

SOLINGEN  
**TONDEO**

# TRENDS & INNOVATIONS

**TONDEO cuts. TONDEO styles.**

# TRADITION IS GOOD. INNOVATION IS BETTER.

And the right combination of the two is even better: “innovative by tradition” is TONDEO’s recipe for success. For more than 80 years. Today TONDEO is one of the world’s leading brands of hairdressing scissors. Our scissors and razors are convincing in terms of their technology and design and are specifically tailored to your requirements. Even in the manufacture of our “masterpieces”, we rely on the right combination: precise hand work, the use of state-of-the-art machines, technologies and years of know-how allow high-quality unique items to be created. We will present these to you in detail in this catalogue.

**Put your trust in a brand that is rich in tradition,  
and tread innovative paths with us.**

What would you like? Short or long, fringed, thinned or voluminous? You deal with these and similar questions every day – always with the aim in view of making your customers happy and getting the best out of the various types. Your customers have confidence in you. Have confidence in TONDEO. **We produce the tools for creative minds.**

**TONDEO.  
MASTERPIECES  
FOR A MASTER  
CRAFTSMAN.**

**MADE IN SOLINGEN,  
GERMANY.  
A QUALITY  
ASSURANCE.**

**MADE IN  
GERMANY**  
Solingen

Whether classics or trend products, the quality of the materials and the processing of the products are subject to the strictest criteria. Every pair of scissors is checked individually before it leaves the production site. This is in Solingen, the top address in the world for razors, blades and scissors. **All TONDEO hairdressing scissors are exclusively produced here.**

**Our professional sharpening service in Solingen brings your scissors back to their best.** If you want to be able to rely on your TONDEO scissors for a long time to come, make sure you have them resharpened at TONDEO. All scissors are re-sharpened at our plant in Solingen and original parts are replaced as required. The necessary work is done by our trained and qualified specialists – on the same high-precision equipment with which we produce our new TONDEO scissors. We test your scissors thoroughly before leaving our factory (cutting ease, operating quality) – just as carefully as we do our new scissors.

**WE SAFEGUARD  
THE QUALITY OF  
YOUR SCISSORS.**

## FROM THE CUT TO THE FINISH.

**We support your creative work with attractive products and exclusive tips.**

And we support you in all areas as a competent partner with a comprehensive product range. All our products – from scissors to styling mousse – work perfectly with one another and thus make precise styling possible for you from the cut to the finish.

We offer support for your service concept with perfectly matched product sets.

# TONDEO – THE PROFESSIONAL ON YOUR SIDE

TONDEO has the best network in all areas of expertise - which means it always has the latest information when it comes to market developments, trends and specific requirements from our customers. Competence we are keen to show off with our partners.

**TONDEO.  
PARTNER TO  
HAIRDRESSERS**

Our goal: To offer the best possible support to the hairdresser. We always keep a very close eye on the market, maintaining close relationships with a variety of hairdressing companies, and of course hairdressers themselves. Our tools reach hairdressers from all over the world, either via our highly-qualified and motivated field sales team, competent global partners, or our online media. **We are represented at all of the relevant hairdressing fairs nationally and internationally as you would expect.**

We develop our innovations together with hairdressers throughout the world and work closely with a wide variety of hairdressing organisations. Together with top players, TONDEO develops scissors and tools that are exclusively available with the seal „Art Edition“. **Here, you can find genuine top products – developed by pros for pros.**

**THE TONDEO ART  
EDITION. BY PROS  
FOR PROS.**

**WE ARE  
COMMITTED.  
BY CONVICTION.**

**TONDEO is committed:** to the promotion and enhancement of the quality of the hairdressing trade. And to the promotion and qualification of disadvantaged young people, to make a better future possible for them through vocational training or further training. Therefore, TONDEO supports well-known projects, such as „WELLA-UNICEF MAKING WAVES“, initiated by Wella Professionals and UNICEF, as well as the Intercoiffure Herbert Burkhardt Foundation.

# CUT

## It is in your hands. And in our tools.

Around 150 steps are necessary before you can hold a pair of TONDEO scissors in your hands. There is a long journey from the blank to the polished scissors. Our 5 lines of scissors and our razors offer the right tool for everyone from the entry-level employee to the top stylist. They all have one thing in common: the high quality standard made in Solingen.

# PREMIUM-LINE

## Perfect technology. Elegant design.

Those who give their best every day have a right to the best: the scissors of our Premium range. Unique comfort, innovative precision technology and an elegant design are combined in the brilliant scissors of this range.

**SENSATION**

An unmistakable unique item: the SENSATION is manufactured from stainless, 100% Damascus steel from the tip of the blade to the finger rings. It achieves its unique appearance through the traditional Solingen "Great Roses" pattern that adorned the famous razor-sharp Damascus swords as early as the 17<sup>th</sup> century.

**Information on Damascus Steel**  
<http://www.tondeo.com/damast>

**UNIQUE**

Unique: The extravagant design of UNIQUE meets the high design demands with specially shaped, open eye rings and forged finger hooks. The soft fins that can be inserted in the eye rings for individual comfort are also unique. The convex blade and integrated face allow the smallest cutting angle with the best sharpness and stability.

**PURE INSPIRATION**

The attractiveness of these scissors: The greatest degree of ergonomics, design and high-quality materials. For the hairdresser, working with PURE Inspiration means sustained outstanding sharpness without feed. Or to cut it short: pure cutting pleasure!

#### MYTHOS DAMAST

Every scissors is a unique masterpiece – the MYTHOS Damast is fully constructed of 100% rustproof Damascus steel. Steeped in tradition, the Solinger „Large Rose Decor“, which adorned the razor-sharp Damascus Swords as early as the 17th century, lends it a unique appearance.

Information on Damascus Steel <http://www.tondeo.com/damast>

#### MYTHOS/MYTHOS BLACK/ MYTHOS XL

The legendary scissors in terms of cutting-edge technology: MYTHOS with its convex blade and integrated cutting edge makes smaller cutting angles possible for even greater sharpness. Thanks to the Star Auto-cleaner, this top model virtually cleans itself. MYTHOS XL: with an extra-long blade.

Wave: eroded, concentric tulip teeth on the upper blade.

Black: with black, high-gloss and non-allergenic titanium coating.

When it comes to technology and sharpness, one thing is true: The legend lives on!

#### INSPIRE

Our lightweight scissors with a combination of precious metals: INSPIRE with its handles made from extremely light titanium and cutting edge from hardened ball-bearing steel will inspire you to achieve your best every day.

**ZENTAO/ZENTAO BLACK**

Unmistakably inspired by Asia: the extravagant ZENTAO fully represents the trend for long scissors. Particularly convincing are the elegant partially satinised design with the concealed screw and the ergonomically designed finger rings that support a secure and pleasant hand position in the different techniques. The ZENTAO Black with a non-allergenic, wear-resistant titanium coating.

**Also available with micro-serration on one side as ORGANICS.**

**EMOTION**

Award-winning: EMOTION is not only technically excellent – it is the only pair of hairdressing scissors to receive an award for good design. These scissors are characterised by optimum balance and the interplay between different surfaces and coatings.

**CARISMA**

A jewel: the CARISMA with its elegant genuine black agate inlays is the exclusive pair of scissors for individualists. The classic design guarantees excellent weight distribution.

Technical details and article numbers for PREMIUM from p. 46, maintenance tips on p. 53

**ORGANICS.LINE.1**

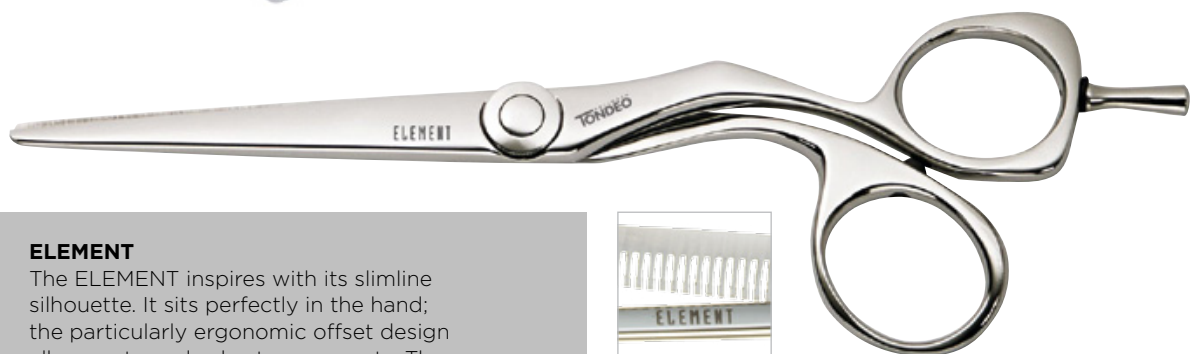

Long, micro-fine-toothed blades for precise cutting for base cuts and contours.

