Printer Operations (Web Config)

Web Config is an application that runs in a web browser, such as Internet Explorer and Safari, on a computer or smart device. You can confirm the printer status or change the network service and printer settings. To use the Web Config, connect the printer and the computer or device to the same network.

The following browsers are supported.

<table>
<thead>
<tr>
<th>OS</th>
<th>Browser</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows XP SP3 or later</td>
<td>Internet Explorer 8 or later, Firefox*, Chrome*</td>
</tr>
<tr>
<td>Mac OS X v10.6.8 or later</td>
<td>Safari*, Firefox*, Chrome*</td>
</tr>
<tr>
<td>iOS</td>
<td>Safari*</td>
</tr>
<tr>
<td>Android 2.3 or later</td>
<td>Default browser</td>
</tr>
<tr>
<td>Chrome OS*</td>
<td>Default browser</td>
</tr>
</tbody>
</table>

* Use the latest version.

Running Web Config on a Web Browser

1. Check the printer’s IP address.
   
   Select the network icon on the printer’s home screen, and then select the active connection method to confirm the printer’s IP address.

   Note:
   You can also check the IP address by printing the network connection report.

2. Launch a Web browser from a computer or smart device, and then enter the printer’s IP address.

   Format:
   IPv4: http://the printer’s IP address/
   IPv6: http://[the printer’s IP address]/

   Examples:
   IPv4: http://192.168.100.201/
   IPv6: http://[2001:db8::1000:1]/
Note:
Using the smart device, you can also run Web Config from the maintenance screen of Epson iPrint.

Related Information

➤ “Printing a Network Connection Report” on page 31
➤ “Using Epson iPrint” on page 90

Running Web Config on Windows

When connecting a computer to the printer using WSD, follow the steps below to run Web Config.

1. Access the devices and printers screen in Windows.
   - Windows 10/Windows Server 2016
     Right-click the start button or press and hold it, and then select Control Panel > View devices and printers in Hardware and Sound.
     Select Desktop > Settings > Control Panel > View devices and printers in Hardware and Sound (or Hardware).
   - Windows 7/Windows Server 2008 R2
     Click the start button, and select Control Panel > View devices and printers in Hardware and Sound.
   - Windows Vista/Windows Server 2008
     Click the start button, and select Control Panel > Printers in Hardware and Sound.

2. Right-click on your printer and select Properties.

3. Select the Web Service tab and click the URL.

Running Web Config on Mac OS

1. Select System Preferences from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer.

2. Click Options & Supplies > Show Printer Webpage.

Application for Scanning Documents and Images
(Epson Scan 2)

Epson Scan 2 is an application for controlling scanning. You can adjust the size, resolution, brightness, contrast, and quality of the scanned image. You can also start Epson Scan 2 from a TWAIN-compliant scanning application. See the application’s help for details.
**Starting on Windows**

*Note:*  
For Windows Server operating systems, make sure the Desktop Experience feature is installed.

- **Windows 10/Windows Server 2016**  
  Click the start button, and then select **EPSON > Epson Scan 2**.

  Enter the application name in the search charm, and then select the displayed icon.

  Click the start button, and then select **All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2**.

**Starting on Mac OS**

*Note:*  
Epson Scan 2 does not support the Mac OS fast user switching feature. Turn off fast user switching.

Select Go > Applications > Epson Software > Epson Scan 2.

**Related Information**

- “Scanning Using Epson Scan 2” on page 107
- “Installing the Latest Applications” on page 175

**Adding the Network Scanner**

Before using Epson Scan 2, you need to add the network scanner.

1. Start the software, and then click **Add** on the **Scanner Settings** screen.

   *Note:*  
   ❑ If **Add** is grayed out, click **Enable Editing**.  
   ❑ If the main screen of Epson Scan 2 is displayed, it has already been connected to the scanner. If you want to connect to another network, select **Scanner > Settings** to open the **Scanner Settings** screen.

2. Add the network scanner. Enter the following items, and then click **Add**.

   ❑ **Model**: Select the scanner you want to connect to.  
   ❑ **Name**: Enter the scanner name within 32 characters.  
   ❑ **Search for Network**: When the computer and the scanner are on the same network, the IP address is displayed. If it is not displayed, click the **Enter address** button. If the IP address is still not displayed, click **Enter address**, and then enter the IP address directly.

3. Select the scanner on the **Scanner Settings** screen, and then click **OK**.
Application for Configuring Scanning Operations from the Control Panel (Epson Event Manager)

Epson Event Manager is an application that allows you to manage scanning from the control panel and save images to a computer. You can add your own settings as presets, such as the document type, the save folder location, and the image format. See the application's help for details.

Note:
Windows Server operating systems are not supported.

Starting on Windows
- Windows 10
  Click the start button, and then select **Epson Software > Event Manager**.
- Windows 8.1/Windows 8
  Enter the application name in the search charm, and then select the displayed icon.
- Windows 7/Windows Vista/Windows XP
  Click the start button, and then select **All Programs or Programs > Epson Software > Event Manager**.

Starting on Mac OS
Go > Applications > Epson Software > Event Manager.

Related Information
⇒ “Installing the Latest Applications” on page 175

Application for Configuring Fax Operations and Sending Faxes (FAX Utility)

FAX Utility is an application that allows you to configure various settings for sending faxes from a computer. You can create or edit the contacts list to be used when sending a fax, configure to save received faxes in PDF format on the computer, and so on. See the application's help for details.

Note:
- Windows Server operating systems are not supported.
- Make sure you have installed the printer driver before installing FAX Utility.

Starting on Windows
- Windows 10
  Click the start button, and select **Epson Software > FAX Utility**.
- Windows 8.1/Windows 8
  Enter the application name in the search charm, and then select the displayed icon.
- Windows 7/Windows Vista/Windows XP
  Click the start button, and select **All Programs (or Programs) > Epson Software > FAX Utility**.
**Starting on Mac OS**

Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer (FAX). Click **Options & Supplies** > **Utility** > **Open Printer Utility**.

**Related Information**

⇒ “Receiving Faxes on a Computer” on page 137  
⇒ “Installing the Latest Applications” on page 175

---

**Application for Sending Faxes (PC-FAX Driver)**

PC-FAX driver is an application that allows you to send a document created on a separate application as a fax directly from the computer. PC-FAX driver is installed when you install FAX Utility. See the application’s help for details.

**Note:**

- Windows Server operating systems are not supported.  
- The operation differs depending on the application you used to create the document. See the application’s help for details.

**Accessing from Windows**

In the application, select **Print** or **Print Setup** from the **File** menu. Select your printer (FAX), and then click **Preferences** or **Properties**.

**Accessing from Mac OS**

In the application, select **Print** from the **File** menu. Select your printer (FAX) as the **Printer** setting, and then select **Fax Settings** or **Recipient Settings** from the pop-up menu.

**Related Information**

⇒ “Sending a Fax from a Computer” on page 133  
⇒ “Application for Configuring Fax Operations and Sending Faxes (FAX Utility)” on page 171

---

**Application for Laying Out Photos (Epson Easy Photo Print)**

Epson Easy Photo Print is an application that allows you to easily print photos with various layouts. You can preview the photo image and adjust the images or position. You can also print photos with a frame. See the application’s help for details.

By printing on genuine Epson photo paper, the ink quality is maximized and the printouts are vivid and clear.

