Basics

Read me first

Please read this manual before using the device to ensure safe and proper use.

• Descriptions are based on the device’s default settings.

• Some content may differ from your device depending on the region, service provider, model specifications, or device’s software.

• Content (high quality content) that requires high CPU and RAM usage will affect the overall performance of the device. Apps related to the content may not work properly depending on the device’s specifications and the environment that it is used in.

• Samsung is not liable for performance issues caused by apps supplied by providers other than Samsung.

• Samsung is not liable for performance issues or incompatibilities caused by edited registry settings or modified operating system software. Attempting to customise the operating system may cause the device or apps to work improperly.

• Software, sound sources, wallpapers, images, and other media provided with this device are licensed for limited use. Extracting and using these materials for commercial or other purposes is an infringement of copyright laws. Users are entirely responsible for illegal use of media.

• You may incur additional charges for data services, such as messaging, uploading and downloading, auto-syncing, or using location services depending on your data plan. For large data transfers, it is recommended to use the Wi-Fi feature.

• Default apps that come with the device are subject to updates and may no longer be supported without prior notice. If you have questions about an app provided with the device, contact a Samsung Service Centre. For user-installed apps, contact service providers.
• Modifying the device's operating system or installing softwares from unofficial sources may result in device malfunctions and data corruption or loss. These actions are violations of your Samsung licence agreement and will void your warranty.

• Depending on the region or service provider, a screen protector is attached for protection during production and distribution. Damage to the attached screen protector is not covered by the warranty.

• You can see the touchscreen clearly even in strong outdoor sunlight by automatically adjusting the contrast range based on the surrounding environment. Due to the nature of the product, displaying fixed graphics for extended periods may result in afterimages (screen burn-in) or ghosting.
  – It is recommended not to use fixed graphics on part or all of the touchscreen for extended periods and turn off the touchscreen when not using the device.
  – You can set the touchscreen to turn off automatically when you are not using it. Launch the Settings app, tap Display → Screen timeout, and then select the length of time you want the device to wait before turning off the touchscreen.
  – To set the touchscreen to automatically adjust its brightness based on the surrounding environment, launch the Settings app and tap Display → Auto brightness.

• Depending on the region or model, some devices are required to receive approval from the Federal Communications Commission (FCC). If your device is approved by the FCC, you can view the FCC ID of the device. To view the FCC ID, launch the Settings app and tap About phone → Status.

• Depending on the region, you can view the regulatory information on the device. To view the information, launch the Settings app and tap About phone → Regulatory information.

⚠️ **Caution**: situations that could cause damage to your device or other equipment

🔍 **Notice**: notes, usage tips, or additional information
Device overheating situations and solutions

When the device heats up while charging the battery

While charging, the device and the charger may become hot. During wireless charging or fast charging, the device may feel hotter to the touch. This does not affect the device’s lifespan or performance and is in the device’s normal range of operation. If the battery becomes too hot, the charger may stop charging.

Do the following when the device heats up:

- Disconnect the charger from the device and close any running apps. Wait for the device to cool down and then begin charging the device again.
- If the lower part of the device overheats, it could be because the connected USB cable is damaged. Replace the damaged USB cable with a new Samsung-approved one.
- When using a wireless charger, do not place foreign materials, such as metal objects, magnets, and magnetic stripe cards, between the device and the wireless charger.

The wireless charging or fast charging feature is only available on supported models.
When the device heats up during use

When you use features or apps that require more power or use them for extended periods, your device may temporarily heat up due to increased battery consumption. Close any running apps and do not use the device for a while.

The following are examples of situations in which the device may overheat. Depending on the functions and apps you use, these examples may not apply to your model.

- During the initial setup after purchase or when restoring data
- When downloading large files
- When using apps that require more power or using apps for extended periods
  - When playing high-quality games for extended periods
  - When recording videos for extended periods
  - When streaming videos while using the maximum brightness setting
  - When connecting to a TV
- While multitasking (or, when running many apps in the background)
  - When using Multi window
  - When updating or installing apps while recording videos
  - When downloading large files during a video call
  - When recording videos while using a navigation app
- When using large amount of data for syncing with the cloud, email, or other accounts
- When using a navigation app in a car while the device is placed in direct sunlight
- When using the mobile hotspot and tethering feature
- When using the device in areas with weak signals or no reception
- When charging the battery with a damaged USB cable
- When the device’s multipurpose jack is damaged or exposed to foreign materials, such as liquid, dust, metal powder, and pencil lead
- When you are roaming
Do the following when the device heats up:

- Keep the device updated with the latest software.
- Conflicts between running apps may cause the device to heat up. Restart the device.
- Deactivate the Wi-Fi, GPS, and Bluetooth features when not using them.
- Close apps that increase battery consumption or that run in the background when not in use.
- Delete unnecessary files or unused apps.
- Decrease the screen brightness.
- If the device overheats or feels hot for a prolonged period, do not use it for a while. If the device continues to overheat, contact a Samsung Service Centre.

Device limitations when the device overheats

When the device heats up, the features and performance may be limited or the device may turn off to cool down. The feature is only available on supported models.

- If the device becomes hotter than usual, a device overheating message will appear. To lower the device’s temperature, the screen brightness and the performance speed will be limited and battery charging will stop. Running apps will be closed and you will only be able to make emergency calls until the device cools down.
- If the device overheats or feels hot for a prolonged period, a power off message will appear. Turn off the device, and wait until it cools down.
Precautions for operating environment

Your device may heat up due to the environment in the following conditions. Use caution to avoid shortening the battery’s lifespan, damaging the device, or causing a fire.

- Do not store your device in very cold or very hot temperatures.
- Do not expose your device to direct sunlight for extended periods.
- Do not use or store your device for extended periods in very hot areas, such as inside a car in the summertime.
- Do not place the device in any areas that may overheat, such as on an electric heating mat.
- Do not store your device near or in heaters, microwaves, hot cooking equipment, or high pressure containers.
- Never use a damaged charger or battery.
Device layout and functions

Package contents

Refer to the quick start guide for package contents.

- The items supplied with the device and any available accessories may vary depending on the region or service provider.
- The supplied items are designed only for this device and may not be compatible with other devices.
- Appearances and specifications are subject to change without prior notice.
- You can purchase additional accessories from your local Samsung retailer. Make sure they are compatible with the device before purchase.
- Use only Samsung-approved accessories. Using unapproved accessories may cause the performance problems and malfunctions that are not covered by the warranty.
- Availability of all accessories is subject to change depending entirely on manufacturing companies. For more information about available accessories, refer to the Samsung website.
Device layout

- Proximity/Light sensor
- Speaker
- Front camera
- Touchscreen
- Volume key
- Power key
- Multipurpose jack (USB Type-C)
• When using the speakers, such as when playing media files or using speakerphone, do not place the device close to your ears.
• Be careful not to expose the camera lens to a strong light source, such as direct sunlight. If the camera lens is exposed to a strong light source, such as direct sunlight, the camera image sensor may be damaged. A damaged image sensor is irreparable and will cause dots or spots in pictures.
• If you use the device with its glass or acrylic body broken, there may be a risk of injury. Use the device only after it has been repaired at a Samsung Service Centre.
• Connectivity problems and battery drain may occur in the following situations:
  - If you attach metallic stickers on the antenna area of the device
  - If you attach a device cover made with metallic material to the device
  - If you cover the device’s antenna area with your hands or other objects while using certain features, such as calls or the mobile data connection
• Using a Samsung-approved screen protector is recommended. Unapproved screen protectors may cause the sensors to malfunction.
• Do not cover the proximity/light sensor area with screen accessories, such as a screen protector or stickers. Doing so may cause the sensor to malfunction.
• Do not allow water to contact the touchscreen. The touchscreen may malfunction in humid conditions or when exposed to water.
Hard keys

Soft buttons

When you turn on the screen, the soft buttons will appear at the bottom of the screen. The soft buttons are set to the Recents button, Home button, and Back button by default. Refer to Navigation bar (soft buttons) for more information.
Battery

Charging the battery

Charge the battery before using it for the first time or when it has been unused for extended periods.

⚠️ Use only Samsung-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device.

⚠️ • Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.

⚠️ • Use only USB Type-C cable supplied with the device. The device may be damaged if you use Micro USB cable.

💡 To save energy, unplug the charger when not in use. The charger does not have a power switch, so you must unplug the charger from the electric socket when not in use to avoid wasting power. The charger should remain close to the electric socket and easily accessible while charging.

1. Connect the USB cable to the USB power adaptor.

2. Plug the USB cable into the device's multipurpose jack.
3 Plug the USB power adaptor into an electric socket.

4 After fully charging, disconnect the charger from the device. Then, unplug the charger from the electric socket.

Reducing the battery consumption

Your device provides various options that help you conserve battery power.

• Optimise the device using the device maintenance feature.
• When you are not using the device, turn off the screen by pressing the Power key.
• Activate power saving mode.
• Close unnecessary apps.
• Deactivate the Bluetooth feature when not in use.
• Deactivate auto-syncing of apps that need to be synced.
• Decrease the backlight time.
• Decrease the screen brightness.
Battery charging tips and precautions

• When the battery power is low, the battery icon appears empty.

• If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected. Allow a depleted battery to charge for a few minutes before turning on the device.

• If you use multiple apps at once, network apps, or apps that need a connection to another device, the battery will drain quickly. To avoid losing power during a data transfer, always use these apps after fully charging the battery.

• Using a power source other than the charger, such as a computer, may result in a slower charging speed due to a lower electric current.

• The device can be used while it is charging, but it may take longer to fully charge the battery.

• If the device receives an unstable power supply while charging, the touchscreen may not function. If this happens, unplug the charger from the device.

• While charging, the device and the charger may heat up. This is normal and should not affect the device’s lifespan or performance. If the battery gets hotter than usual, the charger may stop charging.

• If you charge the device while the multipurpose jack is wet, the device may be damaged. Thoroughly dry the multipurpose jack before charging the device.

• If the device is not charging properly, take the device and the charger to a Samsung Service Centre.
Fast charging

The device has a built-in fast charging feature. You can charge the battery more quickly while the device or its screen is turned off.

Increasing the charging speed

To increase the charging speed, turn the device or its screen off when you charge the battery. While charging the battery when the device is turned off, the ⚡ icon appears on the screen. If the fast charging feature is not activated, launch the Settings app, tap Device maintenance → Battery → Advanced settings, and then tap the Fast cable charging switch to activate it.

- You cannot use the built-in fast charging feature when you charge the battery using a standard battery charger.
- If the device heats up or the ambient air temperature rises, the charging speed may decrease automatically. This is a normal operating condition to prevent damage to the device.

SIM or USIM card (nano-SIM card)

Installing the SIM or USIM card

Insert the SIM or USIM card provided by the mobile telephone service provider. For dual SIM models, you can insert two SIM or USIM cards so you can have two phone numbers or service providers for a single device. In some areas, data transfer speeds may be slower if two SIM cards are inserted in the device than when one SIM card is inserted.

- Use caution not to lose or let others use the SIM or USIM card. Samsung is not responsible for any damages or inconveniences caused by lost or stolen cards.
- Some LTE services may not be available depending on the service provider. For more information about service availability, contact your service provider.
► Single SIM models:
► Dual SIM models:
1. Insert the ejection pin into the hole next to the tray to loosen the tray.

   Ensure that the ejection pin is perpendicular to the hole. Otherwise, the device may be damaged.

2. Pull out the tray gently from the tray slot.

3. ▶ **Single SIM models**: Place the SIM or USIM card on the tray 1 with the gold-coloured contacts facing downwards.

   ▶ **Dual SIM models**: Place the SIM or USIM card on the tray with the gold-coloured contacts facing downwards. Place the primary SIM or USIM card on the tray 1 (1) and the secondary SIM or USIM card on the tray 2 (2).

4. Gently press the SIM or USIM card into the tray to secure it.

   If the card is not fixed firmly into the tray, the SIM card may leave or fall out of the tray.

5. Insert the tray back into the tray slot.

   - If you insert the tray into your device while the tray is wet, your device may be damaged. Always make sure the tray is dry.
   - Fully insert the tray into the tray slot to prevent liquid from entering your device.
Correct card installation

► Single SIM models:
- Nano-SIM card
- microSD card

► Dual SIM models:
- Nano-SIM card 1
- Nano-SIM card 2
- microSD card

⚠️ Use only a nano-SIM card.
Removing the SIM or USIM card

1. Insert the ejection pin into the hole next to the tray to loosen the tray.
2. Pull out the tray gently from the tray slot.
3. Remove the SIM or USIM card.
4. Insert the tray back into the tray slot.

Using dual SIM or USIM cards (dual SIM models)

If you insert two SIM or USIM cards, you can have two phone numbers or service providers for a single device.

Activating SIM or USIM cards

Launch the Settings app and tap Connections → SIM card manager. Select a SIM or USIM card and tap the switch to activate it.

Customising SIM or USIM cards

Launch the Settings app, tap Connections → SIM card manager, and then select a SIM or USIM card to access the following options:

- **Icon**: Change the icon of the SIM or USIM card.
- **Name**: Change the display name of the SIM or USIM card.
- **Network mode**: Select a network type to use with the SIM or USIM card.

Setting preferred SIM or USIM cards

When two cards are activated, you can assign voice calls, messaging, and data services to specific cards.

Launch the Settings app, tap Connections → SIM card manager, and then set the feature preferences for your cards in PREFERRED SIM CARD.
Memory card (microSD card)

Installing a memory card

Your device's memory card capacity may vary from other models and some memory cards may not be compatible with your device depending on the memory card manufacturer and type. To view your device's maximum memory card capacity, refer to the Samsung website.

- Some memory cards may not be fully compatible with the device. Using an incompatible card may damage the device or the memory card, or corrupt the data stored in it.
  - Use caution to insert the memory card right-side up.

- The device supports the FAT and the exFAT file systems for memory cards. When inserting a card formatted in a different file system, the device will ask to reformat the card or will not recognise the card. To use the memory card, you must format it. If your device cannot format or recognise the memory card, contact the memory card manufacturer or a Samsung Service Centre.
  - Frequent writing and erasing of data shortens the lifespan of memory cards.
  - When inserting a memory card into the device, the memory card’s file directory appears in the My Files → SD card folder.
1. Insert the ejection pin into the hole next to the tray to loosen the tray.

![Warning icon]
Ensure that the ejection pin is perpendicular to the hole. Otherwise, the device may be damaged.