**ORGANICS/ORGANICS BLACK**

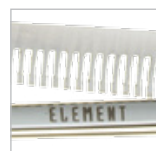

These scissors were developed for the organic haircut, in cooperation with BrockmannundKnoedler. The thinning scissors of the ORGANICS range are available with three different types of teeth and are suitable specifically for a smooth cut in dry hair, in accordance with the Organic Haircutting Concept of BUK. ORGANICS Black with elegant black, high-gloss and non-allergenic titanium coating.

**OrganicHairCutting\* Seminar Program:**

[www.brockmannundknoedler.com](http://www.brockmannundknoedler.com)

**ELEMENT**

The ELEMENT inspires with its slimline silhouette. It sits perfectly in the hand; the particularly ergonomic offset design allows extremely short movements. The organically formed lower blade makes gliding, elegant turning possible.

**concentric tulip teeth**

# S-LINE

## Real top class. For great tips.

You have a mind of your own? We have the right tool for you. In our S-Line range, top hairdressers can find top class scissors. The scissors are the perfect combination of innovative technology and an exclusive design and offer you a maximum level of safety and comfort.

**CRÆNE**

Brings a fresh impetus to your cutting: the CRÆNE provides ergonomics in a new dimension. The elegantly curved blade not only looks stylish, but also makes a straight cut possible with the slightest turn of the wrist and lift of the shoulder.

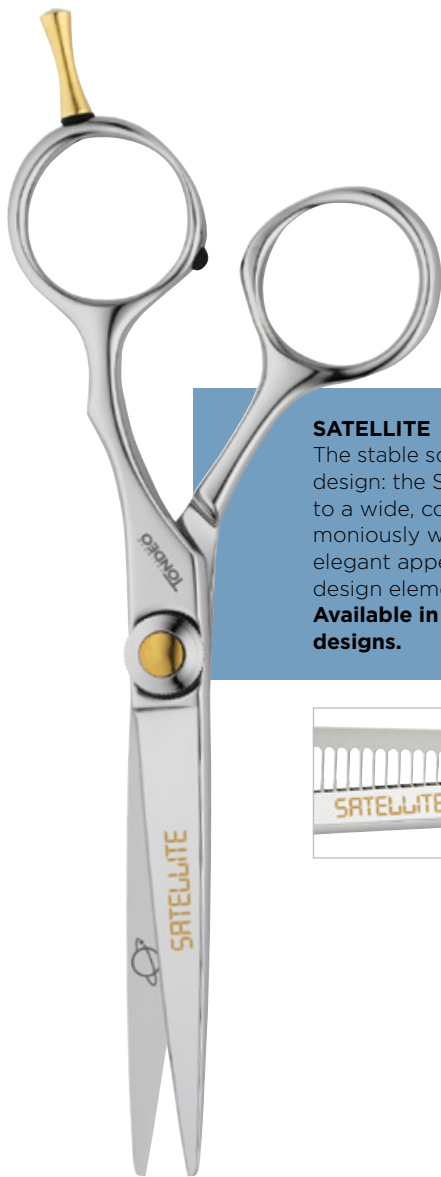

Usage video

**CRÆNE**

[www.tondeo.com/craene](http://www.tondeo.com/craene)

**7EVEN/7EVEN BLACK**

The elegant long scissors: the 7EVEN spreads maximum thinness over its slimline 7 inches. The forged finger hooks and the ergonomic offset design offer stable and optimum control. The 7EVEN Black with non-allergenic, non-wearing titanium nitride coating.

### SATELLITE

The stable scissors with an elegant design: the SATELLITE. High stability due to a wide, convex blade is combined harmoniously with the elegant design. The elegant appearance is completed by design elements and the logo in gold.

**Available in the classic and offset designs.**

### VICTORY/ VICTORY BLACK

The VICTORY provides a perfect design with concealed screw system. Clear curved lines and the radical offset design for greater ergonomics allow these scissors to appear perfect in form.

VICTORY Black with non-allergenic, wear-resistant titanium coating.

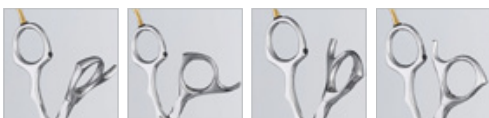

### ROTATION FREE

Twist and turn as you like - the ROTATION goes along with any movement. Based on an idea by US actor, Carmelo Zammitto, the eye rotates by 360° on the lower blade. The lock ensures that the eye remains in the required position when working.

#### **SUPRA**

An elegant classic for a fine cut: the SUPRA. With its delicate, convex blade and fine stem, it allows particularly good access to the hair. Attractive details: gold-coloured logo, finger hook and screw design.

**Available in the classic and offset designs.**

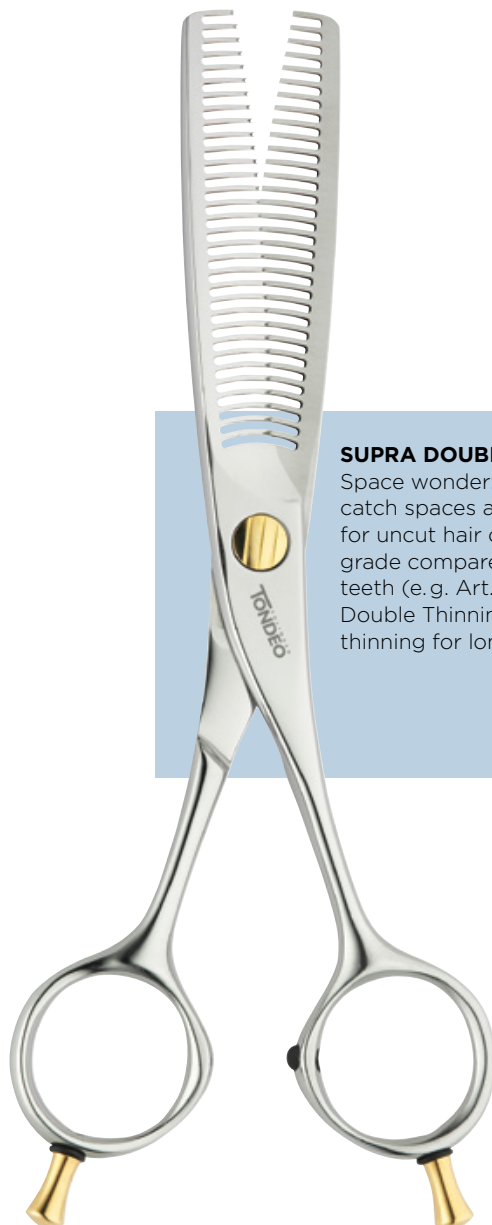

#### **SUPRA XL BLACK**

Slim and elegant – with its long and slim line, convex blade, the SUPRA XL is the perfect pair of scissors for time-saving cutting of contours and gents' cuts. The 2 short finger hooks allow work in any hand position. Also suitable for left-handed users. With non-allergenic, wear-resistant titanium coating.

### SUPRA TEXTURA

Our elegant texturiser for complete haircuts – thanks to extra large hair capture spaces and a supporting guide tooth. The two shortened finger hooks in the classic design make work with any hand position possible.

### SUPRA DOUBLE THINNING

Space wonder: with the teeth on both sides, the catch spaces are doubled and offer so much space for uncut hair on meshes with the same thinning grade compared with an thinning with the same teeth (e.g. Art. no. 8558). This makes SUPRA Double Thinning ideal for dynamic work, faster thinning for long hair and Thinn.cient wig cutting.