To perform borderless printing using a commercially available application, make the following settings.

- Create image data to fit the paper size. If a margin setting is available in the application you are using, set the margin to 0 mm.
- Enable the borderless printing setting in the printer driver.
Network Service and Software Information

Note:
- Windows Server operating systems are not supported.
- To use this application, the printer driver needs to be installed.

Starting on Windows
- Windows 10
  Click the start button, and then select **Epson Software > Epson Easy Photo Print**.
- Windows 8.1/Windows 8
  Enter the application name in the search charm, and then select the displayed icon.
- Windows 7/Windows Vista/Windows XP
  Click the start button, and then select **All Programs or Programs > Epson Software > Epson Easy Photo Print**.

Starting on Mac OS
Go > Applications > Epson Software > Epson Easy Photo Print.

Related Information
- “Installing the Latest Applications” on page 175

Application for Printing Web Pages (E-Web Print)
E-Web Print is an application that allows you to easily print web pages with various layouts. See the application’s help for details. You can access the help from the **E-Web Print** menu on the **E-Web Print** tool bar.

Note:
- Windows Server operating systems are not supported.
- Check for supported browsers and the latest version from the download site.

Starting
When you install E-Web Print, it is displayed in your browser. Click **Print** or **Clip**.

Related Information
- “Installing the Latest Applications” on page 175

Application for Scanning and Transferring Images (Easy Photo Scan)
Easy Photo Scan is an application that allows you to scan photos and easily send the scanned image to a computer or cloud service. You can also easily adjust the scanned image. See the application's help for details.

Note:
To use this application, the scanner driver Epson Scan 2 needs to be installed.
Starting on Windows

- Windows 10
  Click the start button, and then select Epson Software > Easy Photo Scan.

- Windows 8.1/Windows 8
  Enter the application name in the search charm, and then select the displayed icon.

- Windows 7/Windows Vista/Windows XP
  Click the start button, and then select All Programs or Programs > Epson Software > Easy Photo Scan.

Starting on Mac OS

Select Go > Applications > Epson Software > Easy Photo Scan.

Software Update Tools (EPSON Software Updater)

EPSON Software Updater is an application that checks for new or updated software on the internet and installs it. You can also update the printer's firmware and manual.

Note:
Windows Server operating systems are not supported.

Installing Method

Download EPSON Software Updater from the Epson website.

If you are using a Windows computer and cannot to download it from the website, you can install it from the supplied software disc.

http://www.epson.com

Starting on Windows

- Windows 10
  Click the start button, and then select Epson Software > EPSON Software Updater.

- Windows 8.1/Windows 8
  Enter the application name in the search charm, and then select the displayed icon.

- Windows 7/Windows Vista/Windows XP
  Click the start button, and then select All Programs or Programs > Epson Software > EPSON Software Updater.

Note:
You can also start EPSON Software Updater by clicking the printer icon on the task bar on the desktop, and then selecting Software Update.

Starting on Mac OS

Select Go > Applications > Epson Software > EPSON Software Updater.
Application for Configuring Multiple Devices (EpsonNet Config)

EpsonNet Config is an application that allows you to set the network interface addresses and protocols. See the operations guide for EpsonNet Config or the application’s help for more details.

**Starting on Windows**

- **Windows 10/Windows Server 2016**
  
  Click the start button, and then select **EpsonNet > EpsonNet Config**.

  
  Enter the application name in the search charm, and then select the displayed icon.

  
  Click the start button, and select **All Programs or Programs > EpsonNet > EpsonNet Config SE > EpsonNet Config**.

**Starting on Mac OS**

Go > Applications > Epson Software > EpsonNet > EpsonNet Config SE > EpsonNet Config.

**Installing the Latest Applications**

*Note:*

_When reinstalling an application, you need to uninstall it first._

1. Make sure the printer and the computer are available for communication, and the printer is connected to the Internet.
2. Start EPSON Software Updater. The screenshot is an example on Windows.

3. For Windows, select your printer, and then click to check for the latest available applications.

4. Select the items you want to install or update, and then click the install button.

**Important:**

Do not turn off or unplug the printer until the update is complete; otherwise, the printer may malfunction.

**Note:**

- You can download the latest applications from the Epson website. [http://www.epson.com](http://www.epson.com)
- If you use Windows Server operating systems, you cannot use EPSON Software Updater. Download the latest applications from the Epson website.

**Related Information**

- “Software Update Tools (EPSON Software Updater)” on page 174
- “Uninstalling Applications” on page 177

**Updating the Printer's Firmware using the Control Panel**

If the printer is connected to the Internet, you can update the printer's firmware using the control panel. You can also set the printer to regularly check for firmware updates and notify you if any are available.

1. Select Settings on the home screen.
2. Select **Firmware Update** > **Update**.

   **Note:**
   Enable Notification to set the printer to regularly check for available firmware updates.

3. Check the message displayed on the screen and tap **Start Checking** to start searching for available updates.

4. If a message is displayed on the LCD screen informing you that a firmware update is available, follow the on-screen instructions to start the update.

   ![Important:
   - Do not turn off or unplug the printer until the update is complete; otherwise, the printer may malfunction.
   - If the firmware update is not completed or is unsuccessful, the printer does not start up normally and "Recovery Mode" is displayed on the LCD screen the next time the printer is turned on. In this situation, you need to update the firmware again using a computer. Connect the printer to the computer with a USB cable. While "Recovery Mode" is displayed on the printer, you cannot update the firmware over a network connection. On the computer, access your local Epson website, and then download the latest printer firmware. See the instructions on the website for the next steps.]

---

**Uninstalling Applications**

Log in to your computer as an administrator. Enter the administrator password if the computer prompts you.

**Uninstalling Applications - Windows**

1. Press the \( \bigcirc \) button to turn off the printer.

2. Quit all running applications.

3. Open **Control Panel**:
   - Windows 10/Windows Server 2016
     Right-click the start button or press and hold it, and then select **Control Panel**.
     Select **Desktop** > **Settings** > **Control Panel**.
     Click the start button and select **Control Panel**.

4. Open **Uninstall a program** (or **Add or Remove Programs**):
     Select **Uninstall a program** in **Programs**.
     Click **Add or Remove Programs**.
5. Select the application you want to uninstall.
   You cannot uninstall the printer driver if there is any print jobs. Delete or wait to be printed the jobs before uninstalling.

6. Uninstall the applications:
     Click Uninstall/Change or Uninstall.
     Click Change/Remove or Remove.

   Note:
   *If the User Account Control window is displayed, click Continue.*

7. Follow the on-screen instructions.

**Uninstalling Applications - Mac OS**

1. Download the Uninstaller using EPSON Software Updater.
   Once you have downloaded the Uninstaller, you do not need to download it again each time you uninstall the application.

2. Press the *button to turn off the printer.

3. To uninstall the printer driver or PC-FAX driver, select **System Preferences** from the **menu > Printers & Scanners** (or **Print & Scan, Print & Fax**), and then remove the printer from the enabled printers list.

4. Quit all running applications.

5. Select **Go > Applications > Epson Software > Uninstaller**.

6. Select the application you want to uninstall, and then click **Uninstall**.

   **Important:**
   The Uninstaller removes all drivers for Epson inkjet printers on the computer. If you use multiple Epson inkjet printers and you only want to delete some drivers, delete all of them first, and then install the necessary printer driver again.