2. Pull out the tray gently from the tray slot.

![Warning icon]
When you remove the tray from the device, the mobile data connection will be disabled.
3 Place a memory card on the memory card tray with the gold-coloured contacts facing downwards.

![Memory card tray]

4 Gently press the memory card into the tray to secure it.

⚠️ If the card is not fixed firmly into the tray, the memory card may leave or fall out of the tray.

5 Insert the tray back into the tray slot.

- If you insert the tray into your device while the tray is wet, your device may be damaged. Always make sure the tray is dry.
- Fully insert the tray into the tray slot to prevent liquid from entering your device.

Removing the memory card

Before removing the memory card, first unmount it for safe removal.
Launch the Settings app and tap Device maintenance → Storage → Storage settings → SD card → UNMOUNT.

1 Insert the ejection pin into the hole next to the tray to loosen the tray.

2 Pull out the tray gently from the tray slot.
3 Remove the memory card.

4 Insert the tray back into the tray slot.

⚠️ Do not remove external storage, such as a memory card or USB storage, while the device is transferring or accessing information, or right after transferring data. Doing so can cause data to be corrupted or lost or cause damage to the external storage or device. Samsung is not responsible for losses, including loss of data, resulting from the misuse of external storage devices.

### Formatting the memory card

A memory card formatted on a computer may not be compatible with the device. Format the memory card on the device.

Launch the **Settings** app and tap **Device maintenance → Storage → Storage settings → SD card → Format**.

⚠️ Before formatting the memory card, remember to make backup copies of all important data stored in the memory card. The manufacturer’s warranty does not cover loss of data resulting from user actions.
**Turning the device on and off**

Press and hold the Power key for a few seconds to turn on the device.

When you turn on your device for the first time or after performing a data reset, follow the on-screen instructions to set up your device.

To turn off the device, press and hold the Power key, and then tap **Power off**.

- Follow all posted warnings and directions from authorised personnel in areas where the use of wireless devices is restricted, such as aeroplanes and hospitals.

**Restarting the device**

To restart the device, press and hold the Power key, and then tap **Restart**.

If your device is frozen and unresponsive, press and hold the Power key and the Volume Down key simultaneously for more than 7 seconds to restart it.

![Volume Down key and Power key icons]

**Emergency mode**

You can switch the device to emergency mode to reduce battery consumption. Some apps and functions will be restricted. In emergency mode, you can make an emergency call, send your current location information to others, sound an emergency alarm, and more.

**Activating emergency mode**

To activate emergency mode, press and hold the Power key, and then tap **Emergency mode**.

- The usage time left shows the time remaining before the battery power runs out. Usage time left may vary depending on your device settings and operating conditions.
Deactivating emergency mode

To deactivate emergency mode, tap \(\rightarrow\) Turn off Emergency mode. Alternatively, press and hold the Power key, and then tap Emergency mode.

Initial setup

When you turn on your device for the first time or after performing a data reset, follow the on-screen instructions to set up your device.

The initial setup procedures may vary depending on the device’s software and your region.

1. Turn on the device.

2. Select your preferred device language and select \(\rightarrow\).
3 Select a Wi-Fi network and connect to it.

If you do not connect to a Wi-Fi network, you may not be able to set up some device features during the initial setup.

4 Follow the on-screen instructions to proceed the initial setup.

5 Set a screen lock method to protect your device. You can protect your personal information by preventing others from accessing your device. To set the screen lock method later, tap No, thank you.

6 Sign in to your Samsung account. You can enjoy Samsung services and keep your data up to date and secure across all of your devices. Refer to Samsung account for more information.

7 Select features you want to use and complete the initial setup.

The Home screen will appear.
Samsung account

Introduction

Your Samsung account is an integrated account service that allows you to use a variety of Samsung services provided by mobile devices, TVs, and the Samsung website. Once your Samsung account has been registered, you can keep your data up to date and secure across your Samsung devices with Samsung Cloud, track and control your lost or stolen device, see tips and tricks from Samsung Members, and more.

Create your Samsung account with your email address.

To check the list of services that can be used with your Samsung account, visit account.samsung.com. For more information on Samsung accounts, launch the Settings app and tap Cloud and accounts → Accounts → Samsung account → Help.

Registering your Samsung account

Registering a new Samsung account

If you do not have a Samsung account, you should create one.

1. Launch the Settings app and tap Cloud and accounts → Accounts → Add account → Samsung account.
   Alternatively, launch the Settings app and tap  

2. Tap CREATE ACCOUNT.

3. Follow the on-screen instructions to complete creating your account.
Registering an existing Samsung account

If you already have a Samsung account, register it to the device.

1. Launch the Settings app and tap Cloud and accounts → Accounts → Add account → Samsung account.
   Alternatively, launch the Settings app and tap 👤.

2. Tap SIGN IN.

3. Enter your Samsung account ID and password and tap SIGN IN.
   If you forget your account information, tap Find ID or Reset password. You can find your account information when you enter the required information.

4. Read and agree to the terms and conditions and tap NEXT.

5. Tap DONE to finish registering your Samsung account.

Removing your Samsung account

When you remove your registered Samsung account from the device, your data, such as contacts or events, will also be removed.

1. Launch the Settings app and tap Cloud and accounts → Accounts.

2. Tap Samsung account → Remove account.

3. Tap REMOVE, enter your Samsung account password, and then tap REMOVE ACCOUNT.
Transferring data from your previous device

You can restore your data, such as images, contacts, messages, and apps from Samsung Cloud. You can also copy them from your previous device via Smart Switch.

- This feature may not be supported on some devices or computers.
- Limitations apply. Visit www.samsung.com/smartswitch for details. Samsung takes copyright seriously. Only transfer content that you own or have the right to transfer.

**Smart Switch**

Transfer data between mobile devices via Smart Switch. To use Smart Switch, launch the **Settings** app and tap **Cloud and accounts → Smart Switch**. If you do not have the app, download it from **Galaxy Apps**.

**Transferring data from a mobile device**

Transfer data from your previous device to your device wirelessly via Wi-Fi Direct.

1. On the previous device, launch Smart Switch.
   If you do not have the app, download it from **Galaxy Apps**.

2. On your device, launch the **Settings** app and tap **Cloud and accounts → Smart Switch**.

3. Place the devices near each other.
4 On the previous device, tap **Send data → Wireless**.

5 On the previous device, select an item to transfer and tap **SEND**.

6 On your device, tap **RECEIVE**.

7 Follow the on-screen instructions to transfer data from your previous device.

**Transferring data using external storage**

Transfer data using external storage, such as a microSD card.

1 Transfer data from your previous device to external storage.

2 Insert or connect the external storage device to your device.

3 On your device, launch the **Settings** app and tap **Cloud and accounts → Smart Switch → Restore**.

4 Follow the on-screen instructions to transfer data from external storage.

**Transferring backup data from a computer**

Transfer data between your device and a computer. You must download the Smart Switch computer version app from [www.samsung.com/smartswitch](http://www.samsung.com/smartswitch). Back up data from your previous device to a computer and import the data to your device.

1 On the computer, visit [www.samsung.com/smartswitch](http://www.samsung.com/smartswitch) to download Smart Switch.

2 On the computer, launch Smart Switch.

> If your previous device is not a Samsung device, back up data to a computer using a program provided by the device's manufacturer. Then, skip to the fifth step.
3 Connect your previous device to the computer using the device’s USB cable.

4 On the computer, follow the on-screen instructions to back up data from the device. Then, disconnect your previous device from the computer.

5 Connect your device to the computer using the USB cable.

6 On the computer, follow the on-screen instructions to transfer data to your device.

**Viewing imported data**

You can view the imported data on the same app from your previous device. If your new device does not have the same apps to view or play the imported data, the data will be saved to a similar app.

**Samsung Cloud**

Back up data from your previous device to Samsung Cloud and restore the data to your new device. You can also sync data saved in your device with Samsung Cloud and view data saved on the Samsung Cloud. You must register and sign in to your Samsung account to use Samsung Cloud. Refer to Samsung account for more information.

**Backing up data from your previous device**

1 On your previous device, sign in to your Samsung account.

2 Launch the **Settings** app, select the backup option, and back up your data.

   - If your device supports Samsung Cloud, launch the **Settings** app, tap **Cloud and accounts** → **Samsung Cloud** → **Back up this phone**, tick items you want to back up, and then tap **BACK UP** to back up your data.
   
   - The data backup method may vary depending on your model.
   
   - Some data will not be backed up. To check which data will be backed up, launch the **Settings** app, tap **Cloud and accounts** → **Samsung Cloud** → **Back up this phone**.
   
   - To view the backup data in your Samsung account, launch the **Settings** app, tap **Cloud and accounts** → **Samsung Cloud** → **Restore data** → ⬇️, and then select a device you want.
Restoring data from your previous device

1. On your new device, launch the Settings app and tap Cloud and accounts → Samsung Cloud.

2. Tap Restore data and select a previous device.

3. Tick the data types you want to restore and tap RESTORE.

Syncing data from your device

You can sync data saved in your device, such as contacts and events, with Samsung Cloud and access it from other devices.

1. On your new device, launch the Settings app and tap Cloud and accounts → Samsung Cloud.

2. Tap → Settings → Sync and auto backup settings.

3. Tap the switches next to the items you want to sync with.

You can check the saved data or change the settings by tapping the Other synced data or Samsung Cloud Drive.
Understanding the screen

Controlling the touchscreen

- Do not allow the touchscreen to come into contact with other electrical devices. Electrostatic discharges can cause the touchscreen to malfunction.
- To avoid damaging the touchscreen, do not tap it with anything sharp or apply excessive pressure to it with your fingertips.
- It is recommended not to use fixed graphics on part or all of the touchscreen for extended periods. Doing so may result in afterimages (screen burn-in) or ghosting.
- The device may not recognise touch inputs close to the edges of the screen, which are outside of the touch input area.
- It is recommended to use fingers when you use the touchscreen.

**Tapping**

Tap the screen.

**Tapping and holding**

Tap and hold the screen for approximately 2 seconds.
Basics

Dragging
Tap and hold an item and drag it to the target position.

Double-tapping
Double-tap the screen.

Swiping
Swipe upwards, downwards, to the left, or to the right.

Spreading and pinching
Spread two fingers apart or pinch on the screen.
Navigation bar (soft buttons)

When you turn on the screen, the soft buttons will appear at the bottom of the screen. The soft buttons are set to the Recents button, Home button, and Back button by default. The functions of the buttons can change according to the app currently being used or usage environment.

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔄</td>
<td>Recents</td>
</tr>
</tbody>
</table>
| 🏡 | Home | • Tap to return to the Home screen.  
     | | • Tap and hold to launch the Google Assistant app. |
| ← | Back | • Tap to return to the previous screen. |
Hiding the navigation bar

Hide the navigation bar to expand the available area of the screen to view content or use apps in a larger view.

Launch the Settings app, tap Display → Navigation bar, and then select Full screen gestures under NAVIGATION TYPE. The navigation bar is replaced with the flat indicators for the hidden buttons.

To perform the function of a hidden button, swipe upwards the button's indicator.

To hide the indicators at the bottom of the screen, tap the Gesture hints switch to deactivate it.

Setting the navigation bar

Launch the Settings app, tap Display → Navigation bar, and then select an option.

• NAVIGATION TYPE: Set the device to show or hide the navigation bar. To hide the navigation bar, select the Full screen gestures feature. When the navigation bar is hidden, you can use the functions of the soft buttons by swiping upwards their indicators.

• BUTTON ORDER: Change the order of the buttons on the navigation bar.

• Gesture hints: Display the indicators for the hidden buttons so that you can recognise where to swipe up while the navigation bar is hidden. This option appears only when you select the Full screen gestures feature.
Home screen and Apps screen

The Home screen is the starting point for accessing all of the device’s features. It displays widgets, shortcuts to apps, and more.

The Apps screen displays icons for all apps, including newly installed apps.

💡 The screen may appear differently depending on the region or service provider.
Switching between Home and Apps screens

On the Home screen, swipe upwards or downwards to open the Apps screen. To return to the Home screen, swipe upwards or downwards on the Apps screen. Alternatively, tap the Home button or the Back button.

If you add the Apps button on the Home screen, you can open the Apps screen by tapping the button. On the Home screen, tap and hold an empty area and tap Home screen settings → Apps button → Show Apps button → APPLY. The Apps button will be added at the bottom of the Home screen.
**Display the screen in landscape mode**

On the Home screen, tap and hold an empty area, tap **Home screen settings**, and then tap the **Portrait mode only** switch to deactivate it.

Rotate the device until it is horizontal to view the screen in landscape mode.

![Landscape mode](image)

**Moving items**

Tap and hold an item, and then drag it to a new location. To move the item to another panel, drag it to the side of the screen.

To add a shortcut to an app on the Home screen, tap and hold an item on the Apps screen, and then drag it to the top of the screen. A shortcut to the app will be added on the Home screen.

You can also move frequently used apps to the shortcuts area at the bottom of the Home screen.
Creating folders

Create folders and gather similar apps to quickly access and launch apps.

1. On the Home screen or the Apps screen, tap and hold an app, and then drag it over another app.

2. Drop the app when a folder frame appears around the apps.
   A new folder containing the selected apps will be created. Tap **Enter folder name** and enter a folder name.

- **Adding more apps**
  Tap **ADD APPS** on the folder. Tick the apps to add and tap **ADD**. You can also add an app by dragging it to the folder.

- **Moving apps from a folder**
  Tap and hold an app to drag it to a new location.

- **Deleting a folder**
  Tap and hold a folder, and then tap **Delete folder**. Only the folder will be deleted. The folder’s apps will be relocated to the Apps screen.
Editing the Home screen

On the Home screen, tap and hold an empty area, or pinch your fingers together to access the editing options. You can set the wallpaper, add widgets, and more. You can also add, delete, or rearrange Home screen panels.

- Adding panels: Swipe to the left, and then tap \( + \).
- Moving panels: Tap and hold a panel preview, and then drag it to a new location.
- Deleting panels: Tap \( \square \) on the panel.