Technical details and article numbers for S-LINE from p. 47, maintenance tips on p. 53

While stocks last

**SUPRA TS COBALT**

Long-lasting cutting performance due to an increased proportion of cobalt in the composition of the scissors makes SUPRA TS Cobalt an almost indestructible support for your work. Particular eye-catcher: the cobalt-blue decorative ring of the TS-screw. **Available in the classic and offset designs.**

**SUPRA TS TITAN**

Reliability and stability combined with a stylish black colour. The SUPRA TS Titan proves itself with its very sharp ultra-slice DGT cutting edge that guarantees excellent slicing properties.

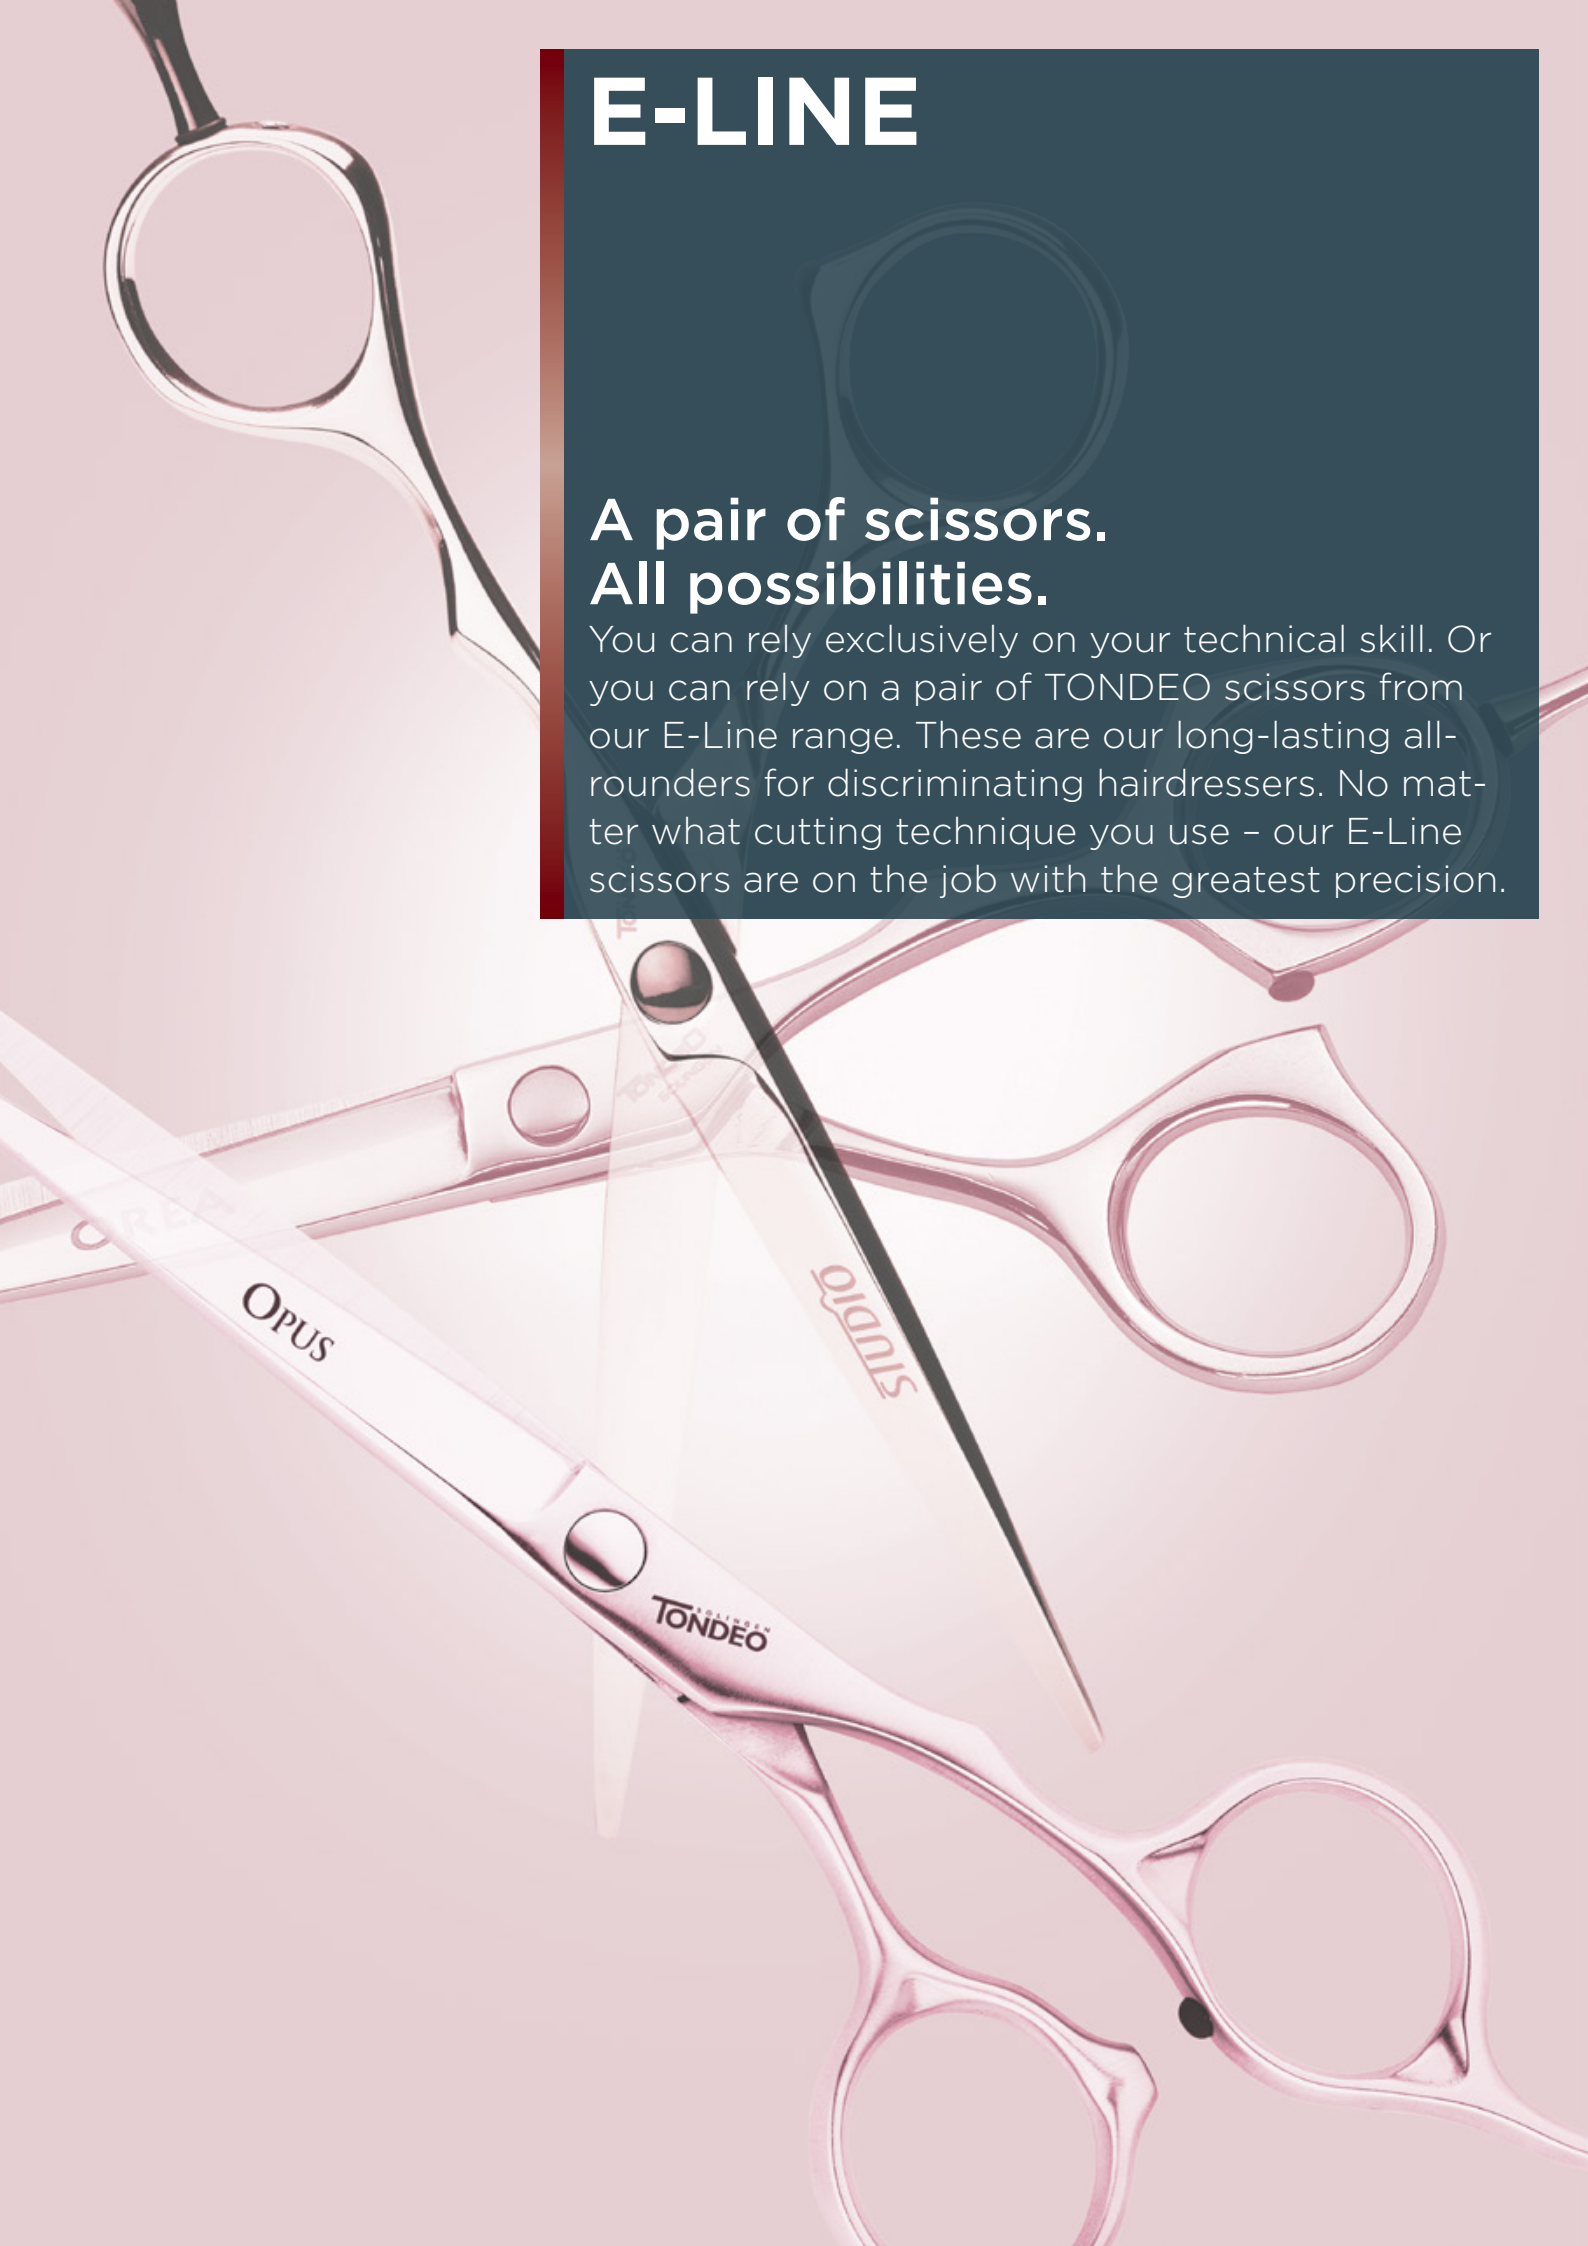

**SUPRA TS LEFT**

Our top class left-handed model. Together with the matching thinning scissors, it makes the perfect pair of scissors for a discriminating left-handed hairdresser and provides an accurate cut and stability.

# E-LINE

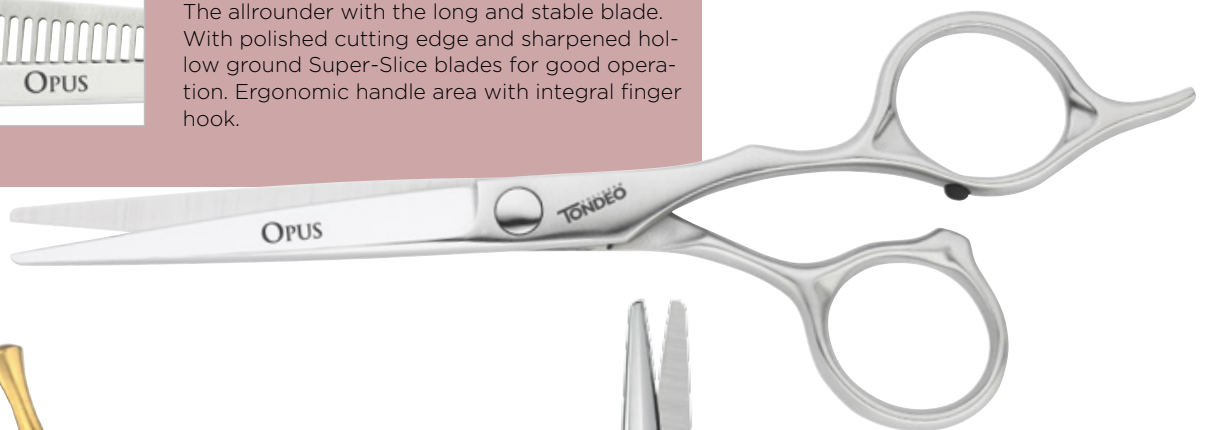

## A pair of scissors. All possibilities.

You can rely exclusively on your technical skill. Or you can rely on a pair of TONDEO scissors from our E-Line range. These are our long-lasting all-rounders for discriminating hairdressers. No matter what cutting technique you use - our E-Line scissors are on the job with the greatest precision.

**OPUS**

The allrounder with the long and stable blade. With polished cutting edge and sharpened hollow ground Super-Slice blades for good operation. Ergonomic handle area with integral finger hook.

**ATELIER**

ATELIER is presented as a fine, elegant all-rounder for the discriminating hairdresser.

**Available in the classic and offset designs.**

**Also available for left-handers.**

**OREA**

Discriminating hairdressers can rely entirely on our robust all-rounder OREA. The pronounced offset ensures relaxed work and accurate cutting results.