   **Note:**
   If you cannot find the application you want to uninstall in the application list, you cannot uninstall using the Uninstaller. In this situation, select **Go > Applications > Epson Software**, select the application you want to uninstall, and then drag it to the trash icon.

**Related Information**

- “Software Update Tools (EPSON Software Updater)” on page 174
Printing Using a Network Service

By using Epson Connect service available on the Internet, you can print from your smartphone, tablet PC, or laptop, anytime and practically anywhere. To use this service, you need to register the user and the printer in Epson Connect.

The features available on the Internet are as follows.

- **Email Print**
  When you send an email with attachments such as documents or images to an email address assigned to the printer, you can print that email and the attachments from remote locations such as your home or office printer.

- **Epson iPrint**
  This Application is for iOS and Android, and allows you to print or scan from a smart phone or tablet. You can print documents, images, and websites by sending them directly to a printer on the same wireless LAN.

- **Scan to Cloud**
  This application allows you to send the scanned data you want to print to another printer. You can also upload the scanned data to available Cloud services.

- **Remote Print Driver**
  This is a shared driver supported by Remote Print Driver. When printing using a printer in a remote location, you can print by changing the printer on the usual applications window.

See the Epson Connect web portal for details.

Solving Problems

Checking the Printer Status

Checking Messages on the LCD Screen

If an error message is displayed on the LCD screen, follow the on-screen instructions or the solutions below to solve the problem.

<table>
<thead>
<tr>
<th>Error Messages</th>
<th>Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printer Error</td>
<td>Turn on the printer again. See your documentation for more details.</td>
</tr>
<tr>
<td>Paper out in XX</td>
<td>Load paper, and then insert the paper cassette all the way.</td>
</tr>
<tr>
<td>You need to replace Ink Cartridge</td>
<td>To ensure you receive premium print quality and to help protect your print head, a variable ink safety reserve remains in the cartridge when your printer indicates it is time to replace the cartridge. Replace the cartridge when you are prompted to do so.</td>
</tr>
<tr>
<td>The printer’s borderless printing ink pad is nearing the end of its service life. It is not a user-replaceable part. Please contact Epson support.</td>
<td>Contact Epson or an authorised Epson service provider to replace the borderless printing ink pad*. It is not a user-serviceable part. The message will be displayed until the ink pad is replaced. Tap OK to resume printing.</td>
</tr>
<tr>
<td>The printer’s borderless printing ink pad has reached the end of its service life. It is not a user-replaceable part. Please contact Epson support.</td>
<td>Contact Epson or an authorised Epson service provider to replace the borderless printing ink pad*. It is not a user-serviceable part. However, non-printing features such as scanning are available.</td>
</tr>
<tr>
<td>Paper Setup Auto Display is set to Off. Some features may not be available. For details, see your documentation.</td>
<td>If Paper Setup Auto Display is disabled, you cannot use AirPrint.</td>
</tr>
<tr>
<td>No dial tone is detected.</td>
<td>This problem might be resolved by selecting Settings &gt; General Settings &gt; Fax Settings &gt; Basic Settings &gt; Line Type and then selecting PBX. If your phone system requires an external access code to get an outside line, set the access code after selecting PBX. Use # (hash) instead of the actual access code when entering an outside fax number. This makes connection more secure. If the error message is still displayed, set the Dial Tone Detection settings to disabled. However, disabling this feature may drop the first digit of a fax number and send the fax to the wrong number.</td>
</tr>
<tr>
<td>The combination of the IP address and the subnet mask is invalid. See your documentation for more details.</td>
<td>Enter the correct IP address or default gateway. Contact the person who setup the network for assistance.</td>
</tr>
<tr>
<td>To use cloud services, update the root certificate from the Epson Web Config utility.</td>
<td>Run Web Config, and then update the root certificate.</td>
</tr>

</tbody>
</table>

* In some print cycles a very small amount of surplus ink may be collected in the ink pad. To prevent ink leakage from the pad, the product is designed to stop printing when the pad has reached its limit. Whether and how often this is required will vary according to the number of pages you print using the borderless print option. The need for replacement of the pad does not mean that your printer has ceased to operate in accordance with its specifications. The printer will advise you when the pad requires replacing and this can only be performed by an authorised Epson Service provider. The Epson warranty does not cover the cost of this replacement.

Removing Jammed Paper

Follow the on-screen instructions on the printer’s control panel to locate and remove the jammed paper including any torn pieces. The LCD screen displays an animation that shows you how to remove jammed paper.

⚠️ Caution:
Never touch the buttons on the control panel while your hand is inside the printer. If the printer starts operating, it could cause an injury. Be careful not to touch the protruding parts to avoid injury.

⚠️ Important:
Remove the jammed paper carefully. Removing the paper vigorously may cause damage to the printer.

Paper Does Not Feed Correctly

Check the following points, and then take the appropriate actions to solve the problem.

- Place the printer on a flat surface and operate in the recommended environmental conditions.
- Use paper supported by this printer.
- Follow the paper handling precautions.
- Do not load more than the maximum number of sheets specified for the paper.
- Make sure the paper size and paper type settings match the actual paper size and paper type loaded in the printer.
- Clean the roller inside the printer.

Related Information
- “Environmental Specifications” on page 217
- “Paper Handling Precautions” on page 44

- “Placing Originals on the ADF” on page 50
Power and Control Panel Problems

Power Does Not Turn On

- Make sure the power cord is securely plugged in.
- Hold down the button for a little longer.

Power Does Not Turn Off

Hold down the button for a little longer. If you still cannot turn off the printer, unplug the power cord. To prevent the print head from drying out, turn the printer back on and turn it off by pressing the button.

Power Turns Off Automatically

- Select Settings > General Settings > Basic Settings > Power Off Settings, and then disable the Power Off If Inactive and Power Off If Disconnected settings.
- Select Settings > General Settings > Basic Settings, and then disable the Power Off Timer setting.

Note:
Your product may have the Power Off Settings or Power Off Timer feature depending on the location of purchase.

LCD Screen Gets Dark

The printer is in sleep mode. Tap anywhere on the LCD screen to return it to its former state.

Cannot Print from a Computer

Checking the Connection (USB)

- Connect the USB cable securely to the printer and the computer.
- If you are using a USB hub, try to connect the printer directly to the computer.
- If the USB cable cannot be recognized, change the port, or change the USB cable.
If the printer cannot print using a USB connection, try the following.

Disconnect the USB cable from the computer. Right-click on the printer icon displayed on the computer, and then select **Remove Device**. Next, connect the USB cable to the computer and try a test print.

Re-set the USB connection by following the steps in this manual for changing the connection method to a computer. See the related information link below for details.

---

**Related Information**

- "Changing the Connection Method to a Computer" on page 39

---

**Checking the Connection (Network)**

- When you have changed your access point or provider, try making network settings for the printer again. Connect the computer or smart device to the same SSID as the printer.

- Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; access point, computer or smart device, and then printer. Move the printer and computer or smart device closer to the access point to help with radio wave communication, and then try to make network settings again.

- Print the network connection report. See the related information link below for details. If the report shows that the network connection failed, check the network connection report and then follow the printed solutions.

- If the IP address assigned to the printer is 169.254.XXX.XXX, and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly. Restart the access point or reset the network settings for the printer. If this does not solve the problem, see the documentation for the access point.