- **Wallpapers**: Change the wallpaper settings for the Home screen and the locked screen.
- **Themes**: Change the device's theme. Visual elements of interface, such as colours, icons, and wallpapers, will change depending on the selected theme.
- **Widgets**: Widgets are small apps that launch specific app functions to provide information and convenient access on your Home screen. Tap and hold a widget, and then drag it to the Home screen. The widget will be added on the Home screen.
- **Home screen settings**: Change the size of the grid to display more or fewer items on the Home screen and more.
Displaying all apps on the Home screen

Without using a separate Apps screen, you can set the device to display all apps on the Home screen. On the Home screen, tap and hold an empty area, and then tap **Home screen settings → Home screen layout → Home screen only → APPLY**.

You can now access all your apps by swiping to the left on the Home screen.

**Indicator icons**

Indicator icons appear on the status bar at the top of the screen. The icons listed in the table below are most common.

- The status bar may not appear at the top of the screen in some apps. To display the status bar, drag down from the top of the screen.
- Some indicator icons appear only when you open the notification panel.

Lock screen

Pressing the Power key turns off the screen and locks it. Also, the screen turns off and automatically locks if the device is not used for a specified period.

To unlock the screen, swipe in any direction when the screen turns on.

If the screen is off, press the Power key to turn on the screen.
Setting the Lock screen stories
You can set the device to display various images and content on the locked screen. If this feature is activated, the content on the locked screen changes every time you turn on the screen.

This feature may not be available depending on the region or service provider.

1. Launch the Settings app, tap Lock screen → Lock Screen Stories and tap the switch to activate it.

2. Tap Follow categories and select the categories of the content you want to display on the locked screen. Or, tap + to add your own images.

   To change the auto update settings for the stories, tap Update Stories, and then select an option.

You may incur additional charges when updating the stories via the mobile network.
Changing the screen lock method

To change the screen lock method, launch the Settings app, tap Lock screen → Screen lock type, and then select a method.

When you set a pattern, PIN, password, or your biometric data for the screen lock method, you can protect your personal information by preventing others from accessing your device. After setting the screen lock method, the device will require an unlock code whenever unlocking it.

- **Swipe**: Swipe in any direction on the screen to unlock it.
- **Pattern**: Draw a pattern with four or more dots to unlock the screen.
- **PIN**: Enter a PIN with at least four numbers to unlock the screen.
- **Password**: Enter a password with at least four characters, numbers, or symbols to unlock the screen.
- **None**: Do not set a screen lock method.
- **Face**: Register your face to unlock the screen. Refer to Face recognition for more information.
- **Fingerprints**: Register your fingerprints to unlock the screen. Refer to Fingerprint recognition for more information.

You can set your device to perform a factory data reset if you enter the unlock code incorrectly several times in a row and reach the attempt limit. Launch the Settings app, tap Lock screen → Secure lock settings, unlock the screen using the preset screen lock method, and then tap the Auto factory reset switch to activate it.

Screen capture

Capture a screenshot while using the device.

Press and hold the Volume Down key and the Power key simultaneously. You can view captured images in Gallery.

It is not possible to capture a screenshot while using some apps and features.
Notification panel

When you receive new notifications, such as messages or missed calls, indicator icons appear on the status bar. To see more information about the icons, open the notification panel and view the details.

To open the notification panel, drag the status bar downwards. To close the notification panel, swipe upwards on the screen.

You can open the notification panel, even on the locked screen.

You can use the following functions on the notification panel.

- Quick setting buttons
- Preferred SIM or USIM card for each option. Tap to access the SIM card manager. (dual SIM models)
- View the notification details and perform various actions.
- Clear all notifications.
- Launch Settings.
- Access the notification settings.
Using quick setting buttons

Tap quick setting buttons to activate certain features. Swipe downwards on the notification panel to view more buttons.

To change feature settings, tap the text under each button. To view more detailed settings, tap and hold a button.

To rearrange buttons, tap \( \rightarrow \) Button order, tap and hold a button, and then drag it to another location.
**Entering text**

**Keyboard layout**

A keyboard appears automatically when you enter text to send messages, create notes, and more.

- When the keyboard is opened for the first time, the keyboard setup screen will appear. Set the input language, keyboard type, and keyboard settings and then tap **START**.
- Text entry is not supported in some languages. To enter text, you must change the input language to one of the supported languages.

**Changing the input language**

Tap ![Language icon] → **Languages and types** → **MANAGE INPUT LANGUAGES**, and then select the languages to use. When you select two or more languages, you can switch between the input languages by swiping to the left or right on the space key.
Changing the keyboard

Tap ⬤ to change the keyboard.

To change the keyboard type, tap  → Languages and types, select a language, and then select the keyboard type you want.

- If the keyboard button (⫲) does not appear on the navigation bar, launch the Settings app, tap General management → Language and input, and then tap the Show Keyboard button switch to activate it.
- On a 3x4 keyboard, a key has three or four characters. To enter a character, tap the corresponding key repeatedly until the desired character appears.

Additional keyboard functions

Some features may not be available depending on the region or service provider.

- ⌉: Predict words based on your input and show word suggestions. To return to the keyboard functions list, tap ⌉.
- 😊: Enter emoticons.
- 🎉: Enter avatar stickers. Refer to Enjoying avatar stickers while chatting for more information.
- 🎁: Attach animated GIFs.
- 🎤: Enter text by voice.
- 🔄: Change the keyboard settings.
- ⬤ → 🎉: Enter stickers.
- ⬤ → 🎁: Change the keyboard for one-handed operation.
Copying and pasting

1. Tap and hold over text.

2. Drag ☝️ or ⬇️ to select the desired text, or tap Select all to select all text.

3. Tap Copy or Cut.
   The selected text is copied to the clipboard.

4. Tap and hold where the text is to be inserted and tap Paste.

Dictionary

Look up definitions for words while using certain features, such as when browsing webpages.

1. Tap and hold over a word that you want to look up.
   If the word you want to look up is not selected, drag ☝️ or ⬇️ to select the desired text.

2. Tap Dictionary on the options list.
   If a dictionary is not preinstalled on the device, tap Move to Manage dictionaries → next to a dictionary to download it.

3. View the definition in the dictionary pop-up window.
   To switch to the full screen view, tap ☝️ Tap the definition on the screen to view more definitions. In the detailed view, tap ★ to add the word to your favourite words list or tap Search Web to use the word as a search term.
Apps and features

Installing or uninstalling apps

Galaxy Apps
Purchase and download apps. You can download apps that are specialised for Samsung Galaxy devices.
Launch the Galaxy Apps app.

⚠️ This app may not be available depending on the region or service provider.

Installing apps
Browse apps by category or tap the search field to search for a keyword.
Select an app to view information about it. To download free apps, tap INSTALL. To purchase and download apps where charges apply, tap the price and follow the on-screen instructions.

To change the auto update settings, tap → Settings → Auto update apps, and then select an option.

Play Store
Purchase and download apps.
Launch the Play Store app.

Installing apps
Browse apps by category or search for apps by keyword.
Select an app to view information about it. To download free apps, tap INSTALL. To purchase and download apps where charges apply, tap the price and follow the on-screen instructions.

To change the auto update settings, tap → Settings → Auto-update apps, and then select an option.
Managing apps

Uninstalling or disabling apps
Tap and hold an app and select an option.

- **Disable**: Disable selected default apps that cannot be uninstalled from the device.
- **Uninstall**: Uninstall downloaded apps.

Enabling apps
Launch the **Settings** app, tap **Apps → Disabled**, select an app, and then tap **ENABLE**.

Setting app permissions
For some apps to operate properly, they may need permission to access or use information on your device. When you open an app, a pop-up window may appear and request access to certain features or information. Tap **ALLOW** on the pop-up window to grant permissions to the app.

To view your app permission settings, launch the **Settings** app and tap **Apps**. Select an app and tap **Permissions**. You can view the app’s permissions list and change its permissions.

To view or change app permission settings by permission category, launch the **Settings** app and tap **Apps → App permissions**. Select an item and tap the switches next to apps to grant permissions.

If you do not grant permissions to apps, the basic features of the apps may not function properly.
Phone

Introduction
Make or answer voice and video calls.

Making calls

1. Launch the Phone app and enter a phone number. If the keypad does not appear on the screen, tap to open the keypad.

2. Tap to make a voice call, or tap to make a video call.

![Diagram of phone keypad with labels for creating a new contact, adding to existing contact, previewing phone number, deleting a preceding character, access additional options, hide keypad.]

- Create a new contact.
- Add the number to an existing contact.
- Preview the phone number.
- Delete a preceding character.
- Access additional options.
- Hide the keypad.
Making calls from call logs or contacts list

Tap **RECENTS** or **CONTACTS**, and then swipe to the right on a contact or a phone number to make a call.

If this feature is deactivated, launch the **Settings** app, tap **Advanced features**, and then tap the **Swipe to call or send messages** switch to activate it.

Using speed dial

Set speed dial numbers to quickly make calls.

To set a number to speed dial, tap **CONTACTS → → Speed dial numbers**, select a speed dial number, and then add a phone number.

To make a call, tap and hold a speed dial number on the keypad. For speed dial numbers 10 and up, tap the first digit(s) of the number, and then tap and hold the last digit.

For example, if you set the number 123 as a speed dial number, tap 1, tap 2, and then tap and hold 3.

Making calls from the locked screen

On the locked screen, drag ☎ outside the circle.

Making an international call

1. Tap 📞 to open the keypad if the keypad does not appear on the screen.
2. Tap and hold 0 until the + sign appears.
3. Enter the country code, area code, and phone number, and then tap ☎.
Receiving calls

Answering a call
When a call comes in, drag 📞 outside the large circle.

 Rejecting a call
When a call comes in, drag 📧 outside the large circle.
To send a message when rejecting an incoming call, drag the SEND MESSAGE bar upwards. If Add reminder is selected, a reminder will be saved to alert you of the rejected call one hour later.
To create various rejection messages, launch the Phone app, tap ☰️ → Settings → Quick decline messages, enter a message, and then tap +.

Missed calls
If a call is missed, the ⏰️ icon appears on the status bar. Open the notification panel to view the list of missed calls. Alternatively, launch the Phone app and tap RECENTS to view missed calls.

Blocking phone numbers
Block calls from specific numbers added to your block list.

1. Launch the Phone app and tap ☰️ → Settings → Block numbers.

2. Tap ☰️, select contacts, and then tap DONE.
   To manually enter a number, tap Enter phone number, enter a phone number, and then tap +.

When blocked numbers try to contact you, you will not receive notifications. The calls will be logged in the call log.

   You can also block incoming calls from people that do not show their caller ID. Tap the Block unknown callers switch to activate the feature.
Options during calls

If the area around the rear camera and the fingerprint recognition sensor is covered, unwanted noises may incur during a call. Remove accessories, such as a screen protector or stickers, around the rear camera area.

During a voice call

The following actions are available:

- : Access additional options.
- **Add call**: Dial a second call. The first call will be put on hold. When you end the second call, the first call will be resumed.

  This feature may not be available depending on the region or service provider.

- **Record**: Record a call conversation.

  This feature may not be available depending on the region or service provider.

- **Extra volume**: Increase the volume.
- **Bluetooth**: Switch to a Bluetooth headset if it is connected to the device.
- **Speaker**: Activate or deactivate the speakerphone. When using the speakerphone, speak into the microphone at the top of the device and keep the device away from your ears.
- **Mute**: Turn off the microphone so that the other party cannot hear you.
- **Keypad / Hide**: Open or close the keypad.
- : End the current call.

During a video call

Tap the screen to use the following options:

- : Access additional options.
- **Camera**: Turn off the camera so that the other party cannot see you.
- **Switch**: Switch between the front and rear cameras.
- : End the current call.
- **Mute**: Turn off the microphone so that the other party cannot hear you.
- **Speaker**: Activate or deactivate the speakerphone. When using the speakerphone, speak into the microphone at the top of the device and keep the device away from your ears.
Adding a phone number to Contact

Adding a phone number to Contacts from the keypad

1. Launch the Phone app.

2. Enter the number.
   If the keypad does not appear on the screen, tap to open the keypad.

3. Tap CREATE CONTACT to create a new contact, or tap UPDATE EXISTING to add the number to an existing contact.

Adding a phone number to Contacts from the calls list

1. Launch the Phone app and tap RECENTS.

2. Tap a caller’s image, or tap a phone number → Details.

3. Tap Create contact to create a new contact, or tap Update existing to add the number to an existing contact.

Adding a tag to a phone number

You can add tags to numbers without saving them to Contact. This allows you to view the caller’s information when they call without having them listed in Contact.

1. Launch the Phone app and tap RECENTS.

2. Tap a caller’s image, or tap a phone number → Details.

3. Tap Add tag, enter a tag, and then tap DONE.
   When a call comes from that number, the tag will show under the number.
Contacts

Introduction
Create new contacts or manage contacts on the device.

Adding contacts

Creating a new contact
1. Launch the Contacts app, tap +, and then select a storage location.
2. Enter contact information.

![Image of contact creation process]

- Select a storage location.
- Add an image.
- Enter contact information.
- Open more information fields.

Depending on the selected storage location, the types of information you can save may vary.

3. Tap SAVE.
Importing contacts
Add contacts by importing them from other storages to your device.

1. Launch the Contacts app and tap → Manage contacts → Import/Export contacts → IMPORT.

2. Select a storage location to import contacts from.

3. Tick VCF files or contacts to import and tap DONE.

4. Select a storage location to save contacts to and tap IMPORT.

Syncing contacts with your web accounts
Sync your device contacts with online contacts saved in your web accounts, such as your Samsung account.

1. Launch the Settings app, tap Cloud and accounts → Accounts and select the account to sync with.

2. Tap Sync account and tap the Sync Contacts switch to activate it.
   For the Samsung account, tap → Sync settings and tap the Contacts switch to activate it.

Searching for contacts
Launch the Contacts app.
Use one of the following search methods:

• Scroll up or down the contacts list.

• Drag a finger along the index at the right side of the contacts list to scroll through it quickly.

• Tap the search field at the top of the contacts list and enter search criteria.
Apps and features

Tap the contact’s image, or tap the contact’s name → Details. Then take one of the following actions:

- ★: Add to favourite contacts.
- ✉️ / ☎️: Make a voice or video call.
- ☟️: Compose a message.
- ♨️: Compose an email.

Sharing contacts
You can share contacts with others by using various sharing options.

1. Launch the Contacts app and tap → Share.
2. Select contacts and tap SHARE.
3. Select a sharing method.

Saving and sharing profile
Save and share your profile information, such as your photo and status message, with others using the profile sharing feature.