**Available in the classic and offset designs.**

Technical details and article numbers for E-LINE from p. 48, maintenance tips on p. 53

While stocks last

**STUDIO**

Anyone who likes flexibility is delighted by our ergonomic all-rounder. Pronounced guide recesses and two optional finger hook positions make fast and secure work possible – with an ergonomically optimum hand position.

Its special feature: hardened, stainless molybdenum steel for long-lasting sharpness.

# C-LINE

**Here, the performance is convincing. And the price.**

But the C-Line scissors are not bestsellers just because of the unbeatable price-performance ratio. Here, experienced hairdressers can find elegant and technically sound scissors that are almost indestructible and survive their daily use effortlessly.

**TRIANGLE**

Design meets individualism. The TONDEO TRIANGLE hair scissors are characterised by a geometric design: the grips on the ring handles form the extravagant, rounded triangular shape that gives it its name. The shanks are also anything but commonplace. Slim to look at, they offer wide, comfortable rests for the fingers and high ergonomic comfort. Another stylish detail is the attractive blend of shiny and matte surfaces.

**CENTURY**

A genuine century product - CENTURY - not only the slimline design is persuasive, but also the wide range of possible applications as slice, micro or thinning scissors. **Available in the classic and offset designs.**

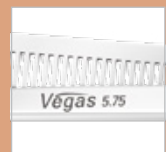

**TCHIRO**

Relaxed cutting due to the effort-saving TONDEO chiro design – which wins over the ergonomics-conscious hairdresser. The flat cutting edges with micro-fine serration on one-side for maximum grip and exceptional cutting precision leave nothing to be desired.