- Try accessing any website from your computer to make sure that your computer’s network settings are correct. If you cannot access any website, there is a problem on the computer. Check the network connection of the computer.

---

Checking the Software and Data

- Make sure that a genuine Epson printer driver is installed. If a genuine Epson printer driver is not installed, the available functions are limited. We recommend using a genuine Epson printer driver. See the related information link below for details.

- If you are printing a large data size image, the computer may run out of memory. Print the image at a lower resolution or a smaller size.

Related Information

- “Checking for Genuine Epson Printer Drivers” on page 186
- “Installing the Latest Applications” on page 175

Checking for Genuine Epson Printer Drivers

You can check if a genuine Epson printer driver is installed on your computer by using one of the following methods.

Windows

Select Control Panel > View devices and printers (Printers, Printers and Faxes), and then do the following to open the print server properties window.

  - Click the printer icon, and then click Print server properties at the top of the window.

- Windows Vista/Windows Server 2008
  - Right-click on the Printers folder, and then click Run as administrator > Server Properties.

  - From the File menu, select Server Properties.
Click the **Driver** tab. If your printer name is displayed in the list, a genuine Epson printer driver is installed on your computer.

![Image of Printer Properties](image1)

**Mac OS**

Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan, Print & Fax**), and then select the printer. Click **Options & Supplies**, and if the **Options** tab and **Utility** tab are displayed on the window, a genuine Epson printer driver is installed on your computer.

![Image of Printer Options](image2)

**Related Information**

- “Installing the Latest Applications” on page 175
Checking the Printer Status from the Computer (Windows)

Click **Print Queue** on the printer driver’s **Maintenance** tab, and then check the following.

- Check if there are any paused print jobs.
  - If unnecessary data remains, select **Cancel all documents** from the **Printer** menu.
- Make sure the printer is not offline or pending.
  - If the printer is offline or pending, clear the offline or pending setting from the **Printer** menu.

- Make sure the printer is selected as the default printer from the **Printer** menu (there should be a check mark on the menu item).
  - If the printer is not selected as the default printer, set it as the default printer. If there are multiple icons in **Control Panel > View devices and printers** (*Printers, Printers and Faxes*), see the following to select the icon.
    - Example)
      - USB connection: EPSON XXXX Series
      - Network connection: EPSON XXXX Series (network)
    - If you install the printer driver multiple times, copies of printer driver may be created. If copies such as "EPSON XXXX Series (copy 1)" are created, right-click the copied driver icon, and then click **Remove Device**.
- Make sure the printer port is selected correctly in **Property > Port** from the **Printer** menu as follows.
  - Select "USBXXX" for a USB connection, or "EpsonNet Print Port" for a network connection.

Checking the Printer Status from the Computer (Mac OS)

Make sure the printer status is not **Pause**.

Select **System Preferences** from the **menu > Printers & Scanners** (or **Print & Scan, Print & Fax**), and then double-click the printer. If the printer is paused, click **Resume** (or **Resume Printer**).
When You Cannot Make Network Settings

- Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; access point, computer or smart device, and then printer. Move the printer and computer or smart device closer to the access point to help with radio wave communication, and then try to make network settings again.

- Select Settings > General Settings > Network Settings > Connection Check, and then print the network connection report. If an error has occurred, check the network connection report and then follow the printed solutions.

Related Information

⇒ “Printing a Network Connection Report” on page 31
⇒ “Messages and Solutions on the Network Connection Report” on page 32

Cannot Connect from Devices Even Though Network Settings are No Problems

If you cannot connect from the computer or smart device to the printer even though the network connection report does not show any problems, see the following.

- When you are using multiple access points at the same time, you may not be able to use the printer from the computer or smart device depending on the settings of the access points. Connect the computer or smart device to the same access point as the printer.
  
  Disable the tethering function on the smart device if it is enabled.
You may not be able to connect to the access point when the access point has multiple SSIDs and devices are connected to different SSIDs on the same access point. Connect the computer or smart device to the same SSID as the printer.

An access point that is compliant with both IEEE802.11a and IEEE802.11g has SSIDs of 2.4 GHz and 5 GHz. If you connect the computer or smart device to a 5 GHz SSID, you cannot connect to the printer because the printer only supports communication over 2.4 GHz. Connect the computer or smart device to the same SSID as the printer.

Most access points have a privacy separator feature that blocks communication between connected devices. If you cannot communicate between the printer and the computer or smart device even if they are connected to the same network, disable the privacy separator on the access point. See the manual provided with the access point for details.
Checking the SSID Connected to the Printer

Select Settings > General Settings > Network Settings > Network Status.
You can check the SSID for Wi-Fi and Wi-Fi Direct from each menu.

Checking the SSID for the Computer

Windows

Click in the task tray on the desktop. Check the name of the connected SSID from the list displayed.
### Mac OS

Click the Wi-Fi icon at the top of the computer screen. A list of SSIDs is displayed and the connected SSID is indicated with a check mark.

![Wi-Fi Icon and List](image)

### Cannot Print from an iPhone or iPad

- Connect the iPhone or iPad to the same network (SSID) as the printer.
- Enable **Paper Setup Auto Display** in the following menus:
  - Settings > General Settings > Printer Settings > Paper Source Settings > Paper Setup Auto Display
- Enable the AirPrint setting on Web Config.

**Related Information**

- “Connecting to a Smart Device” on page 24
- “Application for Configuring Printer Operations (Web Config)” on page 168

### Printout Problems

#### Printout is Scuffed or Color is Missing

If you have not used the printer for a long time, the print head nozzles may be clogged and ink drops may not be discharged. Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged.

**Related Information**

- “Checking and Cleaning the Print Head” on page 158
Banding or Unexpected Colors Appear

The print head nozzles may be clogged. Perform a nozzle check to check if the print head nozzles are clogged. Clean the print head if any of the print head nozzles are clogged.

Related Information
- “Checking and Cleaning the Print Head” on page 158

Colored Banding Appears at Intervals of Approximately 3.3 cm

- Select the appropriate paper type setting for the type of paper loaded in the printer.
- Align the print head using the Horizontal Alignment feature.
- When printing on plain paper, print using a higher quality setting.

Related Information
- “List of Paper Type” on page 48
- “Aligning the Print Head” on page 159
Blurry Prints, Vertical Banding, or Misalignment

Align the print head using the Vertical Alignment feature.

Related Information
⇒ “Aligning the Print Head” on page 159

Print Quality Does Not Improve Even After Aligning the Print Head

During bidirectional (or high speed) printing, the print head prints while moving in both directions, and vertical lines may be misaligned. If print quality does not improve, disable the bidirectional (or high speed) setting. Disabling this setting may slow down printing speed.

- Windows
  Clear High Speed on the printer driver’s More Options tab.

- Mac OS
  Select System Preferences from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer. Click Options & Supplies > Options (or Driver). Select Off as the High Speed Printing setting.

Print Quality is Poor

Check the following if the print quality is poor due to blurry prints, banding, missing colors, faded colors, and misalignment in the prints.

Checking the printer
- Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged.
- Align the print head.

Checking the paper
- Use paper supported by this printer.
- Do not print on paper that is damp, damaged, or too old.
- If the paper is curled or the envelope is puffed up, flatten it.
- Do not stack the paper immediately after printing.
- Dry the printouts completely before filing or displaying them. When drying the printouts, avoid direct sun light, do not use a dryer, and do not touch the printed side of paper.
When printing images or photos, Epson recommends using genuine Epson paper rather than plain paper. Print on the printable side of the genuine Epson paper.