- The profile sharing feature may not be available depending on the region or service provider.
- The profile sharing feature is only available for contacts who have activated the profile sharing feature on their device.

1. Launch the Contacts app and select your profile.
2. Tap EDIT, edit your profile, and tap SAVE.
3. Tap → Profile sharing, and then tap the switch to activate it.

To use the profile sharing feature, your phone number must be verified. You can view your contacts’ updated profile information in Contacts.

To change the scope of contacts to share your profile with, tap Share with, select an item to share, and then select an option.
Creating groups

You can add groups, such as family or friends, and manage contacts by group.

1. Launch the Contacts app and tap Groups → CREATE.

2. Enter a group name.
   To set a group ringtone, tap Group ringtone and select a ringtone.

3. Tap Add member, select contacts to add to the group, and then tap DONE.

4. Tap SAVE.

Sending a group message

You can send a group message to a group’s members at the same time.

Launch the Contacts app, tap Groups, select a group, and then tap → Send message.

Merging duplicate contacts

When you import contacts from other storages, or sync contacts with other accounts, your contacts list may include duplicate contacts. Merge duplicate contacts into one to streamline your contacts list.

1. Launch the Contacts app and tap → Manage contacts → Merge contacts.

2. Tick contacts and tap MERGE.

Deleting contacts

1. Launch the Contacts app and tap → Delete.

2. Select contacts and tap DELETE.

To delete contacts one by one, open the contacts list and tap a contact’s image or tap a contact’s name → Details. Then tap → Delete.
Messages

Introduction
Send and view messages by conversation.

Sending messages

You may incur additional charges for sending messages when you are roaming.

1. Launch the Messages app and tap 📮.
2. Add recipients and tap START.
3. Enter a message.

To record and send a voice message, tap and hold 🎧, say your message, and then release your finger. The recording icon appears only while the keyboard is hidden.

4. Tap ✔️ to send the message.
Enjoying avatar stickers while chatting

You can use avatar stickers during a conversation via messages or on a social network.

1  On the Samsung keyboard, tap 🕵️.
   
   If you are using this feature for the first time, tap GET STARTED! and decorate your avatar.

2  Tap the avatar icon.

3  Select one of the avatar stickers.
   The avatar sticker will be inserted.

Adding avatar stickers

On the Samsung keyboard, tap 🕵️ and tap 👥 at the bottom of the keyboard. To edit details, such as the clothes, face shape or glasses, tap CREATE NEW AVATAR. When you are finished editing the characters, tap SAVE. Then, avatar stickers will be automatically generated.
Deleting avatar stickers
On the Samsung keyboard, tap 🖍️ and tap Ⓘ at the bottom of the keyboard. Select the avatar stickers you want to delete and tap DELETE.

Viewing messages
Messages are grouped into message threads by contact.

You may incur additional charges for receiving messages when you are roaming.

1. Launch the Messages app.
2. On the messages list, select a contact.
3. View your conversation.
   To reply to the message, tap Enter message, enter a message, and then tap 📩.
   To adjust the font size, spread two fingers apart or pinch on the screen.

Blocking unwanted messages
Block messages from specific numbers added to your block list.

1. Launch the Messages app and tap 📧 → Settings → Block numbers and messages → Block numbers.
2. Tap INBOX and select a contact. Or, tap CONTACTS, select contacts, and then tap DONE.
   To manually enter a number, tap Enter number, enter a phone number, and then tap ✈️.
Setting the message notification
You can change notification sound, display options, and more.

1. Launch the Messages app, tap → Settings → Notifications, and then tap the switch to activate it.

2. Change the notification settings.

Setting a message reminder
You can set an alert at an interval to let you know that you have unchecked notifications. If this feature is not activated, launch the Settings app, tap Accessibility → Notification reminder, and then tap the switch to activate it. Then, tap the Messages switch to activate it.

Deleting messages

1. Launch the Messages app.

2. On the messages list, select a contact.

3. Tap and hold a message, tap Delete.
   To delete multiple messages, tick messages you want to delete.

4. Tap DELETE.
Internet

Introduction

Browse the Internet to search for information and bookmark your favourite webpages to access them conveniently.

Browsing webpages

1. Open the Samsung folder and launch the Internet app.
2. Tap the address field.
3. Enter the web address or a keyword, and then tap Go.

To view the toolbars, drag your finger downwards slightly on the screen.
To switch between tabs quickly, swipe to the left or right on the address field.

Bookmark the current webpage.  Access additional options.

Refresh the current webpage.

Open the homepage.

View your bookmarks, saved webpages, and recent browsing history.

Move between pages.

Open the browser’s tab manager.
Using secret mode

In secret mode, you can separately manage open tabs, bookmarks, and saved pages. You can lock secret mode using a password and your fingerprint.

Activating secret mode

In the toolbar at the bottom of the screen, tap Tabs → TURN ON SECRET MODE. If you are using this feature for the first time, set whether to use a password for secret mode.

In secret mode, the device will change the colour of the toolbars.

In secret mode, you cannot use some features, such as screen capture.

Changing security settings

You can change your password or the lock method.

Tap → Settings → Privacy → Secret mode security → Change password. To set your registered fingerprint as the lock method along with the password, tap the Fingerprints switch to activate it. Refer to Fingerprint recognition for more information about using your fingerprints.

Deactivating secret mode

In the toolbar at the bottom of the screen, tap Tabs → TURN OFF SECRET MODE.
Email

Setting up email accounts
Set up an email account when opening Email for the first time.

1. Open the Samsung folder and launch the Email app.
2. Enter the email address and password, and then tap SIGN IN.
   To manually register an email account, tap MANUAL SETUP.
3. Follow the on-screen instructions to complete the setup.

To set up another email account, tap → → Add account.
If you have more than one email account, you can set one as the default account. Tap → → → Set default account.

Sending emails

1. Tap to compose an email.
2. Add recipients and enter a subject line and text.
3. Tap SEND to send the mail.

Reading emails

When Email is open, the device will automatically retrieve new emails. To manually retrieve emails, swipe downwards on the top of the emails list.

Tap an email on the screen to read it.

If email syncing is disabled, new emails cannot be retrieved. To enable email syncing, tap → → your account name, and then tap the Sync account switch to activate it.
Camera

Introduction
Take photos and record videos using various modes and settings.

Camera etiquette
• Do not take photos or record videos of other people without their permission.
• Do not take photos or record videos where legally prohibited.
• Do not take photos or record videos in places where you may violate other people’s privacy.

Launching Camera
Use the following methods to launch Camera:
• Launch the Camera app.
• Press the Power key twice quickly.
• On the locked screen, drag 📸 outside the circle.

⚠️ Some methods may not be available depending on the region or service provider.
• Some camera features are not available when you launch the Camera app from the locked screen or when the screen is turned off while the screen lock method is set.
• If photos you take appear blurry, clean the camera lens and try again.
Basic shooting

Taking photos or recording videos

1. Tap the image on the preview screen where the camera should focus.

2. Tap ○ to take a photo or tap ● to record a video.

- To adjust the brightness of photos or videos, tap the screen. When the adjustment bar appears, drag ☀ on the adjustment bar towards + or -.
- To capture an image from the video while recording, tap 📼.
- To change the focus while recording a video, tap where you want to focus. To use auto focus mode, tap 📷.
• The preview screen may vary depending on the shooting mode and which camera is being used.
• The camera automatically shuts off when unused.
• Make sure that the lens is not damaged or contaminated. Otherwise, the device may not work properly in some modes that require high resolutions.
• Your device's camera features a wide-angle lens. Minor distortion may occur in wide-angle photos or videos and does not indicate device performance problems.

Selecting a lens for shooting
Take a photo or record a video after selecting the camera lens you want. On the preview screen, select a lens.

This feature is available only in AUTO mode.

• : You can take a basic photo or record a normal video with the normal lens.
• : You can take a photo or record a video of a larger scene clearly with the Ultra wide lens.
Apps and features

**Zooming in and out**

Use various methods to zoom in or out.

- Spread two fingers apart on the screen to zoom in, and pinch to zoom out.

    ![Zooming features are available only when using the rear camera.]

**Editing the shooting modes list**

You can edit the shooting modes list on the preview screen.

1. On the preview screen, tap → **Edit camera modes** → **Rear camera** or **Front camera**. Alternatively, tap and hold the shooting modes list on the preview screen.

2. Tick modes to use.

    To change the order of shooting modes, drag to another location.
Adding another camera button

Add another camera button to the location you want on the screen to capture photos more conveniently.
Drag to the preview screen.

If another camera button is not added, tap on the preview screen and tap the Floating Camera button switch to activate it.

Locking the focus (AF) and exposure (AE)

You can lock the focus or exposure on a selected area to prevent the camera from automatically adjusting based on changes to the subjects or light sources.
Tap and hold the area to focus, the AF/AE frame will appear on the area and the focus and exposure setting will be locked. The setting remains locked even after you take a photo.

This feature is available only in AUTO and PRO modes.
Using shooting modes

To change the shooting mode, drag the shooting modes list to the left or right, or swipe to the left or right on the preview screen.
Select a shooting mode you want.

Auto mode

Auto mode allows the camera to evaluate the surroundings and determine the ideal mode for the photo.
On the shooting modes list, tap AUTO.

Live focus mode

Take photos that focus on the face by blurring the background.

1. On the shooting modes list, tap LIVE FOCUS.

2. Face the camera lens.

3. Tap to take a photo.

Applying beauty effects

You can adjust the skin tone before taking portraits.

1. On the preview screen, tap 📸.

2. Select the options to apply beauty effects and take a photo.
Beauty mode

Take a photo with lightened skin tone and modified facial features.

On the shooting modes list, tap **BEAUTY**.

To apply beauty effect, tap 🎨 and select options.

Pro mode

Capture photos and videos while manually adjusting various shooting options, such as exposure value and ISO value.

On the shooting modes list, tap **PRO**. Select options and customise the settings, and then tap 📷 to take a photo or tap 🎥 to record a video.

Available options

- 🌅: Change the exposure value. This determines how much light the camera's sensor receives. For low-light situations, use a higher exposure.

- ISO: Select an ISO value. This controls camera light sensitivity. Low values are for stationary or brightly lit objects. Higher values are for fast-moving or poorly lit objects. However, higher ISO settings can result in noise in photos.

- WB: Select an appropriate white balance, so images have a true-to-life colour range. You can set the colour temperature.

Panorama mode

Using panorama mode, take a series of photos and then stitch them together to create a wide scene.

To get the best shots using panorama mode, follow these tips:

- Move the camera slowly in one direction.

- Keep the image within the frame on the camera’s viewfinder. If the preview image is out of the guide frame or you do not move the device, the device will automatically stop taking photos.

- Avoid taking photos of indistinct backgrounds, such as an empty sky or a plain wall.
Apps and features

1 On the shooting modes list, tap **PANORAMA**.

2 Tap ○ and move the device slowly in one direction.

3 Tap ● to stop taking photos.

**Stickers mode**
Capture photos with various live stickers. As you move your face, stickers will track with your movements.

1 On the shooting modes list, tap **STICKERS**.

2 Tap 🐻 and select a sticker you want.

3 Tap ○ to take a photo.

**Applying stickers randomly**
You can apply stickers randomly, instead of selecting one from the stickers list.
Tap **Random** repeatedly until the sticker you want appears.
Continuous shot mode

Take a series of photos of moving subjects.
On the shooting modes list, tap CONTINUOUS SHOT.
Tap and hold ○ to take several photos continuously.

Selfie mode

Take self-portraits with the front camera. You can preview various beauty effects on the screen.

1. On the preview screen, swipe upwards or downwards, or tap 🔄 to switch to the front camera for self-portraits.

2. On the shooting modes list, tap SELFIE.

3. Face the front camera lens.

4. Tap ○ to take a photo.
   Alternatively, show your palm to the front camera. After recognising your palm, a countdown timer will appear. When the time is up, the device will take a photo.

Applying beauty effects

You can modify facial features, such as your skin tone or face shape, before taking self-portraits.

1. On the preview screen, tap 🎨.

2. Select the options to apply beauty effects to your face and take a photo of yourself.
Customising camera settings

Options for current shooting mode

On the preview screen, use the following options.

The available options may vary depending on the shooting mode and which camera is being used.

- ☑: Turn on and off the full preview screen.
- ✕: Activate or deactivate the flash.
- ✺: Select a filter effect to use when taking photos or recording videos.
- ☀: Select a metering method. This determines how light values are calculated. ☀
  - Centre-weighted uses the light in the centre portion of the shot to calculate the exposure of the shot. ☀
  - Spot uses the light in a concentrated centre area of the shot to calculate the exposure of the shot. ☀
  - Matrix averages the entire scene.

Camera settings

On the preview screen, tap ☀. Some options may not be available depending on the shooting mode.

REAR CAMERA

- **Picture size**: Select a resolution for photos. Using a higher resolution will result in higher quality photos, but they will take up more memory.
- **Video size**: Select a resolution for videos. Using a higher resolution will result in higher quality videos, but they will take up more memory.
- **Timer**: Select the length of the delay before the camera automatically takes a photo.
- **HDR (rich tone)**: Take photos with rich colours and reproduce details even in bright and dark areas.
- **Watermark**: Add a watermark in the bottom left corner when taking pictures.
FRONT CAMERA

- **Picture size**: Select a resolution for photos. Using a higher resolution will result in higher quality photos, but they will take up more memory.
- **Video size**: Select a resolution for videos. Using a higher resolution will result in higher quality videos, but they will take up more memory.
- **Timer**: Select the length of the delay before the camera automatically takes a photo.
- **HDR (rich tone)**: Take photos with rich colours and reproduce details even in bright and dark areas.
- **Save pictures as previewed**: Invert the image to create a mirror-image of the original scene, when taking photos with the front camera.
- **Show palm**: Set the device to take a photo when the camera recognises your palm.

COMMON

- **Edit camera modes**: View available shooting modes or edit the shooting modes list.
- **Grid lines**: Display viewfinder guides to help composition when selecting subjects.
- **Location tags**: Attach a GPS location tag to the photo.
  - GPS signal strength may decrease in locations where the signal is obstructed, such as between buildings or in low-lying areas, or in poor weather conditions.
  - Your location may appear on your photos when you upload them to the Internet. To avoid this, deactivate the location tag setting.
- **Review pictures**: Set the device to show photos after capturing them.
- **Quick launch**: Set the device to launch the camera by pressing the Power key twice quickly.