**VEGAS/VEGAS BLACK**

Viva VEGAS! Hairdressers with high quality standards will be inspired by these stable scissors. As well as a gleaming appearance, the technical sophistication of these scissors is persuasive. The VEGAS Black with non-allergenic, wear-resistant titanium coating.

**Available in the classic and offset designs.**

# A-LINE

## Start small. And make it big.

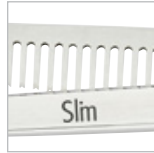

You can rely exclusively on what you have learnt. Or you can improve your technique with a pair of TONDEO scissors. Our A-Line range offers new hairdressers resilient scissors with an attractive design. Rely on the security of a major brand from the start.

**SLIM**

Slim silhouette: SLIM scissors stand out thanks to their particularly narrow and straight blades. With all their slimness and lightness, these beginner's scissors also impress with their great sharpness and glistening, polished surface.

**Available in the classic and offset designs.**

**SPIRIT**

The Spirit of Design & Function: Our slim SPIRIT scissors for the price-conscious hairstylist convince with their sharp narrow blade, ergonomic grip area with forged finger hook and polished surface. Attractive detail: the adjustable slotted screw with stylish decorative cap.

**SPOTS**

The beginner model optionally offers a choice between a cutting edge with a micro-fine serration and a polished cutting edge.

**Available in the classic and offset designs.**

ESPECIALLY FOR  
LEFT-HANDERS

**LEFT**

Absolute reliability for left-handers. These scissors have been especially designed for left-handed users and guarantee optimal cutting force for all applications.

**Available in the classic and offset designs.**

**SPIDER SHINE/SPIDER BLUE**

Cool appearance, yet absolute reliability. SPIDER Shine/Blue offers new hairdressers creative scope from the start and makes a positive impression in terms of its appearance too with its wear-resistant, non-allergenic surface coated with blue titanium.

**Available in the classic and offset designs.**

# M-LINE

## Razors and blades for all situations.

Even for our razors, established techniques and new developments determine the on-going development. In connection with our TONDEO range of blades, you receive hair-cutting devices, with which you can work safely and precisely.

**RAZOR SET TM**

With our classic TM, shaving and cutting are made easy, the protected blade edges on both sides ensure particular safety.

**Suitable for TCR blades, in halves.**

**COMFORT CUT**

Safe razor guidance due to the ideal blade length and a fast blade change due to the comfort blade system – more comfort is hardly possible!

**Suitable for COMFORT Cut blades, incl. safety comb.**

**BLADES****TCR**

Short blades for safe handling

**TCR TRIBAL**

Shortened cutting edge for the delicate shaving out of complex hair tattoo patterns

**TSS 3**

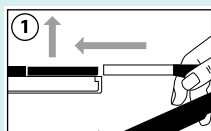

Long blade for rational work in thick hair

**COMFORT CUT BLADES**

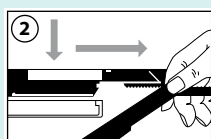

Easy and safe blade change due to special COMFORT blade system

**COMFORT SAFE**

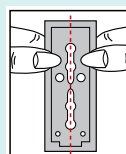

Light and safe blade change due to special COMFORT blade system and safe work due to the serrated safety side and bare professional side

**TIP - HOW TO CHANGE THE BLADES OF TONDEO****COMFORT CUT/COMFORT SAFE**

1. Place the blade guide on the razor blade and slide on up to the impact point. The razor blade is now fixed in place and be lifted out to the top

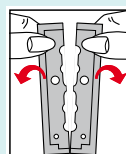

2. Click the razor blade into the empty dispenser compartment and pull the blade out.

**TCR/TCR TRIBAL/TSS3**

1. Leave the razor blades in the paper and break along the middle axis with the tip of the arrow pointing up.

2. Keep the unused halves in the paper.

3. Slide on the razor blade holder, insert the halved razor blade and close the holder tightly again.

**All razors and blades are Made in Germany.**

**SIFTER CLASSIC/SIFTER TRIBAL/SIFTER ERGO**

Vibration-free blade inserts and the classic stainless steel blade handle ensure safe and gentle work with the long blade – and make the SIFTER an all-rounder for all requirements. Sifter Tribal with the extra-short tribal style blade is suited for shaving out hair tattoos and was developed in cooperation with Stefan Lenk. SIFTER Ergo is also convincing due to the ergonomically optimised, light handle.

**Suitable for TSS3, TCR and TCR tribal style blades, in halves, including safety attachment comb.**

# TECHNIC

## More than smooth. Professional devices for creative scope.

Innovative electrical devices complete the high-quality TONDEO range. Here, you can find robust top devices for daily use that are convincing due to their new technologies, durability, wide range of applications and ergonomic design.

### ECO XP SILVER/ECO XP BLACK VELVET

Our elegant design model ECO-XP proves itself as a genuine power pack with 2 cutting speeds for multifunctional use. The elegant Velvet version provides a good grip due to the velvety smooth soft-touch surface.

**Made in Germany.**

### ECO PLUS BLACK

These high performance Design professional clippers for mains and battery operation are impressive all round. They have adjustable cutting lengths and a 46 mm full metal cutting head, while especially convenient handling is guaranteed by the ergonomic shape and soft grip cushioning on the casing.

### ECO L SILVER/ECO L BLACK VELVET With rechargeable batteries

This powerful professional with a high-quality 46 mm all-metal cutting head and an integrated cutting length adjustment completes the ECO range. The powerful motor and 2 Eneloop rechargeable batteries guarantee a lot of power.

The Black Velvet version with a specially comfortable non-slip velvet soft-touch surface.

Technical details and article numbers for TECHNIC from p. 51, maintenance tips on p. 52

While stocks last

**ECO CERAMIC**

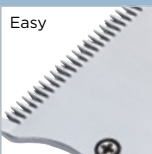

Our 2-way clipper with ceramic plates makes an extremely smooth cut possible and sits particularly well in the hand due to its ergonomic casing with soft-grip padding.

**ECO Tribal/  
ECO M Black**

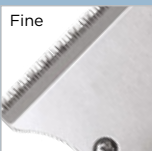

Due to its 40 mm fully metal "easy" cutting plate in T-blade form with rough toothing, the hair cutting machine ECO M is also suitable for complete haircuts. ECO Tribal, developed in cooperation with Stefan Lenk, has fine toothing and is the perfect tool for hair tattoos with the additional 5 mm cutting head and the cutting pattern.

5 mm

Easy

Fine

**Application video**  
[www.tondeo.com/ecotribal](http://www.tondeo.com/ecotribal)

Ideal as a beard trimmer thanks to the additional comb attachment.

#### ECO XS SILVER/ECO XS BLACK VELVET

This convenient lightweight presents itself for everyday use with truly impressive strengths when it comes to beards and contours. And it is also convincing due to its stylish design: in the Velvet version due to the elegant, velvety smooth soft touch surface.

**Made in Germany.**

**POWER**

#### ECO P BLACK VELVET

High performance packed into a small tool: thanks to the power battery pack, this powerful but light hair trimmer operates for a particularly long time and cuts very well! The precise trimmer with 30 mm full-steel cutting head is especially well suited to cutting exacting contours and, thanks to the power battery pack, can also handle full haircuts and thick sections of hair. The velvet soft-touch surface ensures firm grip.

#### ECO S SILVER

Handy like a trimmer, powerful like a clipper and particularly light – high performance can be packed into the smallest space convincingly!

Technical details and article numbers for **TECHNIC** from p. 51, maintenance tips on p. 52

**While stocks last**

#### MINI TRIMMER

It brings eyebrows gently into shape and comfortably and Thinn.ciently removes undesired facial and body hair – the MINI TRIMMER is a big thing amongst the small devices.

INCLUDING AIR SHOWER!

#### E-LINE 1500

It is not only technical values, such as the 3 heat and 2 blower levels, that are convincing in E-LINE 1500. The robustness and reliability of our classic are valued, in particular, in everyday use.

**Including air shower.  
Made in Italy.**

**CERION PREMIUM**

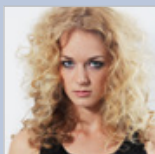

Straight, wavy or curled – the CERION Premium allows all kinds of looks. So that everything goes smoothly for any styling, its flexible, very smooth titanium plates protect against excessive pressure and ensure an increase in care.