**Checking the print settings**
- Select the appropriate paper type setting for the type of paper loaded in the printer.
- Print using a higher quality setting.

**Checking the ink cartridge**
- Epson recommends using the ink cartridge before the date printed on the package.
- For best results, use up ink cartridge within six months of opening the package.
- Try to use genuine Epson ink cartridges. This product is designed to adjust colors based on the use of genuine Epson ink cartridges. The use of non-genuine ink cartridges may cause print quality to decline.

**Related Information**

- “Available Paper and Capacities” on page 43
- “List of Paper Type” on page 48
- “Paper Handling Precautions” on page 44

**Paper Is Smeared or Scuffed**
- When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.

- When vertical banding appears or the paper is smeared, clean the paper path.
When the problem cannot be cleared after cleaning the paper path, the part inside the printer that is shown in the illustration is smeared. Turn off the printer, and then wipe off the ink using a cotton swab.

Do not touch the white flat cable, translucent film, and ink tubes inside the printer. Doing so may cause a malfunction.

Place the paper on a flat surface to check if it is curled. If it is, flatten it.

When performing manual 2-sided printing, make sure that the ink is completely dry before reloading the paper.

Related Information
- “Loading Paper in the Paper Cassette” on page 45
- “Cleaning the Paper Path for Ink Smears” on page 161

Paper is Smeared During Automatic 2-Sided Printing

When using the automatic 2-sided printing feature and printing high density data such as images and graphs, set the print density to lower and the drying time to longer.

Related Information

➤ “Printing Basics” on page 82

Edges of the Image are Cropped During Borderless Printing

During borderless printing, the image is slightly enlarged and the protruding area is cropped. Select a smaller enlargement setting.

❑ Control panel
   Change the Expansion setting.

❑ Windows
   Click Settings next to the Borderless checkbox on the printer driver’s Main tab, and then change the settings.

❑ Mac OS
   Change the Expansion setting from the print dialog’s Print Settings menu.

Related Information

➤ “Advanced Menu Options for Copying” on page 96
Solving Problems

The Position, Size, or Margins of the Printout Are Incorrect

- Load paper in the correct direction, and slide the edge guides against the edges of the paper.
- When placing the originals on the scanner glass, align the corner of the original with the corner indicated by a symbol on the frame of the scanner glass. If the edges of the copy are cropped off, move the original slightly away from the corner.
- When placing the originals on the scanner glass, clean the scanner glass and the document cover. If there is dust or stains on the glass, the copy area may extend to include the dust or stains, resulting in the wrong copying position or small images.
- Select the appropriate Original Size in the copy settings.
- Select the appropriate paper size setting.
- Adjust the margin setting in the application so that it falls within the printable area.

Related Information
- “Loading Paper in the Paper Cassette” on page 45
- “Placing Originals on the Scanner Glass” on page 51
- “Cleaning the Scanner Glass” on page 164
- “Printable Area” on page 212

Printed Characters Are Incorrect or Garbled

- Connect the USB cable securely to the printer and the computer.
- Cancel any paused print jobs.
- Do not put the computer manually into the Hibernate mode or the Sleep mode while printing. Pages of garbled text may be printed next time you start the computer.
- If you use the printer driver you had previously used, printed characters may be garbled. Make sure that the printer driver you are using is for this printer. Check the printer name on the top of the printer driver window.

The Printed Image Is Inverted

Clear any mirror image settings in the printer driver or the application.

- Windows
  - Clear Mirror Image on the printer driver’s More Options tab.
- Mac OS
  - Clear Mirror Image from the print dialog’s Print Settings menu.

Mosaic-Like Patterns in the Prints

When printing images or photos, print using high-resolution data. Images on websites are often low resolution although they look good enough on the display, and so print quality may decline.
Uneven Colors, Smears, Dots, or Straight Lines Appear in the Copied Image

- Clean the paper path.
- Clean the scanner glass.
- Clean the ADF.
- Do not press too hard on the original or the document cover when you are placing the originals on the scanner glass.
- When the paper is smeared, lower the copy density setting.

Related Information
- “Cleaning the Paper Path for Ink Smears” on page 161
- “Cleaning the Scanner Glass” on page 164
- “Cleaning the ADF” on page 163
- “Basic Menu Options for Copying” on page 96

Moiré (Cross-Hatch) Patterns Appear in the Copied Image

Change the reduce and enlarge setting or place the original at a slightly different angle.

Related Information
- “Basic Menu Options for Copying” on page 96

An Image of the Reverse Side of the Original Appears in the Copied Image

- For a thin original, place the original on the scanner glass and then place a piece of black paper over it.
- Lower the copy density setting on the control panel.

Related Information
- “Basic Menu Options for Copying” on page 96

The Printout Problem Could Not be Cleared

If you have tried all of the solutions and have not solved the problem, try uninstalling and then reinstalling the printer driver.

Related Information
- “Uninstalling Applications” on page 177
- “Installing the Latest Applications” on page 175
Other Printing Problems

Printing Is Too Slow

- Close any unnecessary applications.
- Lower the quality setting. High quality printing slows down the printing speed.
- Enable the bidirectional (or high speed) setting. When this setting is enabled, the print head prints while moving in both directions, and the printing speed increases.
  - Windows
    Select **High Speed** on the printer driver’s **More Options** tab.
  - Mac OS
    Select **System Preferences** from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select **On** as the **High Speed Printing** setting.
- Disable quiet mode. This feature slows down the printing speed.
  - Control Panel
    Select **ON** on the home screen, and then disable **Quiet Mode**.
  - Windows
    Select **Off** as the **Quiet Mode** setting on the printer driver’s **Main** tab.
  - Mac OS
    Select **System Preferences** from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select **Off** as the **Quiet Mode** setting.

Printing slows down dramatically during continuous printing

Printing slows down to prevent the printer mechanism from overheating and being damaged. However, you can continue printing. To return to normal printing speed, leave the printer idle for at least 30 minutes. Printing speed does not return to normal if the power is off.

Cannot Cancel Printing from a Computer Running Mac OS X v10.6.8

If you want to stop printing from your computer, make the following settings.

Run Web Config, and then select **Port9100** as the **Top Priority Protocol** setting in **AirPrint Setup**. Select **System Preferences** from the menu > Printers & Scanners (or Print & Scan, Print & Fax), remove the printer, and then add the printer again.

Cannot Start Scanning

- If you are scanning with the ADF, check that the document cover and ADF cover are closed.
You cannot use ADF when scanning from Photo Mode in Epson Scan 2.

Connect the USB cable securely to the printer and the computer. If you are using a USB hub, try to connect the printer directly to the computer.

If you scan at a high resolution over a network, a communication error may occur. Lower the resolution.

Make sure that the correct printer (scanner) is selected on Epson Scan 2.

Check whether or not the printer is recognized when using Windows

In Windows, make sure the printer (scanner) is displayed in Scanner and Camera. The printer (scanner) should be displayed as “EPSON XXXXX (printer name)”. If the printer (scanner) is not displayed, uninstall and then re-install Epson Scan 2. See the following to access Scanner and Camera.