This feature may not be available depending on the region or service provider.
• **Storage location**: Select the memory location for storage. This feature will appear when you insert a memory card.
• **Floating Camera button**: Add a camera button that you can place anywhere on the screen.
• **Press Volume key to**: Set the device to use the Volume key to control the shutter, zoom in or out, or adjust the volume level for system sounds.
• **Reset settings**: Reset the camera settings.
• **Contact us**: Ask questions or view frequently asked questions. Refer to Samsung Members for more information.

### Gallery

#### Introduction

View images and videos stored in your device. You can also manage images and videos by album or create stories.
Viewing images

1. Launch the **Gallery** app and tap **PICTURES**.

2. Select an image.

   - Access additional options.
   - Add the image to favourites.
   - Recognise products in the image and search for information online.
   - Add a sticker.
   - Draw on the image.
   - Apply a filter or effect.
   - Share the image with others.
   - Modify the image.
   - Delete the image.

You can create a GIF animation or collage from multiple images. Tap ➔ **Create GIF** or **Create collage**, and then select images.

Searching for images

Launch the **Gallery** app and tap 📜 to view images sorted by category, such as types, locations, or documents.

To search for images by entering keywords, tap the search field.
Viewing videos

1. Launch the **Gallery** app and tap **PICTURES**.

2. Select a video to play. Video files show the ▶ icon on the preview thumbnail.

3. Tap ▶ to play the video.

Drag your finger up or down on the left side of the playback screen to adjust the brightness, or drag your finger up or down on the right side of the playback screen to adjust the volume.

To rewind or fast-forward, swipe to the left or right on the playback screen.
Viewing the details of images and videos

You can view file details, such as people, location, and basic information. If there is auto created content, such as a story or a GIF, the content will also be displayed.

While viewing an image or on the video preview screen, drag upwards on the screen. File details will appear.

You can also view related content by tapping information on the screen.
**Viewing albums**

You can view your images and videos sorted by folders or albums. The animations or collages you have created will also be sorted in your folders on the albums list.

Launch the **Gallery** app, tap **ALBUMS**, and then select an album.

**Hiding albums**

You can hide albums.

You cannot hide albums created by default, such as the **Camera** and **Screenshots** albums.

1. Launch the **Gallery** app and tap **ALBUMS**.
2. Tap → **Hide or unhide albums**.
3. Select albums to hide and tap **APPLY**.

To show albums again, tap → **Hide or unhide albums**, deselect albums to show, and then tap **APPLY**.

**Viewing stories**

When you capture or save images and videos, the device will read their date and location tags, sort the images and videos, and then create stories. To create stories automatically, you must capture or save multiple images and videos.

Launch the **Gallery** app, tap **STORIES**, and then select a story.

**Creating stories**

Create stories with various themes.

1. Launch the **Gallery** app and tap **STORIES**.
2. Tap → **Create story**.
3. Enter a title for the story and tap **CREATE**.

4. Tick images or videos to include in the story and tap **DONE**.

To add images or videos to a story, select a story and tap **ADD**.

To remove images or videos from a story, select a story, tap → **Edit**, tick images or videos to remove, and then tap → **Remove from story**.

**Deleting stories**

1. Launch the **Gallery** app and tap **STORIES**.

2. Tap and hold a story to delete, and tap **DELETE**.

**Sharing albums**

Create albums and share them with your family and friends saved in your contacts. They can view shared albums on devices signed in to their Samsung account, such as smartphones, TVs, or refrigerators.

- To use this feature, your phone number must be verified.
- To use this feature, you must register and sign in to your Samsung account.
- You may incur additional charges when sharing files via the mobile network.

**Creating albums to share**

1. Launch the **Gallery** app and tap **SHARED**.
   When you use this feature for the first time, tap **GET STARTED** and agree to the terms and conditions of Samsung Social.

2. Tap **+**.
3 Enter a title for the album.

4 Select a group to share with.
   If you want to create a group, tap Add group, enter a group name, and select contacts to add to the group.

5 Tap DONE.
   The recipients will receive a notification.

**Adding images or videos to an album**

1 Launch the Gallery app and tap SHARED.

2 Select an album to add images or videos.

3 Tap ADD and tick images or videos to add.

4 Tap DONE.
Deleting images or videos

Deleting an image or a video
Select an image or a video and tap at the bottom of the screen.

Deleting multiple images and videos

1. On the Gallery screen, tap and hold an image or a video to delete.
2. Tick the images or videos to delete.
3. Tap DELETE.

Multi window

Introduction
Multi window lets you run two apps at the same time in the split screen view. You can also run multiple apps at the same time in the pop-up view.

Some apps may not support this feature.
Split screen view

1. Tap the Recents button to open the list of recently used apps.

2. Swipe upwards or downwards and tap ☐ on a recent app window. The selected app will launch in the upper window.

3. In the lower window, swipe upwards or downwards to select another app to launch. To launch apps not in the list of recently used apps, tap APP LIST and select an app.
Using additional options

Tap the bar between the app windows to access additional options.

Adjusting the window size

Drag the bar between the app windows up or down to adjust the size of the windows. When you drag the bar between the app windows to the top or bottom edge of the screen, the window will be maximised.

Minimising the split screen view

Tap the Home button to minimise the split screen view. The icon will appear on the status bar. The app in the lower window will close and the app in the upper window will remain active in the minimised split screen view.

To close the minimised split screen view, tap 🗿.
Pop-up view

1. Tap the Recents button to open the list of recently used apps.

2. Swipe upwards or downwards, tap and hold an app window, and then drag it to Drop here for pop-up view. The app screen will appear in the pop-up view.

Moving pop-up windows

To move a pop-up window, tap the window’s toolbar and drag it to a new location.
**Samsung Members** offers support services to customers, such as device problem diagnosis, and lets users submit questions and error reports. You can also share information with others in the Galaxy users’ community or view the latest Galaxy news and tips. **Samsung Members** can help you solve any problems you might encounter while using your device.

- This app’s availability and supported features may vary depending on the region or service provider.
- To submit your feedback or post your comments, you must register and sign in to your Samsung account. Refer to [Samsung account](#) for more information.
Samsung Notes

Create notes by entering text from the keyboard or by handwriting or drawing on the screen. You can also insert images or voice recordings into your notes.

Creating notes

1. Launch the Samsung Notes app and tap 📊.

2. Select an input method from the toolbar at the top of the screen and compose a note.

   - Enter text using the keyboard.
   - Write or draw with pens.
   - Paint with brushes.
   - Insert an image or a voice recording.

3. When you are finished composing the note, tap SAVE.

Deleting notes

1. Launch the Samsung Notes app.

2. Tap and hold a note to delete.
   - To delete multiple notes, tick more notes to delete.

3. Tap 🗑.

Calendar

Manage your schedule by entering upcoming events in your planner.

Creating events

1. Launch the Calendar app and tap 📊 or double-tap a date.
   - If the date already has saved events in it, tap the date and tap 📊.
2 Enter event details.

Set the duration.
Enter a title.
Select a calendar to save the event to.
Enter the location.
Add a note.
Add more details.
Change the event's colour.
Set an alarm.
Attach a map.

3 Tap SAVE to save the event.

Syncing events with your accounts

1 Launch the Settings app, tap Cloud and accounts → Accounts and select the account to sync with.

2 Tap Sync account and tap the Sync Calendar switch to activate it.
   For the Samsung account, tap → Sync settings and tap the Calendar switch to activate it.

To add accounts to sync with, launch the Calendar app and tap → Manage calendars → Add account. Then, select an account to sync with and sign in. When an account is added, it will appear on the list.
Radio

Listening to the FM radio

Launch the Radio app.

Before you use this app, you must connect a headset, which serves as the radio antenna.

The FM radio scans and saves available stations automatically when running for the first time.

Tap \( \text{on} \) to turn on the FM radio. Select the radio station you want from the stations list.

Record a song from the FM radio.

Turn the FM radio on or off.

Enter radio station frequency manually.

Fine-tune the frequency.

View the list of favourite stations.

Scan and save available stations automatically.

Add the current radio station to the favourites list.

Access additional options.

Search for an available radio station.

View the list of available stations.

Playing through the speaker

You can listen to the radio through the speaker instead of the connected earphone.

Tap \( \text{on} \) → Play through speaker.
Scanning radio stations

Launch the Radio app.

Tap STATIONS → SCAN, and then select a scan option. The FM radio scans and saves available stations automatically.

Select the radio station you want from the stations list.

Voice Recorder

Use this app to record or play voice memos.

1. Open the Samsung folder and launch the Voice Recorder app.

2. Tap 🎤 to start recording. Speak into the microphone.
   
   Tap 🎤 to pause recording.
   
   While making a voice recording, tap BOOKMARK to insert a bookmark.

3. Tap ■ to finish recording.

4. Enter a file name and tap SAVE.
My Files

Access and manage various files stored in the device.
Open the Samsung folder and launch the My Files app.
View files that are stored in each storage.
To free up the device’s storage, tap → Get more space.
To search for files or folders, tap Q.

Clock

Introduction
Set alarms, check the current time in many cities around the world, time an event, or set a specific duration.

ALARM
Launch the Clock app and tap ALARM.

Setting alarms
Tap + in the alarms list, set an alarm time, select the days on which the alarm will repeat, set other various alarm options, and then tap SAVE.
To open the keypad to enter an alarm time, tap the time input field.
To activate or deactivate alarms, tap the switch next to the alarm in the alarms list.

Stopping alarms
Tap DISMISS to stop an alarm. If you have previously enabled the snooze option, tap SNOOZE to repeat the alarm after a specified length of time.

Deleting alarms
Tap and hold an alarm, tick alarms to delete, and then tap DELETE.
**WORLD CLOCK**

Launch the **Clock** app and tap **WORLD CLOCK**.

**Creating clocks**

Tap +, enter a city name or select a city from the globe, and then tap **ADD**.

To use the time zone converter, tap 🕒.

**Deleting clocks**

Tap and hold a clock, tick clocks to delete, and then tap **DELETE**.

**STOPWATCH**

1. Launch the **Clock** app and tap **STOPWATCH**.

2. Tap **START** to time an event.
   
   To record lap times while timing an event, tap **LAP**.

3. Tap **STOP** to stop timing.
   
   To restart the timing, tap **RESUME**.
   
   To clear lap times, tap **RESET**.

**TIMER**

1. Launch the **Clock** app and tap **TIMER**.
   
   To add a frequently used timer, tap 🕒, set the duration and name, and then tap **ADD**.

2. Set the duration, and then tap **START**.
   
   To open the keypad to enter the duration, tap the duration input field.

3. Tap **DISMISS** when the timer goes off.
**Calculator**

Perform simple or complex calculations.
Launch the **Calculator** app.
Rotate the device to landscape orientation to display the scientific calculator. If **Auto-rotate** is disabled, tap ☰️ to display the scientific calculator.
To see the calculation history, tap **HISTORY**. To close the calculation history panel, tap **KEYPAD**.
To clear the history, tap **HISTORY → CLEAR HISTORY**.
To use the unit conversion tool, tap ⬆️⬇️. You can convert various values, such as area, length, or temperature, into other units.

**Game Launcher**

**Introduction**

Game Launcher gathers your games downloaded from **Play Store** and **Galaxy Apps** into one place for easy access. You can set the device to game mode to play games more easily.

- Downloaded apps.
- Open games with or without sound.
- Access additional options.
- View your gameplay information.
- Change the performance mode.
- View more games and install them.
Using Game Launcher

1. Launch the Game Launcher app.
   - If Game Launcher does not appear, launch the Settings app, tap Advanced features → Games, and then tap the Game Launcher switch to activate it.

2. Tap a game from the games list.
   - To find more games, drag the screen upwards.
   - Games downloaded from Play Store and Galaxy Apps will be automatically shown on the Game Launcher screen. If you cannot see your games, tap → Add a game.

Removing a game from Game Launcher

Tap and hold a game and tap Remove.

Changing the performance mode

You can change the game performance mode.

Launch the Game Launcher app, tap Game performance, and then drag the bar to select the mode you want.

- **Focus on power saving**: This saves battery power while playing games.
- **Balanced**: This balances the performance and the battery usage time.
- **Focus on performance**: This focuses on giving you the best possible performance while playing games.

To change the settings for each game, tap the Settings for each game switch to activate it.

Battery power efficiency may vary by game.
Using Game Tools

You can use various options on the Game Tools panel while playing a game. To open the Game Tools panel, tap ✕ on the navigation bar. If the navigation bar is hidden, drag upwards from the bottom of the screen to show it.

- Mute notification sounds and display notifications only for incoming calls and emergency alerts.
- Set additional features.
- Hide the buttons on the navigation bar.
- Launch apps in a pop-up window.
- Access the Game Tools settings.
- Edit the apps list.
- Record your game session.
- Capture screenshots.
- Lock the touchscreen while the game is being played.

Available options may vary depending on the game.

Blocking notifications during games

Tap ✕ and tap the No alerts during game switch to activate it. The device will mute notification sounds and display only notifications for incoming calls and emergency alerts, so that you can enjoy your games without being disturbed. If you receive an incoming call, a small notification will appear at the top of the screen.
Sharing content

Share content by using various sharing options. The following actions are an example of sharing images.

You may incur additional charges when sharing files via the mobile network.

1. Launch the Gallery app and select an image.

2. Tap and select a sharing method, such as message and email.

When you have a communication or sharing history, the people you contacted will appear on the sharing options panel. To directly share content with them via the corresponding app, select a person’s icon. If the feature is not activated, launch the Settings app, tap Advanced features, and then tap the Direct share switch to activate it.

Using additional features

- **Link Sharing**: Share large files. Upload files to the Samsung storage server and share them with others via a Web link or a code. To use this feature, your phone number must be verified.

- **Share to device**: View your device’s displayed content on a large screen by connecting your device to a screen mirroring-enabled TV or monitor.

When the image is sent to the recipients’ devices, a notification will appear on their devices. Tap the notification to view or download the image.
Google apps

Google provides entertainment, social network, and business apps. You may require a Google account to access some apps.

To view more app information, access each app's help menu.

Some apps may not be available or may be labelled differently depending on the region or service provider.

Chrome
Search for information and browse webpages.

Gmail
Send or receive emails via the Google Mail service.

Maps
Find your location on the map, search the world map, and view location information for various places around you.

Play Music
Discover, listen to, and share music on your device. You can upload music collections stored on your device to the cloud and access them later.