**CERION CURVE**

Lively curls with a silky sheen or perfectly straightened beautiful hair – this is even easier with the new CERION Curve. Silver, high-gloss curve inserts at the outside edges make perfect curls possible. The rounded, spring-loaded ceramic and tourmaline coated plates make any styling perfect with a flick of the wrist.

**CERION 2 GO**

Cordless mini styler brings out the best. For straightening, emphasising and finishing. For use in the salon, at home and when out and about. Ideal for fringes, short hair, styling ends and refreshing hairstyles when out and about!

[www.tondeo.com/cerion2go](http://www.tondeo.com/cerion2go)

**CERION PLUS 2.0/CERION 2.0**

Beautiful hair in a gentle process: Ionising ceramic tourmaline runners create gentle infra-red heat. CERION Plus 2.0: The individual temperature setting can be adjusted down to 80 °C for a particularly gentle straightening process.

### CERION WAVE BIG/CERION WAVE MINI 2.0

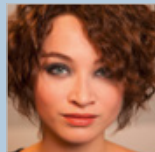

Large, elegantly flowing waves or fashionable Hollywood waves can be styled in no time with the inner wave shaped runners of the CERION WAVE Big or Mini. The special convex, rounded wave runners with ceramic tourmaline coating ensure unbeatable wave styling, gentle shaping and new shine with nourishing ions.

CERION WAVE Big

CERION WAVE Mini 2.0

### CERION HOT BRUSH

The new Hot Brush in the CERION range is the ideal styling aid. The hot brush easily conjures volume, curls or body into the hair or straightens it gently within minutes. The Hot Brush heats up in seconds, making it ready for use almost immediately. The ceramic-coated body of the brush ensures optimum heat distribution. The insulated tip means that the hair can be curled easily using the 40mm-wide brush tip.

# EQUIPMENT

## Our accessories. For your everyday work.

So that you can rely on the customary TONDEO quality, we offer you a constantly growing range of professional accessories – from bags and cases to brushes and combs.

### UNIVERSAL TOOL BAG

The classic amongst our tool bags is convincing due to its hard-wearing synthetic leather, and a lot of space for scissors and other accessories.

All our products comply with the EU guidelines.

### TOOL BOX

Our space wonder for all of your TONDEO products. The tool box has a stable casing with a robust aluminium surface.

Without contents

### NUBUCK TOOL BAG

With our holster with a high-quality nubuck appearance and suede lining, you can always keep our scissors and accessories ready to hand. The bag can be opened at the bottom and is thus easy to clean.

**ATELIER LIGHT CARBON**

The lightweight brush with carbon-coated nylon bristles: Its ultra-light aluminium body makes working with the ATELIER LIGHT Carbon particularly easy.

Vegan. No animal parts

**ATELIER CAOUTCHOUC COMB SET**

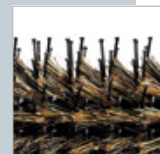

100% natural for the best results: The professional TONDEO caoutchouc comb set is a 100% natural product made from Brazilian caoutchouc trees. All of the comb's teeth are individually milled and polished by hand, which makes them especially smooth and burr-free.

**ATELIER ALPHA ION**

Well-being for the hair – anti-static alpha ion boar bristles with integrated “shoukouseki” silica ensure a natural shine, strong hair and protection from damage. Elegant walnut wood handle.

**ATELIER OFFSET**

Innovative – the angled arrangement of the boar bristles with rounded nylon pins represents the best possible solution for blow-dry styles as they get hold of the hair especially well.

# STYLE

## Styling for every occasion. Always my style.

A sporty, uncomplicated style or a festive style for a big entrance – you will find the right product for every client with the **discostar** salon-only range. The environmentally friendly top up concept that ensures sustainability and cost-effectiveness is also convincing.

### Convincing, our salon-only styling products:

- silicone-free, for reliability of results in dyeing and shaping
- contain Panthenol
- UV-protection
- produced without animal testing
- great results through of a clever mix of products

**Discostar – Mix it!**

## RAZORS & BLADES

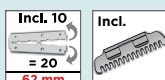

- 1110 Razor **TM** Set  
incl. 10 TCR blades  
**Properties**  
solid metal blade holder  
and handle with plastic casing  
**Suitable blades**  
TCR (1020), in halves

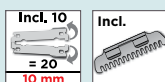

- 1112 **COMFORT** Cut Set  
incl. 10 COMFORT Cut blades  
**Properties**  
functional, ergonomic handle,  
comfortable blade changing  
**Suitable blades**  
Comfort Cut (1111) and Comfort  
Safe (1103)

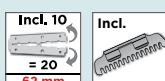

- 1124 **SIFTER** Classic Set  
incl. 10 blades TSS3  
**Properties**  
classic stainless steel handle  
**Suitable blades**  
TSS3 (1040) and TCR/TCR  
Tribal (1020/1033) only with  
blade holder (1184), in halves

- 1180 **SIFTER TRIBAL** Style Set  
10 TCR tribal style blades  
**Properties**  
ideal for the creation of hair tat-  
toos  
**Suitable blades**  
TCR/TCR tribal style  
(1020/1033) and TSS 3 (1040),  
only with blade holder 1185,  
in halves

- 1116 **SIFTER ERGO** Set  
incl. 10 blades TSS3  
**Properties**  
ergonomic folding handle  
**Suitable blades**  
TSS3 (1040) and TCR/TCR  
Tribal (1020/1033) only with  
blade holder (1184), in halves

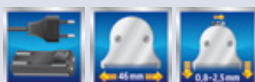

## HAIR CUTTING MACHINES

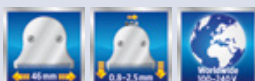

- 3207 **ECO XP** Silver  
3712 **ECO XP** Black Velvet  
Battery-operated, solid steel  
cutting head, comb set (4, 8,  
12, 16, 20 mm), 2 cutting  
speeds, easy cleaning  
quick-change system.  
**Charge time:** approx. 2 hrs  
**Usage time without charging:**  
approx. 45 mins  
**Device weight:** 260 g

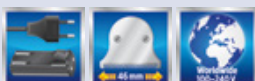

- 3262 **ECO PLUS** Black  
Solid steel cutting head,  
Easy cleaning  
quick-change system,  
comb set (4, 8, 12, 16, 20 mm)  
**Charge time:** approx. 4,5 hrs  
**Usage time without charging:**  
approx. 100 mins  
**Device weight:** 270 g

- 3261 **ECO L** Silver  
3780 **ECO L** Black Velvet  
Battery-operated, solid steel  
cutting head, 2 removable  
fast-charging batteries, easy  
cleaning, quick-change system  
Comb set (4, 8, 12, 16, 20 mm)  
**Charge time:** approx. 4,5 hrs  
**Usage time without charging:**  
approx. 100 mins  
**Device weight:** 270 g

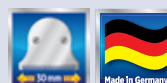

- 3270 **ECO CERAMIC** Silver  
ceramic cutting head,  
easy-cleaning quick release  
system comb set (3, 6, 10, 13,  
25 mm)  
**Charge time:** approx. 4,5 hrs  
**Usage time without charging:**  
approx. 4,5 hrs  
**Device weight:** 222 g

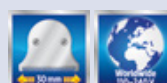

- 3268 **ECO XS** Silver  
3711 **ECO XS** Black Velvet  
battery operation, fully  
steel cutting head,  
1 attachment comb 3-6 mm  
**Charge time:** approx. 16 hrs

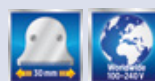

**Usage time without charging:**  
approx. 60 mins  
**Device weight:** 125 g

- 32501 **ECO P** Black Velvet  
Battery operation, fully  
steel cutting head, comb set,  
(5, 10 mm), easy-cleaning quick-  
release system  
rapide Easy-Cleaning  
**Charge time:** approx. 10 hrs  
**Usage time without charging:**  
approx. 100 mins  
**Device weight:** 130 g