Windows 10
Right-click the start button or press and hold it, select Control Panel, enter “Scanner and Camera” in the search charm, click View scanners and cameras, and then check if the printer is displayed.

Select Desktop > Settings > Control Panel, enter "Scanner and Camera" in the search charm, click Show Scanner and Camera, and then check if the printer is displayed.

Windows 7/Windows Server 2008 R2
Click the start button and select Control Panel, enter "Scanner and Camera" in the search charm, click View scanners and cameras, and then check if the printer is displayed.

Windows Vista/Windows Server 2008
Click the start button, select Control Panel > Hardware and Sound > Scanners and Cameras, and then check if the printer is displayed.

Click the start button, select Control Panel > Printers and Other Hardware > Scanner and Cameras, and then check if the printer is displayed.

Scanned Image Problems

Uneven Colors, Dirt, Spots, and so on Appear when Scanning from the Scanner Glass

Clean the scanner glass.

Remove any trash or dirt that adheres to the original.

Do not press with too much force on the original or the document cover. If you press with too much force, blurring, smudges, and spots may occur.
Related Information

“Cleaning the Scanner Glass” on page 164

Straight Lines Appear when Scanning from ADF

- Clean the ADF.
  Straight lines may appear in the image when trash or dirt gets into the ADF.
- Remove any trash or dirt that adheres to the original.

Related Information

“Cleaning the ADF” on page 163

The Image Quality Is Rough

- Set the **Mode** in Epson Scan 2 according to the original you want to scan. Scan using the settings for documents in **Document Mode**, and the settings for photos in **Photo Mode**.
- In Epson Scan 2, adjust the image using items on the **Advanced Settings** tab, and then scan.
- If the resolution is low, try increasing the resolution and then scanning.

Related Information

“Scanning Using Epson Scan 2” on page 107

Offset Appears in the Background of Images

Images on the back of the original may appear in the scanned image.

- In Epson Scan 2, select the **Advanced Settings** tab, and then adjust the **Brightness**.
  This feature may not be available depending on the settings on the **Main Settings** tab > **Image Type** or other settings on the **Advanced Settings** tab.
- In **Document Mode** in Epson Scan 2, select the **Advanced Settings** tab, and then **Image Option** > **Text Enhancement**.
- When scanning from the scanner glass, place black paper or a desk pad over the original.

Related Information

“Scanning Using Epson Scan 2” on page 107
“Placing Originals” on page 49

Text is Blurred

- In **Document Mode** in Epson Scan 2, select the **Advanced Settings** tab, and then **Image Option** > **Text Enhancement**.
Select **Document Mode** as the **Mode** in Epson Scan 2. Scan using the settings for documents in **Document Mode**.

In **Document Mode** in Epson Scan 2, when **Image Type** on the **Main Settings** tab is set to **Black & White**, adjust **Threshold** on the **Advanced Settings** tab. When you increase the **Threshold**, the black color area becomes larger.

If the resolution is low, try increasing the resolution and then scanning.

### Related Information
- “Scanning Using Epson Scan 2” on page 107

---

**Moiré Patterns (Web-Like Shadows) Appear**

If the original is a printed document, moiré patterns (web-like shadows) may appear in the scanned image.

On the **Advanced Settings** tab in Epson Scan 2, set **Descreening**.

Change the resolution, and then scan again.

### Related Information
- “Scanning Using Epson Scan 2” on page 107

---

**Cannot Scan the Correct Area on the Scanner Glass**

Make sure the original is placed correctly against the alignment marks.

If the edge of the scanned image is missing, move the original slightly away from the edge of the scanner glass.

When placing multiple originals on the scanner glass, make sure there is a gap of at least 20 mm (0.79 in.) between the originals.

When scanning from the control panel and selecting the auto scan area cropping function, remove any trash or dirt from the scanner glass and document cover. If there is any trash or dirt around the original, the scanning range expands to include it.

Solving Problems

Text is Not Recognized Correctly when Saving as a Searchable PDF

- On the Image Format Options window in Epson Scan 2, check that Text Language is set correctly on the Text tab.
- Check that the original is placed straight.
- Use an original with clear text. Text recognition may decline for the following types of originals.
  - Originals that have been copied a number of times
  - Originals received by fax (at low resolutions)
  - Originals on which the letter spacing or line spacing is too small
  - Originals with ruled lines or underlining over the text
  - Originals with hand-written text
  - Originals with creases or wrinkles
- In Document Mode in Epson Scan 2, when Image Type on the Main Settings tab is set to Black & White, adjust Threshold on the Advanced Settings tab. When you increase the Threshold, black becomes stronger.
- In Document Mode in Epson Scan 2, select the Advanced Settings tab, and then Image Option > Text Enhancement.

Related Information

Cannot Solve Problems in the Scanned Image

If you have tried all of the solutions and have not solved the problem, initialize the Epson Scan 2 settings using Epson Scan 2 Utility.

Note:
Epson Scan 2 Utility is an application that comes with Epson Scan 2.

1. Start Epson Scan 2 Utility.
   - Windows 10/Windows Server 2016
     Click the start button, and then select EPSON > Epson Scan 2 Utility.
     Enter the application name in the search charm, and then select the displayed icon.
     Click the start button, and then select All Programs or Programs > EPSON > Epson Scan 2 > Epson Scan 2 Utility.
   - Mac OS
     Select Go > Applications > Epson Software > Epson Scan 2 Utility.
2. Select the Other tab.
3. Click Reset.

   Note: 
   If initialization does not solve the problem, uninstall and re-install Epson Scan 2.

Other Scanning Problems

Scanning Is Too Slow

Lower the resolution.

Related Information

➤ “Scanning Using Epson Scan 2” on page 107

Scanning Stops when Scanning to PDF/Multi-TIFF

☐ When scanning using Epson Scan 2, you can continuously scan up to 999 pages in PDF format and up to 200 pages in Multi-TIFF format.

☐ When scanning large volumes, we recommend scanning in grayscale.

☐ Increase the free space on the computer’s hard disk. Scanning may stop if there is not enough free space.

☐ Try scanning at a lower resolution. Scanning stops if the total data size reaches the limit.

Related Information

➤ “Scanning Using Epson Scan 2” on page 107

Problems when Sending and Receiving Faxes

Cannot Send or Receive Faxes

☐ Use Check Fax Connection on the control panel to run the automatic fax connection check. Try the solutions printed on the report.

☐ Check the Line Type setting. Setting to PBX may solve the problem. If your phone system requires an external access code to get an outside line, register the access code to the printer, and enter # (hash) at the beginning of a fax number when sending.

☐ If a communication error occurs, change the Fax Speed setting to Slow(9,600bps) on the control panel.

☐ Check that the telephone wall jack works by connecting a phone to it and testing it. If you cannot make or receive calls, contact your telecommunication company.
To connect to a DSL phone line, you need to use a DSL modem equipped with a built-in DSL filter, or install a separate DSL filter to the line. Contact your DSL provider.

If you are connecting to a DSL phone line, connect the printer directly to a telephone wall jack to see if the printer can send a fax. If it works, the problem may be caused by the DSL filter. Contact your DSL provider.

Enable the ECM setting on the control panel. Color faxes cannot be sent or received when ECM is off.

To send or receive faxes using the computer, make sure that the printer is connected using a USB cable or a network, and that the PC-FAX Driver have been installed on the computer. The PC-FAX Driver is installed together with FAX Utility.