Play Movies & TV
Purchase or rent videos, such as movies and TV programmes, from Play Store.

Drive
Store your content on the cloud, access it from anywhere, and share it with others.
Apps and features

**YouTube**
Watch or create videos and share them with others.

**Photos**
Search for, manage, and edit all your photos and videos from various sources in one place.

**Google**
Search quickly for items on the Internet or your device.

**Duo**
Make a simple video call.
Settings

Introduction

Customise device settings. You can make your device more personalised by configuring various setting options.

Launch the Settings app.

To search for settings by entering keywords, tap Search.

Connections

Options

Change settings for various connections, such as the Wi-Fi feature and Bluetooth.

On the Settings screen, tap Connections.

- **Wi-Fi**: Activate the Wi-Fi feature to connect to a Wi-Fi network and access the Internet or other network devices. Refer to Wi-Fi for more information.
- **Bluetooth**: Use Bluetooth to exchange data or media files with other Bluetooth-enabled devices. Refer to Bluetooth for more information.
- **Data usage**: Keep track of your data usage amount and customise the settings for the limitation. Set the device to automatically disable the mobile data connection when the amount of mobile data you have used reaches your specified limit.
  
  You can also activate the data saver feature to prevent some apps running in the background from sending or receiving data. Refer to Data saver for more information.
- **Flight mode**: Set the device to disable all wireless functions on your device. You can use only non-network services.

Follow the regulations provided by the airline and the instructions of aircraft personnel. In cases where it is allowed to use the device, always use it in flight mode.
• **NFC and payment** (NFC-enabled models): Set the device to allow you to read near field communication (NFC) tags that contain information about products. You can also use this feature to make payments and buy tickets for transportation or events after downloading the required apps. Refer to [NFC and payment (NFC-enabled models)](#) for more information.

   This feature may not be available depending on the region or service provider.

• **Mobile Hotspot and Tethering**: Use the device as a mobile hotspot to share the device’s mobile data connection with other devices when the network connection is not available. Connections can be made via Wi-Fi, USB, or Bluetooth. Refer to [Mobile Hotspot and Tethering](#) for more information.

• **Mobile networks**: Configure your mobile network settings.

• **SIM card manager** (dual SIM models): Activate your SIM or USIM cards and customise the SIM card settings. Refer to [SIM card manager (dual SIM models)](#) for more information.

• **Location**: Change settings for location information permissions.

• **More connection settings**: Customise settings to control other features. Refer to [More connection settings](#) for more information.

## Wi-Fi

Activate the Wi-Fi feature to connect to a Wi-Fi network and access the Internet or other network devices.

### Connecting to a Wi-Fi network

1. On the Settings screen, tap **Connections** → **Wi-Fi**, and then tap the switch to activate it.

2. Select a network from the Wi-Fi networks list.

   Networks that require a password appear with a lock icon. Enter the password and tap CONNECT.
• Once the device connects to a Wi-Fi network, the device will reconnect to that network each time it is available without requiring a password. To prevent the device connecting to the network automatically, select it from the list of networks and tap **FORGET**.

• If you cannot connect to a Wi-Fi network properly, restart your device’s Wi-Fi feature or the wireless router.

**Wi-Fi Direct**

Wi-Fi Direct connects devices directly via a Wi-Fi network without requiring an access point.

1. On the Settings screen, tap **Connections → Wi-Fi**, and then tap the switch to activate it.

2. Tap **Wi-Fi Direct**.
   
   The detected devices are listed.
   
   If the device you want to connect to is not in the list, request that the device turns on its Wi-Fi Direct feature.

3. Select a device to connect to.
   
   The devices will be connected when the other device accepts the Wi-Fi Direct connection request.

**Sending and receiving data**

You can share data, such as contacts or media files, with other devices. The following actions are an example of sending an image to another device.

1. Launch the **Gallery** app and select an image.

2. Tap **→ Wi-Fi Direct** and select a device to transfer the image to.

3. Accept the Wi-Fi Direct connection request on the other device.
   
   If the devices are already connected, the image will be sent to the other device without the connection request procedure.
Ending the device connection

1 On the Settings screen, tap **Connections → Wi-Fi**.

2 Tap **Wi-Fi Direct**.
   The device displays the connected devices in the list.

3 Tap the device name to disconnect the devices.

Bluetooth

Use Bluetooth to exchange data or media files with other Bluetooth-enabled devices.

- Samsung is not responsible for the loss, interception, or misuse of data sent or received via Bluetooth.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by the Bluetooth SIG, may be incompatible with your device.
- Do not use the Bluetooth feature for illegal purposes (for example, pirating copies of files or illegally tapping communications for commercial purposes). Samsung is not responsible for the repercussion of illegal use of the Bluetooth feature.

Pairing with other Bluetooth devices

1 On the Settings screen, tap **Connections → Bluetooth**, and then tap the switch to activate it.
   The detected devices will be listed.

2 Select a device to pair with.
   If the device you want to pair with is not on the list, set the device to enter Bluetooth pairing mode. Refer to the other device’s user manuals.

- Your device is visible to other devices while the Bluetooth settings screen is open.
3. Accept the Bluetooth connection request on your device to confirm. The devices will be connected when the other device accepts the Bluetooth connection request.

**Sending and receiving data**

Many apps support data transfer via Bluetooth. You can share data, such as contacts or media files, with other Bluetooth devices. The following actions are an example of sending an image to another device.

1. Launch the **Gallery** app and select an image.

2. Tap 🔗 → **Bluetooth**, and then select a device to transfer the image to.
   - If your device has paired with the device before, tap the device name without confirming the auto-generated passkey.
   - If the device you want to pair with is not in the list, request that the device turns on its visibility option.

3. Accept the Bluetooth connection request on the other device.

**Unpairing Bluetooth devices**

1. On the Settings screen, tap **Connections** → **Bluetooth**. The device displays the paired devices in the list.

2. Tap 🔄 next to the device name to unpair.

3. Tap **Unpair**.
Data saver

Reduce your data usage by preventing some apps running in the background from sending or receiving data.

On the Settings screen, tap Connections → Data usage → Data saver and tap the switch to activate it.

When the data saver feature is activated, the icon will appear on the status bar.

To select apps to use data without restriction, tap Allow app while Data saver on and select apps.

NFC and payment (NFC-enabled models)

Your device allows you to read near field communication (NFC) tags that contain information about products. You can also use this feature to make payments and buy tickets for transportation or events after downloading the required apps.

The device contains a built-in NFC antenna. Handle the device carefully to avoid damaging the NFC antenna.

Reading information from NFC tags

Use the NFC feature to send images or contacts to other devices, and read product information from NFC tags.

1. On the Settings screen, tap Connections and tap the NFC and payment switch to activate it.
2 Place the NFC antenna area on the back of your device near an NFC tag. The information from the tag appears.

Ensure that the device’s screen is turned on and unlocked. Otherwise, the device will not read NFC tags or receive data.

Making payments with the NFC feature

Before you can use the NFC feature to make payments, you must register for the mobile payment service. To register or get more information about the service, contact your service provider.

1 On the Settings screen, tap Connections and tap the NFC and payment switch to activate it.

2 Touch the NFC antenna area on the back of your device to the NFC card reader.

To set the default payment app, open the Settings screen and tap Connections → NFC and payment → Tap and pay → PAYMENT, and then select an app.

The payment services list may not include all available payment apps.
Sending data with the NFC feature
Allow data exchange when your device's NFC antenna touches the other device's NFC antenna.

1. On the Settings screen, tap Connections → NFC and payment and tap the switch to activate it.

2. Tap the Android Beam switch to activate it.

3. Select an item and touch the other device's NFC antenna to your device's NFC antenna.

4. When Touch to beam. appears on the screen, tap your device's screen to send the item.

If both devices try to send data simultaneously, the file transfer may fail.
Mobile Hotspot and Tethering

Use the device as a mobile hotspot to share the device’s mobile data connection with other devices when the network connection is not available. Connections can be made via Wi-Fi, USB, or Bluetooth.

On the Settings screen, tap Connections → Mobile Hotspot and Tethering.

You may incur additional charges when using this feature.

- **Mobile Hotspot**: Use the mobile hotspot to share the device’s mobile data connection with computers or other devices.
- **Bluetooth tethering**: Use Bluetooth tethering to share the device’s mobile data connection with computers or other devices via Bluetooth.
- **USB tethering**: Use USB tethering to share the device’s mobile data connection with a computer via USB. When connected to a computer, the device is used as a wireless modem for the computer.

Using the mobile hotspot

Use your device as a mobile hotspot to share your device’s mobile data connection with other devices.

1. On the Settings screen, tap Connections → Mobile Hotspot and Tethering → Mobile Hotspot.

2. Tap the switch to activate it.
   - The icon appears on the status bar. Other devices can find your device in the Wi-Fi networks list.
   - To set a password for the mobile hotspot, tap → Configure Mobile Hotspot and select the level of security. Then, enter a password and tap SAVE.

3. On the other device’s screen, search for and select your device from the Wi-Fi networks list.
   - If the mobile hotspot is not found, on your device, tap → Configure Mobile Hotspot and deselect Hide my device.
   - If the other device cannot connect to the mobile hotspot, on your device, tap → Allowed devices and tap the Allowed devices only switch to deactivate it.

4. On the connected device, use the device’s mobile data connection to access the Internet.
SIM card manager (dual SIM models)

Activate your SIM or USIM cards and customise the SIM card settings. Refer to Using dual SIM or USIM cards (dual SIM models) for more information.

On the Settings screen, tap Connections → SIM card manager.

- **Calls**: Select a SIM or USIM card for voice calls.
- **Text messages**: Select a SIM or USIM card for messaging.
- **Mobile data**: Select a SIM or USIM card for data services.
- **Confirm SIM card for calls**: Set the device to display the SIM or USIM card selection pop-up window when returning a call or calling from a message. The pop-up window will appear only if the SIM or USIM card used for the previous call or message is different from your preferred SIM or USIM card.
- **Dual SIM always on / Smart dual SIM**: Set the device to allow incoming calls from the other SIM or USIM card during a call.

When this feature is enabled, you may incur additional charges for call forwarding depending on the region or service provider.

More connection settings

Customise settings to control other connection features.

On the Settings screen, tap Connections → More connection settings.

- **Nearby device scanning**: Set the device to scan for nearby devices to connect to.
- **Printing**: Configure settings for printer plug-ins installed on the device. You can search for available printers or add one manually to print files. Refer to Printing for more information.
- **VPN**: Set up virtual networks (VPNs) on your device to connect to a school or company's private network.
- **Ethernet**: When you connect an Ethernet adaptor, you can use a wired network and configure network settings.
Settings

Printing
Configure settings for printer plug-ins installed on the device. You can connect the device to a printer via Wi-Fi or Wi-Fi Direct, and print images or documents.

有些打印机可能不兼容设备。

Adding printer plug-ins
Add printer plug-ins for printers you want to connect the device to.

2. Search for a printer plug-in in Play Store.

3. Select a printer plug-in and install it.

4. Select the printer plug-in and tap the switch to activate it.
   The device will automatically search for printers that are connected to the same Wi-Fi network as your device.

5. Select a printer to add.

   > To add printers manually, tap → Add printer.

Printing content
While viewing content, such as images or documents, access the options list, tap Print → → All printers..., and then select a printer.

Printing methods may vary depending on the content type.
Sounds and vibration

Options

Change settings for various sounds on the device.

On the Settings screen, tap Sounds and vibration.

- **Sound mode**: Set the device to use sound mode, vibration mode, or silent mode.
- **Vibrate while ringing**: Set the device to vibrate and play a ringtone for incoming calls.
- **Use Volume keys for media**: Set the device to adjust the media volume level when you press the Volume key.
- **Volume**: Adjust the volume level for call ringtones, music and videos, system sounds, and notifications.
- **Ringtone**: Change the call ringtone.
- **Vibration pattern**: Select a vibration pattern.
- **Notification sounds**: Change the notification sound.
- **Do not disturb**: Set the device to mute incoming calls, notification sounds, and media, except for allowed exceptions.
- **Touch sounds**: Set the device to sound when you select an app or option on the touchscreen.
- **Screen lock sounds**: Set the device to sound when you lock or unlock the touchscreen.
- **Charging sound**: Set the device to sound when it is connected to a charger.
- **Dialling keypad tones**: Set the device to sound when you tap the buttons on the keypad.
- **Keyboard sound**: Set the device to sound when a key is touched.
- **Sound quality and effects**: Configure additional sound settings.

You can also activate the surround sound mode. Refer to Dolby Atmos (surround sound) for more information.
Dolby Atmos (surround sound)

Select a surround sound mode optimised for various types of audio, such as movies, music, and voice. With Dolby Atmos, you can experience moving audio sounds that flows all around you.

On the Settings screen, tap Sounds and vibration → Sound quality and effects → Dolby Atmos, tap the switch to activate it, and then select a mode.

Before you use this feature, you must connect an earphone.

Notifications

Change the notification settings for each app.

On the Settings screen, tap Notifications.

To display icon badges, tap the App icon badges switch to activate it. To change the badge style, tap App icon badges.

With number

Without number

To customise notification settings for more apps, tap ADVANCED and select an app.
Display

Options

Change the display and the Home screen settings.

On the Settings screen, tap **Display**.

- **Brightness**: Adjust the brightness of the display.
- **Auto brightness**: Set the device to save power by adjusting the brightness of the display automatically.
  
  This feature may not be available depending on the region or service provider.

- **Outdoor mode**: Activate outdoor mode to make the display easier to see in bright conditions.
  
  This feature may not be available depending on the region or service provider.

- **Font and screen zoom**: Change the screen zoom setting or font size and style.
- **Home screen**: Change the size of the grid to display more or fewer items on the Home screen and more.
- **Full screen apps**: Select apps to use with the full screen aspect ratio.
  
  If the app does not work properly with this feature activated, deselect the app on the list.

- **Icon frames**: Set whether to display shaded backgrounds to make icons stand out.
- **Status bar**: Customise the settings for displaying notifications or indicators on the status bar.
- **Navigation bar**: Change the navigation bar settings. Refer to **Navigation bar (soft buttons)** for more information.
- **Screen timeout**: Set the length of time the device waits before turning off the display's backlight.
- **Screensaver**: Set the device to launch a screensaver when the device is charging. Refer to **Screensaver** for more information.
**Screensaver**

You can set to display images as a screensaver when the screen turns off automatically. The screensaver will be displayed when the device is charging.