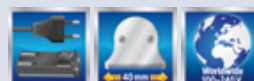

- 3108 **ECO S** Silver  
Battery operation, fully  
steel cutting head, comb set  
(5, 10 mm), easy-cleaning quick-  
release system  
**Charge time:** approx. 16 hrs  
**Usage time without charging:**  
approx. 60 mins  
**Device weight:** 120 g

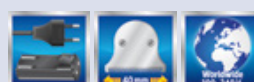

- 3195 **MINI TRIMMER** Silver  
3708 **MINI TRIMMER** Black  
Battery-operated, blades made  
of stainless steel, modern  
micro motor

- 3274 **ECO M** Black  
solid steel, T-blade with  
rough toothing, comb set (3, 6,  
9, 12 mm), easy-cleaning quick  
release system  
**Charge time:** approx. 6 hrs  
**Usage time without charging:**  
approx. 55-65 mins  
**Device weight:** 123 g

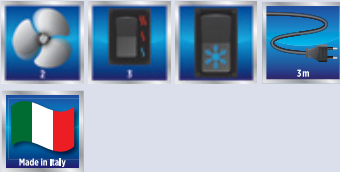

- 3267 **ECO TRIBAL**  
2 fully steel cutting heads  
(T-blade with fine toothing  
and Tribal) comb set (3, 6, 9,  
12 mm), incl. tribal-style pattern  
easy-cleaning quick release sys-  
tem  
**Charge time:** approx. 6 hrs  
**Usage time without charging:**  
approx. 55-65 mins  
**Device weight:** 123 g

## HAIR DRYERS

- 3178 **E-LINE 1500** Black  
1500W AC motor, 2 styling nozzles, air shower, balanced weight distribution, removable stainless steel filter

## FLAT IRONS

- 3278 **CERION PREMIUM**  
Ready for use in seconds, rounded plates, incl. heat protection mat

- 3721 **CERION CURVE** Black/  
3722 **CERION CURVE** White  
shaping curve inserts, incl. heat protection mat

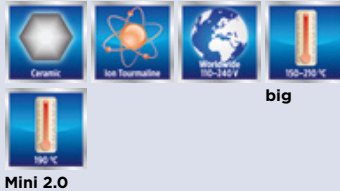

- 31010 **CERION 2 GO**  
Cordless, just 140 g and 19 cm, rounded and flexible plates incl. heat-protection case, perfect for on the go

- 3727 **CERION PLUS 2.0**  
31003 **CERION 2.0**  
Rounded, wide plates, insulated casing made from Thermoplus plastic

- 3731 **CERION WAVE** Big  
3729 **CERION WAVE** Mini 2.0  
runner stop for space-saving storage  
Plus: with wave and volume function

- 31000 **CERION HOT BRUSH** Ø 30 mm  
31002 **CERION HOT BRUSH** Ø 40 mm  
Hot round brush, Insulated Tipp

## BAGS AND CASES

- 3381 **UNIVERSAL TOOL BAG**  
Black  
3694 **UNIVERSAL TOOL BAG**  
Coffee  
3695 **UNIVERSAL TOOL BAG**  
Cream  
3661 **NUBUCK TOOL BAG**

# MAINTENANCE INSTRUCTIONS

## GENERAL

All the tools should **be cleaned or disinfected every day**, so that they are completely ready for use again the next day. Rub down surfaces of hair dryers, haircutting machines and flat irons every day with a slightly damp cloth, so that no residue e.g. of hair cosmetics products forms.

## SCISSORS

Scissors should be cleaned every day with an oil cloth. In the case of severe contamination, rinse the scissors under running water, then rub some scissor oil into the whole pair of scissors, including the cutting edges. **Ideally wet the pivot point with a drop of scissor oil every day**, so that operation and cutting remain good in the long-term. Keep the scissors safe to avoid damages to points and cutting edges. Regular re-sharpening lengthens the lifespan of the scissors. Always have them re-sharpened by the original manufacturer, as only the latter can bring the original sharpness with the original cutting edge angles back to the scissors.

## HAIR CUTTING MACHINES

In order to guarantee the running and cutting performance of hair cutting machines for the long-term, regular maintenance is an absolute must, as the battery performance is severely restricted in the event of contamination with remnants of hair. Therefore, the cutting head must be removed every day and the cutting head and the inside of the device must be cleaned with the brush belonging to the machine. Rub machine oil into the cutting heads regularly so that they remain smooth-running and can work accurately. **The “easy cleaning quick release system” in the TONDEO hair cutting machines makes cleaning much easier**, as the cutting heads can be easily removed and replaced.

## HAIR DRYERS

An absolute must for the hair dryer is the **regular cleaning of the screen in front of the air filter**. If the air supply is not absolutely guaranteed because the screen is dirty, the motor can be overheated and the hair dryer is broken. The air filter should, therefore, ideally be produced from durable stainless steel and be easily removable.

## FLAT IRONS

The plates should **be cleaned every day with a slightly damp cloth**. Make sure that no moisture gets inside the device, as this may lead to short circuits!

## RAZORS AND BLADES

Use a new blade for each customer **for hygiene reasons**. Rinse the razor itself daily under running water and disinfect it if necessary.

## BRUSHES AND COMBS

After every customer, remnants of hair should be removed, of course. Regular thorough cleaning **with water and mild detergents** is compulsory!

## THE CRITERIA FOR GOOD SCISSORS

Serration cutting edges are particularly suited for trims and new hairdressers, as they minimise the feed rate. Slicing techniques are only possible with polished blades. **Due to various sharpening techniques and cutting angles, a sharpness and lifespan is achieved that reaches its optimum in the premium line with the DGT and the integrated cutting edge.** A good pair of thinning scissors must be able to be drawn out of the hair when closed and the hair may not be crushed.

## THE CUTTING EDGE

Slice

Micro

Tulip

## THE SCREW SYSTEM

If a screw is loose, the scissor blades do not close optimally, resulting in the cutting edge being destroyed and the hair being crushed. A screw that is adjusted too tightly also destroys the cutting blades. **The TONDEO screws guarantee optimum scissor tension even in the A-line.**