In Windows, make sure the printer (fax) is displayed in Devices and Printers, Printer, or Printers and Other Hardware. The printer (fax) is displayed as "EPSON XXXXX (FAX)". If the printer (fax) is not displayed, uninstall and then re-install the FAX Utility. See the following to access Devices and Printers, Printer, or Printers and Other Hardware.

Windows 10
Right-click on the start button, or press and hold it and then select Control Panel > View devices and printers in Hardware and Sound.

Windows 8.1/Windows 8
Select Desktop > Settings > Control Panel > View devices and printers in Hardware and Sound or Hardware.

Windows 7
Click the start button, and select Control Panel > View devices and printers in Hardware and Sound or Hardware.

Windows Vista
Click the start button, and select Control Panel > Printers in Hardware and Sound.

Windows XP
Click the start button, and select Settings > Control Panel > Printers and Other Hardware > Printers and Faxes.

In Mac OS, check the following.

Select System Preferences from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then make sure the printer (fax) is displayed. The printer (fax) is displayed as "FAX XXXX (USB)" or "FAX XXXX (IP)". If the printer (fax) is not displayed, click [+] and then register the printer (fax).

Select System Preferences from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then double-click the printer (fax). If the printer is paused, click Resume (or Resume Printer).

Cannot Send Faxes

- Set up the header information for outgoing faxes on the control panel. Some fax machines automatically reject incoming faxes that do not include header information.
- If you have blocked your caller ID, unblock it. Some phones or fax machines automatically reject anonymous calls.
- Ask the recipient if the fax number is correct and the recipient's fax machine is ready to receive a fax.

Related Information
- “Basic Settings” on page 146
- “Cannot Send or Receive Faxes” on page 205

Cannot Send Faxes to a Specific Recipient

Check the following if you cannot send faxes to a specific recipient due to an error.

- If the recipient machine does not pick up your call within 50 seconds after the printer has finished dialing, the call ends with an error. Dial using a connected telephone to check how long it takes before you hear a fax tone. If it takes more than 50 seconds, add pauses after the fax number to send the fax. The \( \text{ ignoring symbol } \) is used to enter pauses. A hyphen is entered as the pause mark. One pause is about three seconds. Add multiple pauses as needed.
- If you have selected the recipient from the contacts list, verify that the registered information is correct. If the information is correct, select the recipient from the contacts list, tap \( \text{ clicking symbol } \) > Edit, and then change Fax Communication Mode to Slow(9,600bps).

Related Information
- “Sending Faxes Dialing from the External Phone Device” on page 125

Cannot Receive Faxes

- If you have subscribed to a call forwarding service, the printer may not be able to receive faxes. Contact the service provider.
- If you have not connected a telephone to the printer, set the Receive Mode setting to Auto on the control panel.
Under the following conditions, the printer runs out of memory and cannot receive faxes. See the troubleshooting for information on handling a memory full error.

- The number of received documents has reached the maximum of 100 documents.
- The printer's memory is full (100%).
- Check if the sender's fax number has been registered to the Rejection Number List. Faxes sent from numbers that have been added to this list are blocked when Rejection Number List in Rejection Fax is enabled.
- Ask the sender if header information is set up on their fax machine. Faxes that do not include header information are blocked when Fax Header Blank in Rejection Fax is enabled.
- Check if the sender's fax number is registered in the contacts list. Faxes sent from numbers that have not been registered to this list are blocked when Unregistered Contacts in Rejection Fax is enabled.

Related Information

- “Cannot Send or Receive Faxes” on page 205
- “Memory Full Error Occurs” on page 208

Memory Full Error Occurs

- If the printer has been set to save received faxes in the inbox, delete faxes you have already read from the inbox.
- If the printer has been set to save received faxes on a computer, turn on the computer that is set to save the faxes. Once the faxes are saved in the computer, they are deleted from the printer’s memory.
- Even though the memory is full, you can send a monochrome fax by using the Direct Send feature. Or you can also send a fax by dialing from the external phone device.
- If the printer cannot print a received fax due to a printer error, such as a paper jam, the memory full error may occur. Clear the printer problem, and then contact the sender and ask them to send the fax again.

Sent Fax Quality Is Poor

- Clean the scanner glass.
- Clean the ADF.
- Change the Density setting on the control panel.
- If you are not sure about the capabilities of the recipient fax machine, enable the Direct Send feature or select Fine as the Resolution setting.
- Enable the ECM setting on the control panel.
Solving Problems

Related Information
- “Fax Settings” on page 141
- “Basic Settings” on page 146
- “Cleaning the Scanner Glass” on page 164
- “Cleaning the ADF” on page 163

Faxes Are Sent at the Wrong Size

- When sending a fax using the scanner glass, place the original correctly aligning its corner with the origin mark. Select your original size on the control panel.
- Clean the scanner glass and the document cover. If there is dust or stains on the glass, the scanning area may extend to include the dust or stains, resulting in the wrong scanning position or small images.

Received Fax Quality Is Poor

- Enable the ECM setting on the control panel.
- Contact the sender and ask them to send using a higher quality mode.
- Reprint the received fax. Select Fax > Reprint Faxes to reprint the fax.

Related Information
- “Basic Settings” on page 146

Received Faxes Are Not Printed

- If an error has occurred on the printer, such as a paper jam, the printer cannot print received faxes. Check the printer.
- If the printer has been set to save received faxes in the inbox, the received faxes are not automatically printed. Check the Receive Settings.

Related Information
- “Checking the Printer Status” on page 180
- “Removing Jammed Paper” on page 182
- “Saving Received Faxes in the Inbox” on page 131
Pages are Blank or only a Small Amount of Text is Printed on the Second Page in Received Faxes

You can print on one page by using the Delete Print Data After Split feature in Split Page Settings.
Select Delete Top or Delete Bottom in Delete Print Data After Split, and then adjust Threshold. Increasing the threshold increases the amount deleted; a higher threshold gives you a higher possibility of printing on one page.

Other Faxing Problems

 Cannot Make Calls on the Connected Telephone

Connect the telephone to the EXT. port on the printer, and pick up the receiver. If you cannot hear a dial tone through the receiver, connect the phone cable correctly.

Related Information
⇒ “Connecting Your Phone Device to the Printer” on page 118

Answering Machine Cannot Answer Voice Calls

On the control panel, set the printer's Rings to Answer setting to a number higher than the number of rings for your answering machine.

Related Information
⇒ “Basic Settings” on page 146
⇒ “Settings for the Answering Machine” on page 129

Sender's Fax Number Not Displayed on Received Faxes or the Number Is Wrong

The sender may not have set the fax header information or may have set it incorrectly. Contact the sender.

Other Problems

Slight Electric Shock when Touching the Printer

If many peripherals are connected to the computer, you may feel a slight electric shock when touching the printer. Install a ground wire to the computer that is connected to the printer.
Operation Sounds Are Loud

If operations sounds are too loud, enable Quiet Mode. Enabling this feature may reduce printing speed.

- Control panel
  
  Select OFF on the home screen, and then enable Quiet Mode.

- Windows printer driver
  
  Enable Quiet Mode on the Main tab.

- Mac OS printer driver
  
  Select System Preferences from the menu > Printers & Scanners (or Print & Scan, Print & Fax), and then select the printer. Click Options & Supplies > Options (or Driver). Select On as the Quiet Mode setting.