1. On the Settings screen, tap **Display → Screensaver** and tap the switch to activate it.

2. Select an option.
   - If you select **Photo Frame**, a slideshow with selected images will start. If you select **Photo Table**, selected images will appear as small cards and overlap.

3. Tap to select albums for displaying images.

4. When you are finished, tap the Back button.
   - To preview the selected option, tap **PREVIEW**.

   When you tap the screen while your screensaver is displayed, the screen will turn on.

**Wallpapers and themes**

Change the wallpaper settings for the Home screen and the locked screen or apply various themes to the device.

On the Settings screen, tap **Wallpapers and themes**.

- **Wallpapers**: Change the wallpaper settings for the Home screen and the locked screen.
- **Themes**: Change the device’s theme.
- **Icons**: Change the icon style.
Options

Activate advanced features and change the settings that control them.

On the Settings screen, tap **Advanced features**.

- **Games**: Activate the Game Launcher. Refer to **Game Launcher** for more information.
- **One-handed mode**: Activate one-handed operation mode for your convenience when using the device with one hand.
- **Finger sensor gestures**: Set the device to open or close the notification panel when you swipe upwards or downwards on the fingerprint recognition sensor. This feature is not available when the sensor is detecting your fingerprint.
- **Quick launch Camera**: Set the device to launch the camera by pressing the Power key twice quickly.

  This feature may not be available depending on the region or service provider.

- **Device assistance app**: Select a device assistance app to launch when you tap and hold the Home button. The device assistance app will gather information from the current screen and provide related information, apps, and features.
- **Multi window**: Select a Multi window launch method.
- **Direct call**: Set the device to make a voice call by picking up and holding the device near your ear while viewing message or contact details.
- **Smart alert**: Set the device to alert you if you have missed calls or new messages when you pick up the device.

  This feature may not work if the screen is turned on or the device is not on a flat surface.
• **Easy mute**: Set the device to mute incoming calls or alarms by facing the device’s screen downwards.

• **Swipe to call or send messages**: Set the device to make a call or send a message when you swipe to the right or left on a contact or a phone number in the **Phone** or **Contacts** app.

• **Chat over video**: Set the device to chat and watch videos at the same time.

  ![Note](https://via.placeholder.com/15)
  
  This feature may not be available depending on the region or service provider.

• **Dual Messenger**: Install the second app and use two separate accounts for the same messenger app. Refer to **Dual Messenger** for more information.

• **Send SOS messages / Panic mode**: Set the device to make an emergency call by pressing the Power key three times. You can also send help messages and attach pictures to the recipients.

  ![Note](https://via.placeholder.com/15)
  
  This feature may not be available depending on the region or service provider.

• **Direct share**: Set the device to display the people you contacted on the sharing options panel to allow you to share content directly.

• **Touch sensitivity**: Increase the touch sensitivity of the screen for use with screen protectors.
Dual Messenger

Install the second app and use two separate accounts for the same messenger app.

2. Tap the switch of an app to install the second app.
   The second app will be installed. The second app’s icon will be displayed with ✅. When you receive notifications from the second app, the notifications will be displayed with ✅ to distinguish them from the first app’s notifications.

- The Dual Messenger feature may not be available depending on the app.
- Some features of the app may be limited for the second app.

Uninstalling a second app

1. On the Settings screen, tap Advanced features → Dual Messenger.

2. Tap the switch of the app you want to disable and tap DISABLE or UNINSTALL.
   All data related to the second app will be deleted.

- If you uninstall the first app, the second app will also be deleted.
Device maintenance

The device maintenance feature provides an overview of the status of your device’s battery, storage, memory, and system security. You can also automatically optimise the device with a tap of your finger, and ultra data saving mode helps you manage your mobile data usage.

Using the quick optimisation feature

On the Settings screen, tap Device maintenance → FIX NOW or OPTIMISE NOW.

The quick optimisation feature improves device performance through the following actions.

- Clearing some memory.
- Deleting unnecessary files and closing apps running in the background.
- Managing abnormal battery usage.
- Scanning for crashed apps and malware.
- Saving mobile data usage by preventing background apps from using mobile data.
Battery

Check the remaining battery power and time to use the device. For devices with low battery levels, conserve battery power by activating power saving features.

On the Settings screen, tap **Device maintenance → Battery**.

- The usage time left shows the time remaining before the battery power runs out. Usage time left may vary depending on your device settings and operating conditions.
- You may not receive notifications from some apps that use power saving mode.

Power saving mode

- **MID**: Activate power saving mode to extend the battery’s usage time.
- **MAX**: In maximum power saving mode, the device decreases battery consumption by applying the dark theme and limiting the apps and features available. Network connections, except for the mobile network, will be deactivated.

Managing the battery

You can save battery power by preventing apps that are running in the background from using battery power when they are not being used. Tick apps from the apps list and tap **SAVE POWER**. Also, tap **Advanced settings** and set the **App power monitor** options.

You can set the device to charge the battery more quickly. Tap **Advanced settings** and tap the **Fast cable charging** switch to activate it.
Storage

Check the status of the used and available memory.

On the Settings screen, tap **Device maintenance → Storage**.

- The actual available capacity of the internal memory is less than the specified capacity because the operating system and default apps occupy part of the memory. The available capacity may change when you update the device.
- You can view the available capacity of the internal memory in the Specification section for your device on the Samsung website.

Managing the memory

To delete residual files, such as cache, tap **CLEAN NOW**. To delete files or uninstall apps that you do not use any more, select a category under **USER DATA**.

To delete files, tick items and tap **DELETE**.

To uninstall apps, tap and hold items and tap **UNINSTALL**.

You can also schedule a cleaning task, or move apps and their content to a memory card. Tap **Storage booster** and select options.

This feature may not be available depending on the region or service provider.

Memory

On the Settings screen, tap **Device maintenance → Memory**.

To speed up your device by stopping apps running in the background, tick apps from the apps list, and tap **CLEAN NOW**.

Device security

Check the device’s security status. This feature scans your device for malware.

On the Settings screen, tap **Device maintenance → Device security → SCAN PHONE**.
Ultra data saving

Monitor and reduce your mobile data usage by preventing background apps from using the mobile data connection. You can also use the data compression feature to compress Internet data, such as images, videos, and webpages, accessed via the mobile network.

- This feature may not be available depending on the region or service provider.
- Some webpages or content may not be available when this feature is activated, depending on the service provider or the mobile network conditions.

On the Settings screen, tap **Device maintenance → Ultra data saving**, and then tap the switch to activate it.

Activate the Opera Max data compression feature to compress Internet data when using the mobile network.

View the amount of data used and saved for the set monitoring period.

Select apps that are allowed to use the mobile data connection in the background.

You can change the data usage monitoring period. On the Settings screen, tap **Connections → Data usage → Billing cycle and data warning**.
Apps
Manage the device’s apps and change their settings. You can view the apps’ usage information, change their notification or permission settings, or uninstall or disable unnecessary apps.

On the Settings screen, tap Apps.

Lock screen
Options
Change the settings for the locked screen.

On the Settings screen, tap Lock screen.

The available options may vary depending on the screen lock method selected.

- **Screen lock type**: Change the screen lock method.
- **Smart Lock**: Set the device to unlock itself when trusted locations or devices are detected. Refer to Smart Lock for more information.
- **Secure lock settings**: Change screen lock settings for the selected lock method.
- **Lock Screen Stories**: Set the device to display various wallpapers and content on the locked screen. Refer to Setting the Lock screen stories for more information.
- **Clock style**: Change the type and colour of the clock on the locked screen.
- **Roaming clock**: Change the clock to show both the local and home time zones on the locked screen when roaming.
- **FaceWidgets**: Change the settings of the items displayed on the locked screen.
- **Contact information**: Set the device to show contact information, such as your email address, on the locked screen.
- **Notifications**: Set how to show notifications on the locked screen.
- **App shortcuts**: Select apps to display shortcuts to them on the locked screen.
- **About Lock screen**: View the Locked screen version and legal information.
**Smart Lock**

You can set the device to unlock itself and remain unlocked when trusted locations or devices are detected.

For example, if you have set your home as a trusted location, when you get home your device will detect the location and automatically unlock itself.

- This feature will be available to use after you set a screen lock method.
- If you do not use your device for four hours or when you turn on the device, you must unlock the screen using the pattern, PIN, or password you set.

1. On the Settings screen, tap **Lock screen** → **Smart Lock**.
2. Unlock the screen using the preset screen lock method.
3. Select an option and follow the on-screen instructions to complete the setting.

**Biometrics and security**

**Options**

Change the settings for securing the device.

On the Settings screen, tap **Biometrics and security**.

- **Face Recognition**: Set the device to unlock the screen by recognising your face. Refer to [Face recognition](#) for more information.
- **Fingerprint Scanner**: Register your fingerprints to unlock the screen. Refer to [Fingerprint recognition](#) for more information.
- **Screen transition effect**: Set the device to show a transition effect when you unlock the screen using your biometric data.
• **Google Play Protect**: Set the device to check for harmful apps and behaviour and warn about potential harm and remove them.

• **Find My Mobile**: Activate or deactivate the Find My Mobile feature. Access the Find My Mobile website (findmymobile.samsung.com) to track and control your lost or stolen device.

You can also allow the Google location service to provide more accurate information about the location of your device.

• **Security update**: View the version of your device's software and check for updates.

• **Install unknown apps**: Set the device to allow the installation of apps from unknown sources.

• **Secure startup**: Protect your device by setting it to require a screen unlock code when turning on the device. You must enter the unlock code to start the device and receive messages and notifications.

• **Encrypt SD card**: Set the device to encrypt files on a memory card.

  ! If you reset your device to the factory defaults with this setting enabled, the device will not be able to read your encrypted files. Disable this setting before resetting the device.

• **Other security settings**: Configure additional security settings.

**Face recognition**

You can set the device to unlock the screen by recognising your face.

- If you use your face as a screen lock method, your face cannot be used to unlock the screen for the first time after turning on the device. To use the device, you must unlock the screen using the pattern, PIN, or password you set when registering the face. Be careful not to forget your pattern, PIN, or password.

- If you change the screen lock method to **Swipe** or **None**, which are not secure, all of your biometric data will be deleted. If you want to use your biometric data in apps or features, you must register your biometric data again.
Precautions for using face recognition

Before using the face recognition to unlock your device, keep the following precautions in mind.

- Your device could be unlocked by someone or something that looks like your image.
- Face recognition is less secure than Pattern, PIN, or Password.

For better face recognition

Consider the following when using face recognition:

- Consider the conditions when registering, such as wearing glasses, hats, masks, beards, or heavy makeup
- Ensure that you are in a well-lit area and that the camera lens is clean when registering
- Ensure your image is not blurry for better match results

Registering your face

For better face registration, register your face indoors and out of direct sunlight.

2. Unlock the screen using the preset screen lock method.
   If you have not set a screen lock method, create one.

3. Select whether you are wearing glasses or not and tap CONTINUE.

4. Hold the device with the screen facing towards you and look at the screen.
5 Position your face inside the frame on the screen.
   The camera will scan your face.
   When a face lock screen appears, tap **TURN ON** to use your face to unlock the screen.

   ! If unlocking the screen with your face is not working properly, tap **Remove face data**
   to remove your registered face and register your face again.

Dealing the registered face data
You can delete face data that you have registered.

1 On the Settings screen, tap **Biometrics and security → Face Recognition**.
2 Unlock the screen using the preset screen lock method.
3 Tap **Remove face data**.
   Once the registered face is deleted, all the related features will also be deactivated.

Unlocking the screen with your face
You can unlock the screen with your face instead of using a pattern, PIN, or password.

1 On the Settings screen, tap **Biometrics and security → Face Recognition**.
2 Unlock the screen using the preset screen lock method.
3 Tap the **Face unlock** switch to activate it.
   ! If you want to reduce the possibility of recognising faces in photos or videos, tap the
   **Faster recognition** switch to deactivate it. This may decrease the face recognition
   speed.
4 On the locked screen, look at the screen.
   When your face is recognised, you can unlock the screen without using any additional
   screen lock method. If your face is not recognised, use the preset screen lock method.
Fingerprint recognition

In order for fingerprint recognition to function, your fingerprint information needs to be registered and stored in your device. After registering, you can set the device to use your fingerprint for the features below:

- Web sign-in
- Samsung account verification
- Screen lock

- This feature may not be available depending on the region or service provider.
- Fingerprint recognition uses the unique characteristics of each fingerprint to enhance the security of your device. The likelihood of the fingerprint sensor confusing two different fingerprints is very low. However, in rare cases where separate fingerprints are very similar the sensor may recognise them as identical.
- If you use your fingerprint as a screen lock method, your fingerprint cannot be used to unlock the screen for the first time after turning on the device. To use the device, you must unlock the screen using the pattern, PIN, or password you set when registering the fingerprint. Be careful not to forget your pattern, PIN, or password.
- If your fingerprint is not recognised, unlock the device using the pattern, PIN, or password you set when registering the fingerprint, and then re-register your fingerprints. If your pattern, PIN, or password is forgotten, you will not be able to use the device if you do not reset it. Samsung is not responsible for any data loss or inconvenience caused by forgotten unlock codes.
- If you change the screen lock method to Swipe or None, which are not secure, all of your biometric data will be deleted. If you want to use your biometric data in apps or features, you must register your biometric data again.
For better fingerprint recognition

When you scan your fingerprints on the device, be aware of the following conditions that may affect the feature's performance:

- The fingerprint recognition sensor recognises fingerprints. Ensure that the fingerprint recognition sensor is not scratched or damaged by metal objects, such as coins, keys, and necklaces.
- Covering the fingerprint recognition sensor with protective films, stickers, or other accessories may decrease the fingerprint recognition rate. If the fingerprint recognition sensor is initially covered with a protective film, remove it before using the fingerprint recognition sensor.
- Ensure that the fingerprint recognition sensor and your fingers are clean and dry.
- The device may not recognise fingerprints that are affected by wrinkles or scars.
- The device may not recognise fingerprints from small or thin fingers.
- If you bend your finger or use a fingertip, the device may not recognise your fingerprints. Make sure to cover the entire fingerprint recognition sensor with your finger.
- To improve recognition performance, register fingerprints of the hand used most often to perform tasks on the device.
- In dry environments, static electricity can build up in the device. Avoid using this feature in dry environments or before using the feature, discharge static electricity by touching a metal object.