TS screw

Basic screw

Comfort screw integrated into the design

## THE PIVOT POINT

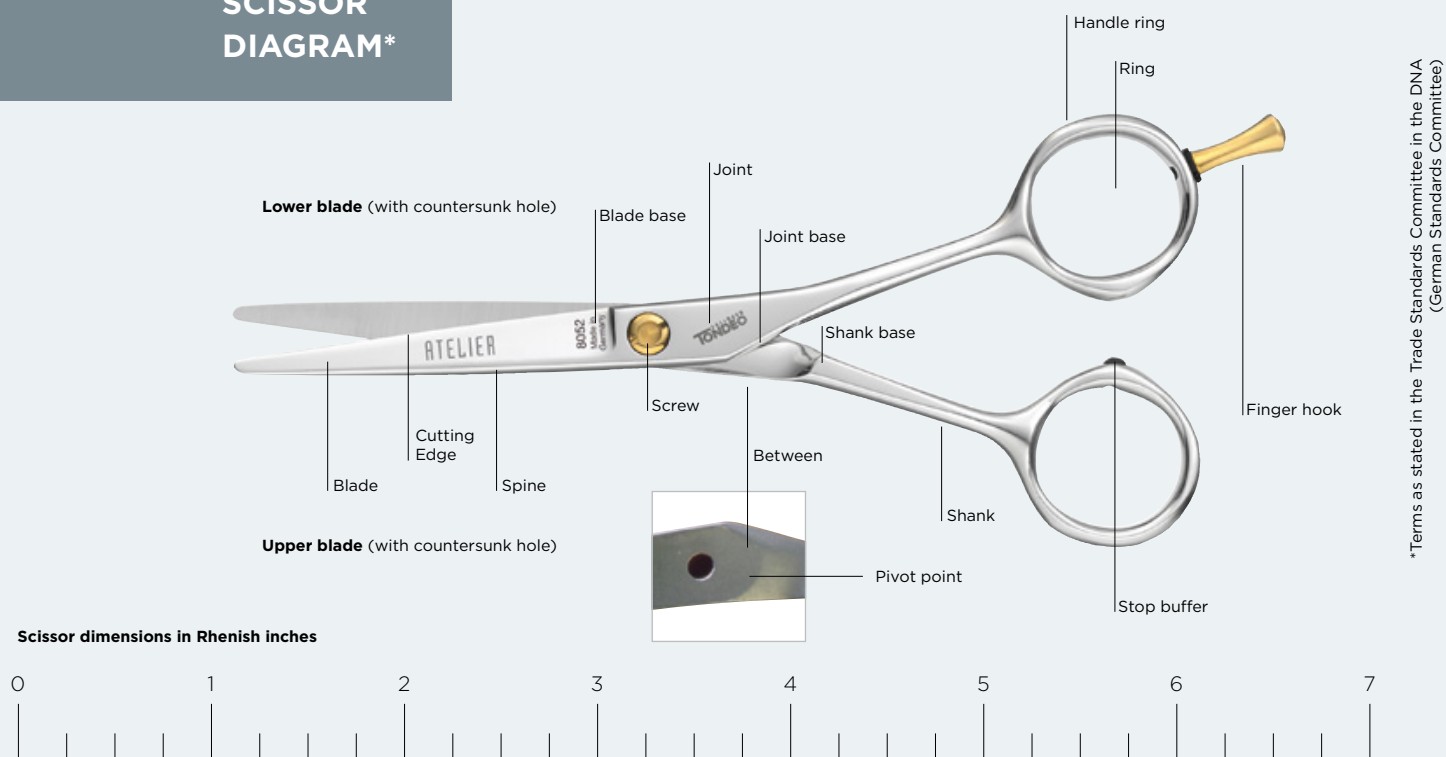

**A good pivot point must guarantee that the scissor blades do not become interweaved.** The more accurate a pivot point, the more stable the cut, the more durable the scissors and the easier the operation. TONDEO scissors have special pivot points or a flat pivot point that increasingly optimise these properties.

## THE DESIGN

There are 4 scissors designs that are characterised by different ergonomic features. In the **classic design**, the lower and upper blades are identical. The **Chiro design** is characterised by an optimised blade/stem proportion with leverage. In the various versions of the **offset design**, the angled handle area or the shortened thumb blade ensure natural handling and relaxed operation. In addition, the thumb musculature is relieved by closing points that are far apart. Due to the special **Cræne design**, an ergonomic scissor position is achieved, in which the wrist, arm and shoulder are relieved.

## SCISSOR DIAGRAM\*

Terms as stated in the Trade Standards Committee in the DNA  
(German Standards Committee)

## CUT

**XTREM-Production-Process**

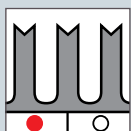

For extreme sharpness, soft operation, and long-life

**Integrated cutting edge**

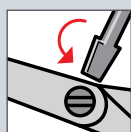

Smallest cutting angle for the greatest sharpness and stability

**Slice cutting edge**

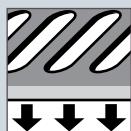

Slice cutting edge with polished cutting edge and polished hollow ground blades for smooth operation

**Thinning teeth**

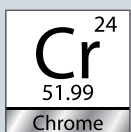

Milled teeth with milled or ground prisms for optimum cutting quality

**Screw system**

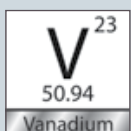

Adjustable screw system in basic or comfort version

**Flat pivot point with auto cleaner**

Remnants of dirt and hair are removed by the cleaning channels in the flat pivot point.

**Chrome-steel**

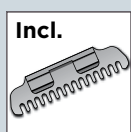

Nickel non-alloy, annealed, rust-free chrome-steel

**Vanadium**

High wear strength thanks to scissors alloy with higher vanadium ratio, nickel non-alloy

**VP<sup>9</sup> steel**

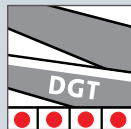

Extraordinary sharpness and edge-holding ability due to 9 % vanadium in the PURE steel and PURE production process

**Incl.****Attachment comb**

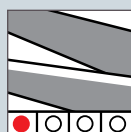

For increased safety

**incl.****Oiler**

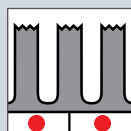

Including a stick with scissor oil

**Ultra-slice DGT cutting edge**

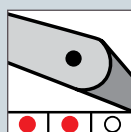

Super-sharp, with finely polished diamond hollow ground blades and a finely polished or integrated grind.

**Standard-slice cutting edge**

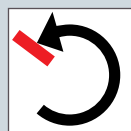

With polished cutting edge and sharpened hollow ground blades for good operation

**Thinning teeth**

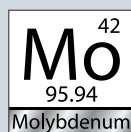

Milled teeth with micro-fine serration on the teeth for smooth operation

**Special pivot point**

The special pivot point for smooth operation in different versions

**TS-screw (turn stop)**

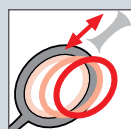

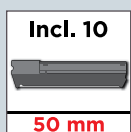

Optimum basic tension of the scissors specified in the factory. The closing force can also be adjusted individually via the adjusting ring, with a „too loose setting“ not being possible

**Molybdenum**

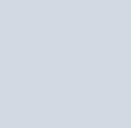

Without nickel alloy, hardened, stainless molybdenum steel

**Ball bearing steel**

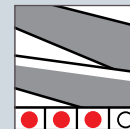

Nickel non-alloy, annealed, rust-free ball bearing steel (440 °C)

**Unscrewable finger hook, replaceable finger ring inserts****Incl. 10****Comfort system blades**

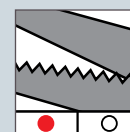

Offer maximum safety during blade change

**Incl. 10****Blades**

In various lengths for different areas of application, which are inserted in the blade holder either in halves or completely.

**Super-slice cutting edge**

Razor-sharp, with polished hollow ground blades for a smooth and accurate cut

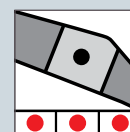

**Micro-fine serration**

Micro-fine serration on one or two sides for maximum cutting precision for trims

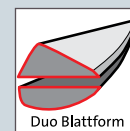

- Micro-fine serration
- shallow micro-fine serration

**Eroded tulip teeth**

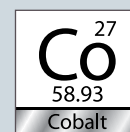

The tulip head-shaped tooth tips provide a precise cutting surface, whilst the narrowing tooth necks make a lot of freedom possible for the remaining hair and thus enable a pleasant operation

**Flat pivot point**

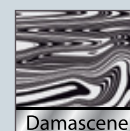

Finely polished, for a smooth and clearance-free operation

**Dual blade**

Craene design with stable dagger blade on the upper blade for work on the edges. Flat, convex blade on the lower blade for precise cutting on the skin

**Cobalt**

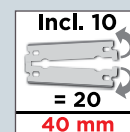

High cutting sharpness thanks to scissors alloy with a higher cobalt ratio, nickel non-alloy

**Damascus steel**

Rust-free, 100 % Damascus steel, 120 rolled layers

**Soft blades**

Innovative eye ring inserts for individual comfort

**Incl. 10****= 20****40 mm****Blades**

In various lengths for different areas of application, which are inserted in the blade holder either in halves or completely.

# EXPLANATION OF THE SYMBOLS

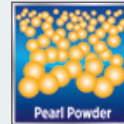

## TECHNIC

**Ceramic-based plates**  
Optimal heat distribution.  
The hair is gently shaped.

**Tourmaline-based plates**  
Heating generates ions which care for the hair. Promotes the absorption of natural moisture into the hair.

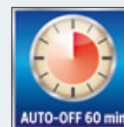

**Pearl powder sealing**  
Particularly gentle gliding of the runners through the hair. Closes the cuticle layer for optimal protection.

**Individual temperature setting**  
Optimal temperature setting for every hair type.

**Flexible plates**  
Protection against excess pressure

**Auto-Off function**  
The iron switches off automatically after the final usage, after the specified time.

**Temperature levels**  
Individual temperature setting for the air flow

**Air flow levels**  
Individual setting for the air flow

**Instant cold button**  
Stabilises the hair

**Adjustable blade length**  
Individually adjustable blade length for the cutting head

**Two-way**  
Mains- and battery-operated

**Cordless**

**Cable length**

**Cable length/ swivel**  
Length and mobility of the cable

**Universal voltage – can be used worldwide**

**Cutting head width**  
Width of the cutting surface of the cutting head

**Made in Germany**

**Made in Italy**