The Date and Time Are Incorrect

Set the date and the time correctly on the control panel. After a power failure caused by a lightning strike or if the power is left off for a long time, the clock may show the wrong time.

This equipment contains the following wireless module.
Manufacturer: Askey Computer Corporation
Type: WLU6320-D69 (RoHS)

This product conforms to Part 15 of the FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person’s body (excluding extremities: hands, wrists, feet and ankles).

Standards and Approvals for European Model

For European users

Hereby, Seiko Epson Corporation declares that the following radio equipment model is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following website.

http://www.epson.eu/conformity

C623A

For use only in Ireland, UK, Austria, Germany, Liechtenstein, Switzerland, France, Belgium, Luxemburg, Netherlands, Italy, Portugal, Spain, Denmark, Finland, Norway, Sweden, Iceland, Croatia, Cyprus, Greece, Slovenia, Malta, Bulgaria, Czech, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, and Slovakia.

Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the products.
Standards and Approvals for Australian Model

<table>
<thead>
<tr>
<th>EMC</th>
<th>AS/NZS CISPR32 Class B</th>
</tr>
</thead>
<tbody>
<tr>
<td>C623A</td>
<td></td>
</tr>
</tbody>
</table>

Epson hereby declares that the following equipment Models are in compliance with the essential requirements and other relevant provisions of AS/NZS4268:

C623A

Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the products.

German Blue Angel

See the following website to check whether or not this printer meets the standards for the German Blue Angel.

http://www.epson.de/blauerengel

Restrictions on Copying

Observe the following restrictions to ensure the responsible and legal use of the printer.

Copying of the following items is prohibited by law:
- Bank bills, coins, government-issued marketable securities, government bond securities, and municipal securities
- Unused postage stamps, pre-stamped postcards, and other official postal items bearing valid postage
- Government-issued revenue stamps, and securities issued according to legal procedure

Exercise caution when copying the following items:
- Private marketable securities (stock certificates, negotiable notes, checks, etc.), monthly passes, concession tickets, etc.
- Passports, driver’s licenses, warrants of fitness, road passes, food stamps, tickets, etc.

Note:
Copying these items may also be prohibited by law.

Responsible use of copyrighted materials:

Printers can be misused by improperly copying copyrighted materials. Unless acting on the advice of a knowledgeable attorney, be responsible and respectful by obtaining the permission of the copyright holder before copying published material.

Transporting the Printer

When you need to transport the printer to move or for repairs, follow the steps below to pack the printer.

Caution:

Be careful not to trap your hand or fingers when opening or closing the scanner unit. Otherwise you may be injured.
**Important:**

- When storing or transporting the printer, avoid tilting it, placing it vertically, or turning it upside down; otherwise ink may leak.
- Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the printer from printing.

1. Turn off the printer by pressing the $\bigcirc$ button.
2. Make sure the power light turns off, and then unplug the power cord.

**Important:**

Unplug the power cord when the power light is off. Otherwise, the print head does not return to the home position causing the ink to dry, and printing may become impossible.

3. Disconnect all cables such as the power cord and USB cable.
4. Remove all of the paper from the printer.
5. Make sure there are no originals on the printer.
6. Open the scanner unit with the document cover closed. Secure the ink cartridge holder to the case with tape.
7. Close the scanner unit.

8. Prepare to pack the printer as shown below.

9. Pack the printer in its box, using the protective materials.

When you use the printer again, make sure you remove the tape securing the ink cartridge holder. If print quality has declined the next time you print, clean and align the print head.

Where to Get Help

Technical Support Web Site

If you need further help, visit the Epson support website shown below. Select your country or region and go to the support section of your local Epson website. The latest drivers, FAQs, manuals, or other downloadables are also available from the site.

http://support.epson.net/
http://www.epson.eu/Support (Europe)

If your Epson product is not operating properly and you cannot solve the problem, contact Epson support services for assistance.

Contacting Epson Support

Before Contacting Epson

If your Epson product is not operating properly and you cannot solve the problem using the troubleshooting information in your product manuals, contact Epson support services for assistance. If Epson support for your area is not listed below, contact the dealer where you purchased your product.

Epson support will be able to help you much more quickly if you give them the following information:

- Product serial number
  (The serial number label is usually on the back of the product.)
- Product model
- Product software version
  (Click About, Version Info, or a similar button in the product software.)
- Brand and model of your computer
- Your computer operating system name and version
- Names and versions of the software applications you normally use with your product

Note:
Depending on the product, the dial list data for fax and/or network settings may be stored in the product’s memory. Due to breakdown or repair of a product, data and/or settings may be lost. Epson shall not be responsible for the loss of any data, for backing up or recovering data and/or settings even during a warranty period. We recommend that you make your own backup data or take notes.

Help for Users in Europe

Check your Pan-European Warranty Document for information on how to contact Epson support.
Help for Users in Taiwan

Contacts for information, support, and services are:

**World Wide Web**
http://www.epson.com.tw
Information on product specifications, drivers for download, and products enquiry are available.

**Epson HelpDesk**
Phone: +886-2-80242008
Our HelpDesk team can help you with the following over the phone:
- Sales enquiries and product information
- Product usage questions or problems
- Enquiries on repair service and warranty

**Repair service center:**
http://www.tekcare.com.tw/branchMap.page
TekCare corporation is an authorized service center for Epson Taiwan Technology & Trading Ltd.

Help for Users in Australia

Epson Australia wishes to provide you with a high level of customer service. In addition to your product manuals, we provide the following sources for obtaining information:

**Internet URL**
http://www.epson.com.au
Access the Epson Australia World Wide Web pages. Worth taking your modem here for the occasional surf! The site provides a download area for drivers, Epson contact points, new product information and technical support (email).

**Epson Helpdesk**
Phone: 1300-361-054
Epson Helpdesk is provided as a final backup to make sure our clients have access to advice. Operators on the Helpdesk can aid you in installing, configuring and operating your Epson product. Our Pre-sales Helpdesk staff can provide literature on new Epson products and advise where the nearest dealer or service agent is located. Many types of queries are answered here.

We encourage you to have all the relevant information on hand when you ring. The more information you prepare, the faster we can help solve the problem. This information includes your Epson product manuals, type of computer, operating system, application programs, and any information you feel is required.

**Transportation of Product**
Epson recommends retaining product packaging for future transportation.
Help for Users in New Zealand

Epson New Zealand wishes to provide you with a high level of customer service. In addition to your product documentation, we provide the following sources for obtaining information:

Internet URL

http://www.epson.co.nz

Access the Epson New Zealand World Wide Web pages. Worth taking your modem here for the occasional surf! The site provides a download area for drivers, Epson contact points, new product information and technical support (e-mail).

Epson Helpdesk

Phone: 0800 237 766

Epson Helpdesk is provided as a final backup to make sure our clients have access to advice. Operators on the Helpdesk can aid you in installing, configuring and operating your Epson product. Our Pre-sales Helpdesk staff can provide literature on new Epson products and advise where the nearest dealer or service agent is located. Many types of queries are answered here.

We encourage you to have all the relevant information on hand when you ring. The more information you prepare, the faster we can help solve the problem. This information includes your Epson product documentation, type of computer, operating system, application programs, and any information you feel is required.

Transportation of Product

Epson recommends retaining product packaging for future transportation.