Registering fingerprints

2. Unlock the screen using the preset screen lock method.
   If you have not set a screen lock method, create one.
3 Swipe your finger downwards over the fingerprint recognition sensor.

Repeat this action until the fingerprint is registered. When you are finished registering your fingerprints, tap **DONE**.

When a fingerprint lock screen appears, tap **TURN ON** to use your fingerprint to unlock the screen.

**Deleting registered fingerprints**

You can delete registered fingerprints.

1 On the Settings screen, tap **Biometrics and security → Fingerprint Scanner**.

2 Unlock the screen using the preset screen lock method.

3 Tap **EDIT**.

4 Tick fingerprints to delete and tap **REMOVE**.
Using fingerprints to sign in to accounts

You can use your fingerprints to sign in to webpages that support password saving.

This feature is only available for webpages that you access via the Internet app.

2. Unlock the screen using the preset screen lock method.
3. Tap the Web sign-in switch to activate it.
4. Open a webpage that you want to sign in to with a fingerprint.
5. Enter your user name and password, and then tap the webpage’s sign in button.
6. Tick Sign in using your fingerprints and tap REMEMBER.

You can use your fingerprint to verify your account and password to sign in to the webpage.

Verifying the Samsung account password

Use fingerprints to verify your Samsung account password. You can use a fingerprint instead of entering your password, for example, when you purchase content from Galaxy Apps.

2. Unlock the screen using the preset screen lock method.
3. Tap the Samsung account switch to activate it.
4. Sign in to your Samsung account.
Unlocking the screen with your fingerprints

You can unlock the screen with your fingerprint instead of using a pattern, PIN, or password.

2. Unlock the screen using the preset screen lock method.

3. Tap the Fingerprint unlock switch to activate it.

4. On the locked screen, place your finger on the fingerprint recognition sensor and scan your fingerprint.

Cloud and accounts

Options

Sync, back up, or restore your device’s data using Samsung Cloud. You can also register and manage accounts, such as your Samsung account or Google account, or transfer data to or from other devices via Smart Switch.

On the Settings screen, tap Cloud and accounts.

- **Samsung Cloud:** Manage the content that you want to store securely in Samsung Cloud. Check the usage status of your Samsung Cloud storage, and sync, back up, and restore your data. Refer to Samsung Cloud for more information.

- **Accounts:** Add your Samsung and Google accounts, or other accounts, to sync with.

- **Backup and restore:** Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information and access it later. You must sign in to your Google or Samsung account to back up or restore data. Refer to Backup and restore for more information.

- **Smart Switch:** Launch Smart Switch and transfer data from your previous device. Refer to Smart Switch for more information.

Regularly back up your data to a safe location, such as Samsung Cloud or a computer, so that you can restore it if the data is corrupted or lost due to an unintended factory data reset.
Backup and restore

Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information and access it later. You must sign in to your Google or Samsung account to back up or restore data.

Using a Samsung account

On the Settings screen, tap Cloud and accounts → Backup and restore → Back up data for the Samsung account, tick items you want to back up, and then tap BACK UP.

Data will be backed up to Samsung Cloud. Refer to Samsung Cloud for more information.

To restore backup data from Samsung Cloud using a Samsung account, tap Restore data. Select a device and the data types you want to restore and tap RESTORE. The selected data will be restored to your device.

Using a Google account

On the Settings screen, tap Cloud and accounts → Backup and restore and tap the Back up my data switch for the Google account to activate it. Tap Backup account and select an account as the backup account.

To restore data using a Google account, tap the Automatic restore switch to activate it. When you reinstall apps, backed up settings and data will be restored.

Google

Configure settings for some features provided by Google.

On the Settings screen, tap Google.
Accessibility

Configure various settings to improve accessibility to the device.

On the Settings screen, tap **Accessibility**.

- **Vision**: Customise the settings to improve accessibility for visually impaired users.
- **Hearing**: Customise the settings to improve accessibility for users with hearing impairment.
- **Dexterity and interaction**: Customise the settings to improve accessibility for users who have reduced dexterity.
- **Text-to-speech**: Change the settings for text-to-speech features used when TalkBack is activated, such as languages, speed, and more.
- **Direction lock**: Change the directional combination settings for unlocking the screen.
- **Direct access**: Set the device to launch selected accessibility menus when you press the Power key and the Volume Up key simultaneously.
- **Accessibility shortcut**: Set the device to activate TalkBack, Switch Access, or Select-to-Speak when you press and hold the Volume Up key and the Volume Down key simultaneously for more than 3 seconds.
- **Notification reminder**: Set the device to alert you to notifications that you have not checked at the interval.
- **Answering and ending calls**: Change the method of answering or ending calls.
- **Single tap mode**: Set the device to control incoming calls or notifications by tapping the button instead of dragging it.
- **SERVICES**: View accessibility services installed on the device.
General management

Customise your device’s system settings or reset the device.

On the Settings screen, tap General management.

- **Language and input**: Select device languages and change settings, such as keyboards and voice input types. Some options may not be available depending on the selected language. Refer to Adding device languages for more information.

- **Date and time**: Access and alter the settings to control how the device displays the time and date.

  If the battery remains fully discharged, the time and date is reset.

- **Contact us**: Ask questions or view frequently asked questions. Refer to Samsung Members for more information.

- **Report diagnostic information**: Set the device to automatically send the device’s diagnostic and usage information to Samsung.

- **Marketing information**: Set whether to receive Samsung marketing information, such as special offers, membership benefits, and newsletters.

- **Reset**: Reset your device’s settings or perform a factory data reset. You can reset all your settings and network settings. You can also set the device to restart at a preset time for device optimisation.

Adding device languages

You can add languages to use on your device.

1. On the Settings screen, tap General management → Language and input → Language → Add language.

   To view all the languages that can be added, tap → All languages.

2. Select a language to add.
To set the selected language as the default language, tap **SET AS DEFAULT**. To keep the current language setting, tap **KEEP CURRENT**.

The selected language will be added to your languages list. If you changed the default language, the selected language will be added to the top of the list.

To change the default language from your languages list, drag 🔄 next to a language and move it to the top of the list. Then, tap **DONE**. If an app does not support the default language, the next supported language in the list will be used.

### Software update

Update your device’s software via the firmware over-the-air (FOTA) service. You can also schedule software updates.

On the Settings screen, tap **Software update**.

- **Download updates manually**: Check for and install updates manually.
- **Download updates automatically**: Set the device to download updates automatically when connected to a Wi-Fi network.
- **Scheduled software updates**: Set the device to install updates at a specified time.
- **Last update information**: View information about the last software update.

### Security updates information

Security updates are provided to strengthen the security of your device and protect your personal information. For security updates for your model, visit [security.samsungmobile.com](http://security.samsungmobile.com).

The website supports only some languages.
User manual

View help information to learn how to use the device and apps or configure important settings.

About phone

Access your device’s information.

On the Settings screen, tap About phone.

To change your device’s name, tap EDIT.

• **Status**: View various device information, such as the SIM card status, Wi-Fi MAC address, and serial number.

• **Legal information**: View legal information related to the device, such as safety information and the open source licence.

• **Regulatory information**: Check the regulatory information.

• **Software information**: View the device’s software information, such as its operating system version and firmware version.

• **Battery information**: View the device’s battery status and information.
Appendix

Troubleshooting

Before contacting a Samsung Service Centre, please attempt the following solutions. Some situations may not apply to your device.

When you turn on your device or while you are using the device, it prompts you to enter one of the following codes:

- **Password**: When the device lock feature is enabled, you must enter the password you set for the device.
- **PIN**: When using the device for the first time or when the PIN requirement is enabled, you must enter the PIN supplied with the SIM or USIM card. You can disable this feature by using the Lock SIM card menu.
- **PUK**: Your SIM or USIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your service provider.
- **PIN2**: When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM or USIM card. For more information, contact your service provider.

Your device displays network or service error messages

- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again. While moving, error messages may appear repeatedly.
- You cannot access some options without a subscription. For more information, contact your service provider.

Your device does not turn on

When the battery is completely discharged, your device will not turn on. Fully charge the battery before turning on the device.
The touchscreen responds slowly or improperly

• If you attach a screen protector or optional accessories to the touchscreen, the touchscreen may not function properly.
• If you are wearing gloves, if your hands are not clean while touching the touchscreen, or if you tap the screen with sharp objects or your fingertips, the touchscreen may malfunction.
• The touchscreen may malfunction in humid conditions or when exposed to water.
• Restart your device to clear any temporary software bugs.
• Ensure that your device software is updated to the latest version.
• If the touchscreen is scratched or damaged, visit a Samsung Service Centre.

Your device freezes or encounters a fatal error

Try the following solutions. If the problem is still not resolved, contact a Samsung Service Centre.

Restarting the device

If your device freezes or hangs, you may need to close apps or turn off the device and turn it on again.

Forcing restart

If your device is frozen and unresponsive, press and hold the Power key and the Volume Down key simultaneously for more than 7 seconds to restart it.

Resetting the device

If the methods above do not solve your problem, perform a factory data reset.
Launch the Settings app and tap General management → Reset → Factory data reset → RESET → DELETE ALL. Before performing the factory data reset, remember to make backup copies of all important data stored in the device.
Calls are not connected

- Ensure that you have accessed the right cellular network.
- Ensure that you have not set call barring for the phone number you are dialling.
- Ensure that you have not set call barring for the incoming phone number.

Others cannot hear you speaking on a call

- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If using an earphone, ensure that it is properly connected.

Sound echoes during a call

Adjust the volume by pressing the Volume key or move to another area.

A cellular network or the Internet is often disconnected or audio quality is poor

- Ensure that you are not blocking the device’s internal antenna.
- When you are in areas with weak signals or poor reception, you may lose reception. You may have connectivity problems due to issues with the service provider’s base station. Move to another area and try again.
- When using the device while moving, wireless network services may be disabled due to issues with the service provider’s network.

The battery icon is empty

Your battery is low. Charge the battery.
The battery does not charge properly (For Samsung-approved chargers)

- Ensure that the charger is connected properly.
- Visit a Samsung Service Centre and have the battery replaced.

The battery depletes faster than when first purchased

- When you expose the device or the battery to very cold or very hot temperatures, the useful charge may be reduced.
- Battery consumption will increase when you use certain features or apps, such as GPS, games, or the Internet.
- The battery is consumable and the useful charge will get shorter over time.

Error messages appear when launching the camera

Your device must have sufficient available memory and battery power to operate the camera app. If you receive error messages when launching the camera, try the following:

- Charge the battery.
- Free some memory by transferring files to a computer or deleting files from your device.
- Restart the device. If you are still having trouble with the camera app after trying these tips, contact a Samsung Service Centre.

Photo quality is poorer than the preview

- The quality of your photos may vary, depending on the surroundings and the photography techniques you use.
- If you take photos in dark areas, at night, or indoors, image noise may occur or images may be out of focus.
Error messages appear when opening multimedia files

If you receive error messages or multimedia files do not play when you open them on your device, try the following:

- Free some memory by transferring files to a computer or deleting files from your device.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM-protected, ensure that you have the appropriate licence or key to play the file.
- Ensure that the file formats are supported by the device. If a file format is not supported, such as DivX or AC3, install an app that supports it. To confirm the file formats that your device supports, visit www.samsung.com.
- Your device supports photos and videos captured with the device. Photos and videos captured by other devices may not work properly.
- Your device supports multimedia files that are authorised by your network service provider or providers of additional services. Some content circulated on the Internet, such as ringtones, videos, or wallpapers, may not work properly.

Bluetooth is not working well

If another Bluetooth device is not located or there are connection problems or performance malfunctions, try the following:

- Ensure that the device you wish to connect with is ready to be scanned or connected to.
- Ensure that your device and the other Bluetooth device are within the maximum Bluetooth range (10 m).
- On your device, launch the Settings app, tap Connections, and then tap the Bluetooth switch to re-activate it.
- On your device, launch the Settings app, tap General management → Reset → Reset network settings → RESET SETTINGS to reset network settings. You may lose registered information when performing the reset.

If the tips above do not solve the problem, contact a Samsung Service Centre.
A connection is not established when you connect the device to a computer

- Ensure that the USB cable you are using is compatible with your device.
- Ensure that you have the proper driver installed and updated on your computer.
- If you are a Windows XP user, ensure that you have Windows XP Service Pack 3 or higher installed on your computer.

Your device cannot find your current location

GPS signals may be obstructed in some locations, such as indoors. Set the device to use Wi-Fi or a mobile network to find your current location in these situations.

Data stored in the device has been lost

Always make backup copies of all important data stored in the device. Otherwise, you cannot restore data if it is corrupted or lost. Samsung is not responsible for the loss of data stored in the device.

A small gap appears around the outside of the device case

- This gap is a necessary manufacturing feature and some minor rocking or vibration of parts may occur.
- Over time, friction between parts may cause this gap to expand slightly.

There is not enough space in the device’s storage

Delete unnecessary data, such as cache, using the device maintenance feature or manually delete unused apps or files to free up storage space.
The Apps button does not appear on the Home screen

Without using the Apps button, you can open the Apps screen by swiping upwards or downwards on the Home screen. To display the Apps button at the bottom of the Home screen, launch the Settings app and tap Display → Home screen → Apps button → Show Apps button → APPLY.

The Home button does not appear

The navigation bar containing the Home button may disappear while using certain apps or features. To view the navigation bar, drag upwards from the bottom of the screen.

The screen brightness adjustment bar does not appear on the notification panel

Open the notification panel by dragging the status bar downwards, and then drag the notification panel downwards. Tap ✓ next to the brightness adjustment bar and tap the Show control on top switch to activate it.

Samsung Cloud does not work

- Ensure that you are connected to a network properly.
- During a Samsung Cloud’s service check, you cannot use Samsung Cloud. Try again later.

Removing the battery

- To remove the battery, contact an authorised service centre. To obtain battery removal instructions, please visit www.samsung.com/global/ecodesign_energy.
- For your safety, you must not attempt to remove the battery. If the battery is not properly removed, it may lead to damage to the battery and device, cause personal injury, and/or result in the device being unsafe.
- Samsung does not accept liability for any damage or loss (whether in contract or tort, including negligence) which may arise from failure to precisely follow these warnings and instructions, other than death or personal injury caused by Samsung’s negligence.
